

Dear Shareholders,

As I write this letter, the stock market is sitting at all-time highs and residential real estate values have seemingly defied logic, staying near all-time high values despite mortgage rates rising from 3% up to 7%. WaFd participated in this bull market with the stock turning in a 40% total shareholder return for the fiscal year. Inflation appears to have been tamed from the 9% clip two short years ago, yet questions persist about whether inflation will behave with a record amount of U.S. Government debt, the potential for tariffs, and an aging workforce. I keep hearing the words of the former Chair of the Federal Reserve, Alan Greenspan, who in the late 1990s, referred to the dot-com fueled market run as “irrational exuberance.”

Is the market irrational? Is there a disconnect between valuations and future cash flows? Can the so-called magnificent seven continue to carry the bull market? These are all legitimate questions that I don't pretend to know the answers to. I do know this: over the long-term, I would rather be invested in the United States than anywhere else. The size and diversification of the economic engine make us the envy of the world. With this context, let me share with you why I believe the future of WaFd is as bright as it has ever been.

During this year, we completed the largest acquisition in our history, taking us into the state of California with its nearly \$2 trillion of deposits. We also executed

the largest loan sale of commercial real estate loans in the history of U.S. banking, selling \$2.8 billion of loans at no loss to WaFd — proving both the credit quality and liquidity of our balance sheet. With so much uncertainty about interest rates, regulation and asset quality, we erred on the side of caution, stockpiling almost 20% of our balance sheet in cash and liquid investments.

Over the last seven years, we have been working to become a digital-first bank. We have made great strides and now offer our commercial clients a phenomenal treasury management system, and our consumer clients online and mobile banking to access and move their money when, where and how they want. Anyone who works with technology quickly concludes that it is a race without a finish line. You can roll out a new feature, and because of the pace of innovation, it will literally be outdated by launch date if not shortly thereafter. We cannot stop investing in technology; a bank that aims to be competitive needs to be consistently surveilling the market, ready to pivot as new opportunities arise.

We are committed to not only surviving, but thriving long-term for our clients, communities, employees and shareholders. History has taught us that having a diverse banking system is one of the positive differentiators in the U.S. economy. We believe that mid-size banks, like WaFd Bank, play a pivotal role as we

are big enough to be relevant and small enough to be responsive to changes in the market and client needs.

We look forward to a bright future, playing the role of financial intermediary, providing a safe harbor for our clients' hard-earned deposits and making prudent loans to spur growth across the nine states we call home.

Our ongoing strong financial performance is a direct result of the hard work and dedication of our employees, who are our most valuable asset. We remain focused on strengthening our operations, investing in our teams and technology, and fostering relationships that enable us to deliver lasting value to our shareholders.

I am proud of the achievements we have made together, and as we look to the future, I am excited about the possibilities and confident of our success.

Thank you for your continued trust and support.

Sincerely,

Brent Beardall
President & Chief Executive Officer

Here for Good

At WaFd Bank, we love what we do, and we are making a difference! It is why we're here, making an impact on the communities we serve. Enjoy these highlights from our 2024 fiscal year:

During the past fiscal year, our **13** regional Diversity and Inclusion councils, made up of volunteers, worked to enhance employment and recruitment diversity, participated in local PRIDE activities, and supported workplace affinity groups for veterans, BIPOC, working parents, emerging leaders and LGBTQIA colleagues

946 unique organizations served with **14,889** hours of employee led volunteer service

265 grants awarded from the WaFd Foundation to local organizations totaling over **\$1 million**

\$121.3 million invested in community development lending including **\$72.9 million** toward affordable housing

Corporate matched donations to United Way agencies totaled **\$847,000**

Continue to offer a hybrid work-setting with 52% of employees working partially from home, supporting work-life balance, lower carbon footprint and attractive recruitment/retention strategy

Net Promoter Score: **55**, one of the highest in the industry

Awarded America's Best-in-State Bank in Washington, Nevada and New Mexico

Securities registered pursuant to section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. Yes No

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements.

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b).

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the registrant's common stock ("Common Stock") held on March 31, 2024, the last business day of the registrant's second fiscal quarter by non-affiliates was \$2,323,756,165 based on the NASDAQ Stock Market closing price of \$29.03 per share on that date. This is based on 80,046,716 shares of Common Stock that were issued and outstanding on this date, which excludes 1,358,675 shares held by all affiliates.

At November 18, 2024, there were 81,352,532 shares of Common Stock outstanding.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS AND RISK FACTOR SUMMARY

WaFd, Inc. ("we" or the "Company") makes statements in this Annual Report on Form 10-K that constitute forward-looking statements. Words such as "expects," "anticipates," "believes," "estimates," "intends," "forecasts," "projects" and other similar expressions or future or conditional verbs such as "will," "should," "would" and "could" are intended to help identify such forward-looking statements. These statements are not historical facts, but instead represent current expectations, plans or forecasts of the Company and are based on the beliefs and assumptions of the management of the Company and the information available to management at the time that these disclosures were prepared. The Company intends for all such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and the provisions of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements are not guarantees of future results or performance and involve certain risks, uncertainties and assumptions that are difficult to predict and often are beyond the Company's control. Actual outcomes and results may differ materially from those expressed in, or implied by, the Company's forward-looking statements.

You should not place undue reliance on any forward-looking statement and should consider the following uncertainties and risks, as well as the risks and uncertainties discussed elsewhere in this report, including under Item 1A. "Risk Factors," and in any of the Company's other subsequent Securities and Exchange Commission filings, which could cause the Company's future results to differ materially from the plans, objectives, goals, estimates, intentions and expectations expressed in forward-looking statements:

Operational Risks:

- fluctuating interest rates and the impact of inflation on the Company's business and financial results;
- risks associated with cybersecurity incidents and threat actors;
- risk related to the integration of Luther Burbank Corporation;
- economic uncertainty or a deterioration in economic conditions or slowdowns in economic growth, including financial stress on borrowers (consumers and businesses) as a result of higher interest rates or an uncertain economic environment;
- the effects of and changes in monetary and fiscal policies of the Board of Governors of the Federal Reserve System and the U.S. Government;
- global economic trends, including developments related to Ukraine and Russia, the Middle East, and related negative financial impacts on our borrowers, the financial markets and the global economy;
- our ability to make accurate assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of our borrowers and the value of the assets securing these loans;
- risks related to operational, technological, and third-party provided technology infrastructure;
- risks associated with data privacy laws and regulations;
- risk associated with the development and use of artificial intelligence;
- risks associated with our failure to retain or attract key employees;
- risks associated with failures of our risk management framework;
- risks related to the impacts of climate change on our business or reputation;
- the effects of natural or man-made disasters, calamities, or conflicts, including terrorist events and pandemics (such as the COVID-19 pandemic), and the resulting governmental and societal responses, including on our asset credit quality and business operations, as well as its impact on general economic and financial market conditions;

Regulatory and Litigation Risk:

- non-compliance with the USA PATRIOT Act, Bank Secrecy Act, Community Reinvestment Act, Fair Lending Laws, Real Estate Settlement Procedures Act, Truth-in-Lending Act, Flood Insurance Reform Act or other laws and regulations;
- the Company's ability to manage the risks and costs involved in the remediation efforts to the Bank's Home Mortgage Disclosure Act ("HMDA") compliance and reporting, and the impact of enforcement actions or legal proceedings with respect to the Bank's HMDA program;
- legislative and regulatory limitations, including those arising under the Dodd-Frank Act, the Washington Commercial Bank Act and potential limitations in the manner in which the Company conducts its business and undertakes new investments and activities;
- risks associated with increases to deposit insurance premiums or special assessments;
- litigation risks resulting in significant expenses, losses and reputational damage;
- environmental risks resulting from our real estate lending business;

Market and Industry Risk:

- eroding confidence in the banking system and regional banks in particular;
- downturns in the real estate market;
- changes in banking operations, including a shift from retail to online activities;
- changes in other economic, competitive, governmental, regulatory and technological factors affecting the Company's markets, operations, pricing, products, services and fees;
- risks associated with inadequate or faulty underwriting and loan collection practices;
- risks associated with our geographic concentration, including the effects of a severe economic downturn, including high unemployment rates and declines in housing prices and property values, in our primary market areas;
- industry deficiencies in foreclosure practices, including delays and challenges in the foreclosure process;
- impairment of goodwill;

Competitive Risks:

- competition from other financial institutions and new market participants, offering services similar to those offered by the Bank;
- our ability to grow organically or through acquisitions;
- risks associated with our entry into the California market;

Security Ownership Risks:

- our ability to continue to pay dividends, including on our outstanding Series A Preferred Stock;
- risks related to the volatility of our Common Stock, and future dilution;
- the ability of the Company to obtain external financing to fund its operations or obtain financing on favorable terms;
- risks related to Washington's anti-takeover statute;
- effects of activist shareholders;

General Risks:

- the success of the Company at managing the risks involved in the foregoing and managing its business; and
- the timing and occurrence or non-occurrence of events that may be subject to circumstances beyond the Company's control.

For the reasons described above, we caution you against relying on any forward-looking statements. You should not consider the summary of such factors to be an exhaustive statement of all risks, uncertainties, or potentially inaccurate assumptions that could cause our current expectations or beliefs to change. Further, all forward-looking statements speak only as of the date on which such statements are made, and the Company undertakes no obligation to update or revise any forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events, changes to future operating results over time, or the impact of circumstances arising after the date the forward-looking statement was made.

Item 1. Business

General

Washington Federal Bank, a federally-insured Washington state chartered commercial bank dba WaFd Bank (the "Bank" or "WaFd Bank"), was founded on April 24, 1917 in Ballard, Washington and is engaged primarily in providing lending, depository, insurance and other banking services to consumers, mid-sized to large businesses, and owners and developers of commercial real estate. WaFd, Inc., a Washington corporation, was formed as the Bank's holding company in November, 1994. On September 27, 2023, the Company filed Articles of Amendment to its Restated Articles of Incorporation, as amended, with the Washington Secretary of State, to change its name from Washington Federal, Inc. to WaFd, Inc. This change was effective on September 29, 2023. As used throughout this document, the terms "WaFd," the "Company" or "we" or "us" and "our" refer to WaFd, Inc. and its consolidated subsidiaries, and the term "Bank" or "WaFd Bank" refers to its bank operating subsidiary. The Company is headquartered in Seattle, Washington.

On November 9, 1982 the Company listed and began trading on the NASDAQ. Profitable operations have been recorded every year since going public. As of September 30, 2024, the stock traded at 91 times its original 1982 offering price, has paid 166 consecutive quarterly cash dividends and has returned 15,195% total shareholder return to those who invested 42 years ago.

On February 29, 2024, WaFd, Inc. closed its merger with Luther Burbank Corporation ("Luther Burbank" or "LBC"), a California corporation, effective as of 12:00am on March 1, 2024. Pursuant to the Merger Agreement, at the Effective Time Luther Burbank merged with and into the Company (the "Corporate Merger"), with the Company surviving the Corporate Merger. Promptly following the Corporate Merger, Luther Burbank's wholly-owned bank subsidiary, Luther Burbank Savings, merged with and into WaFd Bank with WaFd Bank as the surviving institution (the "Bank Merger"). The Corporate Merger and the Bank Merger are collectively referred to in this Annual Report on Form 10-K as the "Merger." The Merger added approximately \$7.7 billion of LBC assets at fair value to the Company's balance sheet, and the Company assumed \$50,175,000 in floating rate junior subordinated debentures, due June 2036 and June 2037, and \$93,514,000 in 6.5% senior unsecured term notes which matured and were paid off on September 30, 2024. The Merger expanded WaFd Bank's footprint to nine western states with the addition of ten California branches of Luther Burbank.

The Company's fiscal year end is September 30th. All references herein to 2024, 2023 and 2022 represent balances as of September 30, 2024, September 30, 2023 and September 30, 2022, respectively, or activity for the fiscal years then ended.

The business of the Bank consists primarily of accepting deposits from the general public and investing these funds in loans of various types, including first lien mortgages on single-family dwellings, construction loans, land acquisition and development loans, loans on multi-family, commercial real estate and other income producing properties, home equity loans and business loans. The Bank also invests in certain United States government and agency obligations and other investments permitted by applicable laws and regulations. As of September 30, 2024, Washington Federal Bank has 210 branches located in Washington, Oregon, Idaho, Arizona, Utah, Nevada, New Mexico, California and Texas. Through the Bank's subsidiaries, the Company is also engaged in insurance brokerage activities.

The principal sources of funds for the Company's activities are retained earnings, loan repayments, net deposit inflows, borrowings and repayments and sales of investments. WaFd's principal sources of revenue are interest on loans and interest and dividends on investments. Its principal expenses are interest paid on deposits, credit costs, general and administrative expenses, interest on borrowings and income taxes.

The Bank is subject to extensive regulation, supervision and examination by its primary state regulator, the Washington State Department of Financial Institutions (the "WDFI"), the Federal Deposit Insurance Corporation ("FDIC"), its primary federal regulator, which insures its deposits up to applicable limits, and the Consumer Financial Protection Bureau (the "CFPB"). The Company, as a bank holding company, is subject to extensive regulation, supervision and examination by the Board of Governors of the Federal Reserve System ("Federal Reserve").

The regulatory structure gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities. Any change in such regulation, whether by the WDFI, the FDIC, the Federal Reserve, the CFPB or the U.S. Congress, could have a significant impact on the Company and its operations. See "Regulation" section below.

Lending Activities

General. The Company's net loan portfolio totaled \$20,916,354,000 at September 30, 2024 and represents 74.5% of total assets. Lending activities include the origination of loans secured by real estate, including long-term fixed-rate and adjustable-rate mortgage loans, adjustable-rate construction loans, adjustable-rate land development loans, fixed-rate and adjustable-rate multi-family loans, fixed-rate and adjustable-rate commercial real estate loans and fixed-rate and adjustable-rate business loans.

The following table is a summary of loans receivable by loan portfolio segment and class.

	September 30, 2024	September 30, 2023	September 30, 2022
	(\$ in thousands)		
Gross loans by category			
Commercial loans			
Multi-family	\$ 4,658,119	2,907,086	2,645,801
	20.8 %	14.8 %	13.6 %

	16.8	17.0	16.2
Commercial & industrial	2,337,139	2,321,717	2,350,984
	10.5	11.8	12.1
Construction	2,174,254	3,318,994	3,784,388
	9.7	16.9	19.5
Land - acquisition & development	200,713	201,538	291,301
	0.9	1.0	1.5
Total commercial loans	13,127,265	12,094,294	12,206,134
	58.7	61.6	63.0
Consumer loans			
Single-family residential	8,399,030	6,451,270	5,771,862
	37.6	32.8	29.8
Construction - custom	384,161	672,643	974,652
	1.7	3.4	5.0
Land - consumer lot loans	108,791	125,723	153,240
	0.5	0.6	0.8
HELOC	266,151	234,410	203,528
	1.2	1.2	1.0
Consumer	73,998	70,164	75,543
	0.3	0.4	0.4
Total consumer loans	9,232,131	7,554,210	7,178,825
	41.3	38.4	37.0
Total gross loans	22,359,396	19,648,504	19,384,959
	100 %	100 %	100 %
Less:			
Allowance for credit losses ⁽¹⁾	203,753	177,207	172,808
Loans in process	1,009,798	1,895,940	3,006,023
Net deferred fees, costs and discounts	229,491	98,807	92,564
Total loan contra accounts	1,443,042	2,171,954	3,271,395
Net loans	<u>\$ 20,916,354</u>	<u>\$ 17,476,550</u>	<u>\$ 16,113,564</u>

(1) The ACL within the table does not include the reserve for unfunded commitments which was \$21,500,000, \$24,500,000 and \$32,500,000 as of September 30, 2024, 2023 and 2022, respectively.

Lending Programs and Policies. The Bank's lending activities include commercial and consumer loans, including the following loan categories.

Commercial real estate loans. The Bank makes loans on a variety of commercial real estate (“CRE”) types which are generally secured by the subject property. Management differentiates multi-family properties from the rest of our CRE portfolio as these loans have key differences in the way they are handled from underwriting through monitoring.

The following table provides detail of the amortized cost of non-multi family CRE loans by property type:

	September 30, 2024		September 30, 2023		September 30, 2022	
	(\$ in thousands)					
Office	\$	783,363	\$	815,776	\$	813,103
Industrial		705,401		591,507		481,473
Retail		399,276		377,300		370,139
Warehouse/Self Storage		295,275		252,677		244,985
Medical/dental		265,495		198,208		167,200
Mixed Use		229,351		232,564		243,430
Hotel/motel		205,895		228,503		219,911
Other		848,099		613,566		570,871
Total commercial real estate loans	\$	3,732,155	\$	3,310,101	\$	3,111,112

Within the types listed above, a CRE subject property could be either owner or non-owner occupied. The following table provides the amortized cost of CRE loans by occupation status:

	September 30, 2024		September 30, 2023		September 30, 2022				
	(\$ in thousands)								
Non-owner occupied	\$	3,130,637	84 %	\$	2,715,693	82 %	\$	2,487,568	80 %
Owner occupied		601,518	16 %		594,408	18 %		623,544	20 %
Total commercial real estate loans	\$	3,732,155	100 %	\$	3,310,101	100 %	\$	3,111,112	100 %

In underwriting, the Bank considers a number of factors, which include the projected net cash flow to the loan's debt service requirement, the age and condition of the collateral, the financial resources and income level of the borrower and the borrower's experience in owning or managing similar properties. CRE loans are originated in amounts up to 75% of the appraised value of the property securing the loan.

With CRE loans, credit risk is a result of several factors, including the concentration of principal in a limited number of loans and borrowers, the effects of general economic and societal conditions on income-producing properties and the primary source of cash flow for repayment being spread across multiple tenants (non-owner). Repayment of CRE loans depends upon the successful operation of the related real estate property. If the cash flow from the property is reduced, the borrower's ability to repay the loan may be impaired. The Bank seeks to minimize these risks through its underwriting policies, which require such loans to be qualified at origination on the basis of the property's income and debt service ratio.

Multi-family residential loans. Multi-family residential (five or more dwelling units) loans generally are secured by multi-family rental properties, such as apartment buildings. In underwriting multi-family residential loans, the Bank considers the same factors considered for CRE loans. Like CRE, multi-family residential loans are originated in amounts up to 75% of the appraised value of the property securing the loan.

Loans secured by multi-family residential real estate generally involve different credit risk than single-family residential loans and carry larger loan balances. This different credit risk is a result of several factors, including the concentration of principal in a limited number of loans and borrowers, the effects of general economic and societal conditions on income-

producing properties, the primary source of cash flow for repayment being spread across multiple tenants, the effects of government orders such as eviction forbearance and the increased difficulty of evaluating and monitoring these types of loans.

It is the Bank's policy to obtain title insurance ensuring that it has a valid first lien on the mortgaged real estate serving as collateral for the loan. Borrowers must also obtain hazard insurance prior to closing and, when required by regulation, flood insurance. Borrowers may be required to advance funds on a monthly basis, together with each payment of principal and interest, to a mortgage escrow account from which the Bank makes disbursements for items such as real estate taxes, hazard insurance premiums and private mortgage insurance premiums when due.

Commercial and industrial loans. The Bank makes various types of business loans to customers in its market area for working capital, acquiring real estate, equipment or other business purposes, such as acquisitions. The terms of these loans generally range from less than one year to a maximum of ten years. The loans are either negotiated on a fixed-rate basis or carry adjustable interest rates indexed to the Secured Overnight Funding Rate ("SOFR"), Prime Rate or another market rate.

Commercial loans are made based upon assessment of the borrower's ability and willingness to repay along with an evaluation of secondary repayment sources such as the value and marketability of collateral. Most such loans are extended to closely held businesses and the personal guaranty of the principal is usually obtained. Commercial loans have a relatively high risk of default compared to residential real estate loans. Pricing of commercial loans is based on the credit risk of the borrower with consideration given to the overall relationship of the borrower, including deposits and contributed equity/loan-to-value ratio. The acquisition of business deposits is an important focus of this business line. The Bank provides a full line of treasury management products to support the depository needs of its clients.

Construction loans. The Bank originates construction loans to finance construction of single-family and multi-family residences as well as commercial properties. Loans made to builders are generally tied to an interest rate index and normally have maturities of two years or less or are structured such that they convert to a permanent loan after the completion of construction or stabilization of the property. Loans made to individuals for construction of their home generally are 30-year fixed rate loans. The Bank's policies provide that for residential construction loans, loans may be made for 85% or less of the construction cost or 80% of the appraised value of the property upon completion, whichever is less. As a result of activity over the past four decades, the Bank believes that builders of single-family residences in its primary market areas consider the Bank to be a construction lender of choice. Because of this history, the Bank has developed a staff with in-depth land development and construction experience and working relationships with selected builders based on their operating histories and financial stability.

Construction lending involves a higher level of risk than single-family residential lending due to the concentration of principal in a limited number of loans and borrowers and the effects of general economic conditions in the home building industry. Moreover, a construction loan can involve additional risks because of the complexities of completing the construction, the inherent difficulty in estimating the cost (including interest) of the project, the future cash flows and the property's value at completion of the project.

Land development loans. The Bank's land development loans are of a short-term nature and are generally made for 75% or less of the appraised value of the unimproved property. Funds are disbursed periodically at various stages of completion as authorized by the Bank's personnel. The interest rate on these loans typically adjust daily or monthly in accordance with a designated index.

Land development loans involve a higher degree of credit risk than long-term financing on owner-occupied real estate. Mitigation of risk of loss on a land development loan is dependent largely upon the accuracy of the initial estimate of the property's value at completion of development compared to the estimated cost (including interest) of development and the financial strength of the borrower.

Permanent land loans. The Bank's permanent land loans (also called consumer lot loans) are generally made on improved land, with the intent of building a primary or secondary residence. These loans are limited to 70% or less of the appraised value of the property, up to a maximum loan amount of \$1,500,000. The interest rate on permanent land loans is generally fixed for 20 years.

Single-family residential loans. The Bank originates 30-year fixed-rate mortgage loans secured by single-family residences. Moreover, it is the Bank's general policy to include in the documentation evidencing its conventional mortgage loans a due-on-sale clause, which facilitates adjustment of interest rates on such loans when the property securing the loan is sold or transferred.

All of the Bank's mortgage lending is subject to written, nondiscriminatory underwriting standards, loan origination procedures and lending policies approved by the Company's Board of Directors (the "Board"). Property valuations are required

on all real estate loans. Appraisals are prepared by independent appraisers, reviewed by staff of the Bank, and approved by the Bank's management. Property evaluations are sometimes utilized in lieu of appraisals on single-family real estate loans of \$250,000 or less and are reviewed by the Bank's staff. Detailed loan applications are obtained to determine the borrower's ability to repay and the more significant items on these applications are verified through the use of credit reports, financial statements or written confirmations.

Depending on the size of the loan involved, a varying number of officers of the Bank must approve the loan application before the loan can be granted. Federal guidelines limit the amount of a real estate loan made to a specified percentage of the value of the property securing the loan, as determined by an evaluation at the time the loan is originated. This is referred to as the loan-to-value ratio. The Board sets the maximum loan-to-value ratios for each type of real estate loan offered by the Bank.

When establishing general reserves for loans with loan-to-value ratios exceeding 80% that are not insured by private mortgage insurance, the Bank considers the additional risk inherent in these products, as well as their relative loan loss experience, and provides reserves when deemed appropriate. The total balance for loans with loan-to-value ratios exceeding 80% at origination as of September 30, 2024, was \$315,704,000, with allocated reserves of \$2,939,000.

Consumer loans. The Bank's non-mortgage consumer loan portfolio consists of prime quality student loans acquired from an independent financial investment firm that retains 1% of each loan, plus various other non-mortgage consumer loans including personal lines of credit and credit cards.

Home equity loans. The Bank extends revolving lines of credit to consumers that are secured by a first or second mortgage on a single-family residence. The interest rate on these loans adjusts monthly indexed to prime. Total loan-to-value ratios when combined with any underlying first liens held by the Bank are limited to 85% or less. Total loan-to-value ratios are limited to 80% or less when underlying first liens are held by any other investor. Loan terms are a ten-year draw period followed by a fifteen-year amortization period.

Origination and Purchase of Loans. The Bank has general authority to lend anywhere in the United States; however, its primary lending areas are within the states of Washington, Oregon, Idaho, Arizona, Utah, Nevada, New Mexico, California and Texas. Loan originations come from a variety of sources. Residential loan originations result from referrals from real estate brokers, walk-in customers, purchasers of property in connection with builder projects that are financed by the Bank, mortgage brokers and refinance activity for existing customers. Business purpose loans are obtained primarily by direct solicitation of borrowers and ongoing relationships.

The Bank also purchases loans and mortgage-backed securities when lending rates and mortgage volume for new loan originations in its market area do not fulfill its needs.

The table below shows the Bank's total loan origination, purchase and repayment activities.

Twelve Months Ended September 30,	2024	2023	2022
	(In thousands)		
Commercial loan originations ⁽¹⁾			
Multi-family	\$ 60,730	\$ 136,788	\$ 675,534
Commercial Real Estate	246,930	223,361	880,850
Commercial & Industrial	1,677,371	2,032,460	2,569,682
Construction	603,829	1,046,971	2,486,387

Total loans originated	3,632,071	4,702,156	8,736,193
Loans purchased ⁽³⁾	6,207,393	80,015	564,584
Loans sold ⁽⁴⁾	(3,017,506)	—	—
Loan principal repayments	(4,302,359)	(4,435,269)	(6,194,448)
Net change in loans in process, discounts, etc. ⁽²⁾	920,205	1,016,084	(826,335)
Net loan activity increase (decrease)	\$ 3,439,804	\$ 1,362,986	\$ 2,279,994
Beginning balance	\$ 17,476,550	\$ 16,113,564	\$ 13,833,570
Ending balance	\$ 20,916,354	\$ 17,476,550	\$ 16,113,564

(1) Includes undisbursed loan in process.

(2) Includes non-cash transactions.

(3) Loans purchased in fiscal 2024 refer to those obtained in the Merger

(4) Loans sold in fiscal 2024 refer to multi-family and single-family residential loans obtained in the Merger and were classified as held for sale.

Interest Rates, Loan Fees and Service Charges. Interest rates charged by the Bank on mortgage loans are primarily determined by the competitive loan rates offered in its lending areas and in the secondary market. Mortgage loan rates reflect factors such as general interest rates, the supply of money available to the industry and the demand for such loans. General economic conditions, the regulatory programs and policies of federal and state agencies, including the Federal Reserve Bank's monetary policies, changes in tax laws and governmental budgetary programs influence these factors.

The Bank receives fees for originating loans in addition to various fees and charges related to existing loans, including prepayment charges, late charges and assumption fees. In making one-to-four-family home mortgage loans, the Bank normally charges an origination fee and as part of the loan application, the borrower pays the Bank for out-of-pocket costs, such as the appraisal fee, whether or not the borrower closes the loan. The interest rate charged is normally the prevailing rate at the time the loan application is approved and accepted. In the case of construction loans, the Bank normally charges an origination fee. Loan origination fees and other terms of multi-family residential loans are individually negotiated.

Investment Activities

The Bank is obligated by its regulators to maintain adequate liquidity and does so by holding cash and cash equivalents and by investing in securities. These investments may include, among other things, certain certificates of deposit, repurchase

agreements, bankers' acceptances, loans to financial institutions whose deposits are federally-insured, federal funds, United States government and agency obligations and mortgage-backed securities.

Sources of Funds

General. Deposits are the primary source of the Bank's funds for use in lending and other general business purposes. In addition to deposits, the Bank derives funds from loan repayments, advances from the Federal Home Loan Bank of Des Moines ("FHLB - DM"), borrowings from the Federal Reserve Bank ("FRB"), and from investment repayments and sales. Loan repayments are a relatively stable source of funds, while deposit inflows and outflows are influenced by general interest rates, money market conditions, the availability of FDIC insurance and the market perception of the Company's financial stability. Borrowings may be used on a short-term basis to compensate for reductions in normal sources of funds, such as deposit inflows at lower than projected levels. Borrowings may also be used on a longer-term basis to support expanded activities and to manage interest rate risk. Borrowing capacity and availability is influenced by interest rates, market conditions, availability of collateral and the market's perception of the Bank's financial stability.

Deposits. The Bank relies on a mix of deposit types, including business and personal checking accounts, term certificates of deposit, and other savings deposit alternatives that have no fixed term, such as money market accounts and passbook savings accounts. The Bank offers several consumer checking account products, both interest bearing and non-interest bearing and three business checking accounts, two of which target small businesses with relatively simple and straightforward banking needs and one for larger, more complex business depositors with an account that prices monthly based on the volume and type of activity. Savings and money market accounts are offered to both businesses and consumers, with interest paid after certain threshold amounts are exceeded.

The Bank's deposits are obtained primarily from residents of Washington, Oregon, Idaho, Arizona, Utah, Nevada, New Mexico, California and Texas.

Borrowings. The Bank has a credit line with the FHLB - DM for up to 45% of total assets depending on specific collateral eligibility. The Bank obtains advances from the FHLB - DM based upon the security of the FHLB capital stock it owns and certain of its loans, provided certain standards related to credit worthiness have been met. Such advances are made pursuant to several different credit programs. Each credit program has its own interest rate and range of maturities, and the FHLB - DM prescribes acceptable uses to which the advances pursuant to each program may be put, as well as limitations on the size of such advances. Depending on the program, such limitations are based either on a fixed percentage of assets or the Company's credit worthiness. FHLB advances are used to meet seasonal and other withdrawals of deposit accounts and to fund expansion of the Bank's lending.

The Bank may need to borrow funds for short periods of time to meet day-to-day financing needs. In these instances, funds are borrowed from other financial institutions or the Federal Reserve Bank, for periods generally ranging from one to seven days at the then current borrowing rate. The Bank also elected to utilize the FRB's Bank Term Funding Program (the "BTFP") to leverage its highly favorable terms to fortify the Bank's liquidity position. These borrowings are repayable at any time without penalty and were the lowest cost funding source available. The Federal Reserve ceased making new BTFP loans on March 11, 2024.

The Bank also participates in the FRB of San Francisco Borrower-in-Custody program which collateralizes primary credit borrowings and serves as a backstop for the FHLB - DM credit line. Due to differing program requirements between the FHLB - DM and FRB of San Francisco, participating in both increases the amount of eligible collateral that may be pledged in support of contingent liquidity needs.

The Bank Merger provided a credit line with the Federal Home Loan Bank of San Francisco (FHLB - SF) in support of LBC borrowings from the FHLB - SF, but the Bank is unable to take down new advances against this line as a bank is not allowed to belong to more than one FHLB. The FHLB - SF credit line is secured by a line-item pledge of single-family residential mortgages that are specifically identified.

For further information on these activities, see [Note L to the Consolidated Financial Statements in "Item 8. Financial Statements and Supplementary Data"](#) of this report.

Subsidiaries

The Company is a bank holding company that conducts its primary business through its wholly-owned subsidiary, WaFd Bank. The Bank has three active wholly-owned subsidiaries, discussed further below.

WAFD Insurance Group, Inc. is incorporated under the laws of the state of Washington and is an insurance agency that offers a full line of individual and business insurance policies to customers of the Bank, as well as to the general public. As of September 30, 2024 and September 30, 2023, WAFD Insurance Group, Inc. had total assets of \$23,174,000 and \$20,229,000, respectively.

Statewide Mortgage Services Company is incorporated under the laws of the state of Washington and it holds and markets real estate owned. As of September 30, 2024 and September 30, 2023, Statewide Mortgage Services Company had total assets of \$2,506,000 and \$785,000, respectively.

Washington Services, Inc. is incorporated under the laws of the state of Washington. It acts as a trustee under deeds of trust as to which the Bank is beneficiary. As of both September 30, 2024 and September 30, 2023, Washington Services, Inc. had total assets of \$13,000.

Human Capital

At WaFd Bank, our culture is defined by our corporate values of integrity, teamwork, ownership, simplicity, service and discipline. We value our employees by investing in a healthy work-life balance, competitive compensation and benefit packages and a vibrant, team-oriented environment centered on professional service and open communication amongst employees. We strive to build and maintain a high-performing culture and be an “employer of choice” by creating a work environment that attracts and retains outstanding, engaged employees who embody our company mantra of “Love what you do. Make a difference.”

Demographics. As of September 30, 2024, we employed 2,208 full and part time employees. None of these employees are represented by a collective bargaining agreement. During fiscal year 2024 we hired 421 employees. Our voluntary turnover rate was 15.80% in fiscal year 2024, a slight increase from 15.54% in 2023.

Diversity, Equity and Inclusion. We strive toward having a powerful and diverse team of employees, knowing we are better together with our combined wisdom and intellect. With a commitment to equity, inclusion and workplace diversity, we focus on understanding, accepting, and valuing the differences between people. To accomplish this, we have established Diversity & Inclusion Advisory Councils in each of our regions made up of a diverse group of employee representatives throughout our footprint. We show our commitment to equal employment opportunity through, among other things, our process of performing annual compensation analyses and ongoing reviews of our selection and hiring practices alongside a continued focus on building and maintaining a diverse workforce.

As of September 30, 2024, the population of our workforce was as follows:

Headcount by Gender/Ethnicity 2024

Head Count by Age Band FY2024

Learning and Development. We invest in the growth and development of our employees by providing a multi-dimensional approach to learning that empowers, intellectually grows, and professionally develops our colleagues. Our employees, including leadership, receive continuing education courses that are relevant to the banking industry and their job function within the Company. All new employees attend our two-day new hire orientation, Welcome to WaFd. In addition, we offer our Education Tuition Assistance Program, designed to encourage an employee's advancement and growth. We also offer the Retail Bank Peer Mentor Program and retail banking certifications for our retail employees. These resources provide employees with the skills they need to achieve their career goals, build management skills and become leaders within our Company.

Compensation and Benefits. We provide a competitive compensation and benefits program to help meet the needs of our employees. In addition to salaries, these programs include annual bonuses, stock awards, a 401(k) Plan with an employer matching contribution in addition to an employer annual contribution, healthcare and insurance benefits, health savings, flexible spending accounts, paid time off, family leave and an employee assistance program.

Workplace Safety & Wellness. We prioritize the importance of our employees' health and the health of their families. We offer healthcare plans where the Company pays a significant portion of the monthly premiums for employees and their children. Our benefits program also includes a Health Savings Account ("HSA") option in addition to Flexible Spending Accounts ("FSA"). We believe maintaining a competitive benefits program is a sound investment in attracting newcomers and retaining loyal, dedicated and enthusiastic colleagues. Benefits we offer to employees include:

- Health insurance including dental & vision.
- Flexible spending plans for healthcare and childcare expenses.
- Employer-paid life insurance & accidental death and dismemberment coverage.
- Long-term disability insurance.
- Employee assistance program to provide access to counseling and support well-being.

Corporate Social and Environmental Responsibility

We recognize the social and environmental responsibility that arises from the impact of our activities on peoples' lives and our community. The Company's Corporate and Social Environmental Policy integrates social, environmental and ethical concerns into our daily business activities and our approach to stakeholder relationships. Through this policy, we strive to carry out our banking activities in a responsible manner, placing the financial needs of our clients and economic health of our communities at the core of our focus. Below is a summary of our community activities and financial contributions in 2024.

WaFd Bank in the Community

Love what you do. Make a Difference.

Additional information will be provided in the Company's forthcoming 2024 Community and Social Responsibility Report which will be made available on the Company's website. Nothing on our website, including the aforementioned report, shall be deemed incorporated by reference into this Annual Report.

The Company

General. The Company is registered as a bank holding company and is subject to regulation, examination, supervision and reporting requirements of the Federal Reserve Bank.

Regulation. The Company operates in a highly regulated industry. The regulatory structure governing the Company's operations is designed primarily for the protection of the deposit insurance funds and consumers, and not to benefit our shareholders. As part of this regulatory structure, the Company is subject to policies and other guidance developed by the regulatory agencies with respect to capital levels, the timing and amount of dividend payments, the classification of assets and the establishment of adequate loan loss reserves for regulatory purposes. Under this structure, regulators have broad discretion to impose restrictions and limitations on the Company's operations if they determine, among other things, that such operations are unsafe or unsound, fail to comply with applicable law or are otherwise inconsistent with laws and regulations or with the supervisory policies of these agencies.

Failure to comply with applicable laws and regulations can result in a range of sanctions and enforcement actions, including the imposition of civil money penalties, formal agreements and cease and desist orders. In order to ensure the Company's programs and operations are in compliance with regulatory requirements, the Company has and will continue to incur significant costs in order to comply in accordance with its responsibilities.

For further information on regulatory matters, see [Note A to the Consolidated Financial Statements in "Item 8. Financial Statements and Supplementary Data"](#) as well as the ["Risk Factors"](#) section of this report and the ["USA Patriot Act of 2001" discussion](#) below.

Sections below include a description of certain laws and regulations that relate to the regulation of the Company and the Bank. The description of these laws and regulations, and descriptions of laws and regulations contained elsewhere herein, do not purport to be complete and are qualified in their entirety by reference to applicable laws and regulations.

Restrictions on Activities and Acquisitions. Bank holding companies are subject to a variety of restrictions on their activities and the acquisitions they can make. Generally, the activities or acquisition of a bank holding company that is not a financial holding company are limited to those that constitute banking or managing or controlling banks or which are closely related to banking. In addition, without the prior approval of the FRB, bank holding companies are generally prohibited from acquiring more than 5% of the outstanding shares of any class of voting securities of a bank or bank holding company, taking any action that causes a bank to become a subsidiary of the bank holding company, acquiring all or substantially all of the assets of a bank, or merging with another bank holding company.

Control of Company or Bank. Pursuant to the Change in Bank Control Act, (the “CIBC Act”) individuals, corporations or other entities acquiring Company equity interests may, alone or together with other investors, be deemed to control a holding company or a bank. If an acquisition is deemed to constitute control of the holding company or bank and is not subject to approval under the Bank Holding Company Act or certain other statutes, such person or group will be required to file a notice under the CIBC Act. Generally, ownership of, or power to vote, more than 25% of any class of voting securities constitutes control. In the case of a bank or bank holding company the securities of which are registered with the Securities and Exchange Commission (“SEC”), ownership of or power to vote more than 10% of any class of voting securities creates a presumption of control.

Source of Strength. Under long-standing FRB policy, a bank holding company is expected to serve as a source of financial and management strength to its subsidiary bank. Under this policy, a bank holding company is expected to stand ready to provide adequate capital funds to its subsidiary bank during periods of financial adversity and to maintain financial flexibility and capital raising capacity to assist its subsidiary bank. The Dodd-Frank Act codified the source of strength doctrine by adopting a statutory provision requiring, among other things, that bank holding companies serve as a source of financial strength to their subsidiary banks.

Restrictions on Company Dividends. The Company’s ability to pay dividends to its shareholders is affected by several factors. Since the Company is a separate legal entity from the Bank and its subsidiaries and does not have significant operations of its own, the Company may not be able to pay dividends to its shareholders if the Bank is unable to pay dividends to the Company. The Bank’s ability to pay dividends is subject to various regulatory restrictions.

In addition, the Company’s ability to pay dividends is subject to rules and policies of the FRB. It is the policy of the Federal Reserve that bank holding companies should pay cash dividends only out of income available over the past year and only if prospective earnings retention is consistent with the company’s expected future needs and financial condition. Capital rules adopted by the Federal Reserve, effective January 2015, may limit the Company’s ability to pay dividends if the Company fails to meet certain requirements under the rules. In addition, if we do not or are unable to pay quarterly dividends on our Series A Preferred Stock, we may not pay a dividend to the holders of our Common Stock. See “Washington Federal Bank, wholly-owned operating subsidiary - Restrictions on Dividends” below.

Since the Company is a Washington state corporation, it is also subject to restrictions under Washington corporate law relating to dividends. Generally, under Washington law, a corporation may not pay a dividend if, after giving effect to the dividend, the corporation would be unable to pay its liabilities as they become due in the ordinary course of business or the corporation’s total assets would be less than the sum of its total liabilities plus (with some exceptions) the amount that would be needed, if the corporation were to be dissolved at the time of the dividend payment, to satisfy the dissolution preferences of senior equity securities.

Enterprise Risk Management. The Company faces a number of risks, including credit risk, interest rate risk, liquidity risk, operations risk, cybersecurity risk, regulatory risk, compliance and legal risk, strategic risk, and reputational risk. The Risk Management Committee of the Board (“RMC”) establishes the Company’s risk appetite and sets appropriate risk limits and policies. The RMC is responsible for providing ongoing review, guidance and oversight of the Company’s enterprise risk management function. Management is responsible for managing the Company’s risks on a day-to-day basis in accordance with the policies established by the Board.

The Company’s Chief Risk Officer (“CRO”) chairs the Enterprise Risk Management Committee (“ERMC”), a management-level committee that is responsible for executing the risk management framework adopted by the Board. The ERMC maintains enterprise-wide oversight of risk assessment, monitoring and reporting. The ERMC meets at least quarterly to identify, evaluate, monitor, and account for new, existing and emerging risks to the Company. Identified risks are evaluated, analyzed, prioritized and tracked by the ERMC in a manner to be compatible with effective internal controls, risk management practices and the policies adopted by the Board. The ERMC develops risk management programs and processes to incorporate risk considerations into day-to-day business activities across the Company’s risk categories, business lines and functions. To support the ERMC’s risk management function, certain types of risks are overseen by other management level committees. For

example, the Company's Asset Liability Committee is responsible for managing interest rate and liquidity risks and the credit administration department tracks credit risks.

On at least a quarterly basis, the Company's CRO, Chief Financial Officer, Chief Information Officer, Chief Information Security Officer, Chief Credit Officer, and other members of management report directly to the RMC to provide reporting on risk levels, key risks, emerging risks and the Company's compliance with the risk management framework, risk limits and risk appetites adopted by the RMC.

The Company carries out its risk management practices through its "three lines of defense" model, which is designed to establish effective checks and balances within its risk management framework. The first line of defense is business units and process owners within the Company which are responsible for maintaining effective internal controls and executing risk and control procedures on a day to day basis. The second line of defense is the Company's risk management, compliance and other control functions which are responsible for ensuring that the first line of defense is properly designed, in place, and operating effectively. The third line of defense is the Company's internal audit function, which provides independent assessment and assurance regarding the effectiveness of governance, risk management and internal controls.

Washington Federal Bank, wholly-owned operating subsidiary

General. The Bank is a federally-insured Washington state chartered commercial bank dba WaFd Bank. The WDFI is the Bank's primary state regulator and the FDIC is its primary federal regulatory. The Bank is a member of the FDIC and its deposits are insured up to applicable limits of the Depository Insurance Fund ("DIF"), which is administered by the FDIC.

Regulation. The WDFI and FDIC have extensive authority over the operations of the Bank. As part of this authority, the Bank is required to file periodic reports with the WDFI and FDIC and is subject to periodic examinations by the WDFI and FDIC. As a Washington State chartered commercial bank with branches in the States of Washington, Oregon, Idaho, Utah, Nevada, Arizona, New Mexico, California and Texas, the Bank is subject not only to the applicable laws and regulations of Washington State, but is also subject to the applicable laws and regulations of these other states in which it does business. Various laws and regulations prescribe the investment and lending authority of the Bank, and the Bank is prohibited from engaging in any activities not permitted by such laws and regulations. While the Bank has broad authority to engage in all types of lending activities, a variety of restrictions apply to certain other investments by the Bank.

Interstate Banking. Subject to certain limitations and restrictions, a bank holding company, with prior approval of the FRB, may acquire an out-of-state bank; banks in states that do not prohibit out-of-state mergers may merge with the approval of the appropriate federal banking agency, and a bank may establish a de novo branch out of state if such branching is permitted by the other state for state banks chartered by such other state.

Insurance of Deposit Accounts. Under the Dodd-Frank Act, the maximum amount of federal deposit insurance coverage was permanently increased from \$100,000 to \$250,000 per depositor, per institution. The Dodd-Frank Act also broadened the base for FDIC insurance assessments. Assessments are now based on the average consolidated total assets less tangible equity capital of a financial institution. In addition, the Dodd-Frank Act raised the minimum designated reserve ratio, which the FDIC is required to set each year for the DIF, to 1.35%. The Dodd-Frank Act eliminated the requirement that the FDIC pay dividends to depository institutions when the reserve ratio exceeds certain thresholds. The FDIC has established a higher reserve ratio of 2% as a long-term goal beyond what is required by statute.

Brokered Deposits. The Federal Deposit Insurance Act prohibits an insured depository institution from accepting brokered deposits or offering interest rates on any deposits significantly higher than the prevailing rate in the bank's normal market area or nationally (depending upon where the deposits are solicited), unless it is well-capitalized or is adequately capitalized and receives a waiver from the FDIC. A depository institution that is adequately capitalized and accepts brokered deposits under a waiver from the FDIC may not pay an interest rate on any deposit in excess of national and local rate caps set by the FDIC and published on its website.

Transactions with Affiliates; Insider Loans. Under current federal law, all transactions between and among a bank and its affiliates, including holding companies, are subject to Sections 23A and 23B of the Federal Reserve Act and Regulation W promulgated thereunder. Generally, these requirements limit extensions of credit and certain other such transactions by the bank to affiliates to a percentage of the institution's capital and generally such transactions must be collateralized. Generally, all affiliate transactions must be on terms at least as favorable to the bank as transactions with non-affiliates. In addition, a bank may not lend to any affiliate engaged in non-banking activities that are not permissible for a bank holding company or acquire

shares of any affiliate that is not a subsidiary. Federal law authorizes the imposition of additional restrictions on transactions with affiliates if necessary to protect the safety and soundness of a bank.

Extensions of credit by a bank to executive officers, directors and principal shareholders are subject to Section 22(h) of the Federal Reserve Act, which, among other things, generally prohibits loans to any such individual where the aggregate amount exceeds an amount equal to 15% of an institution's unimpaired capital and surplus plus an additional 10% of unimpaired capital and surplus in the case of loans that are fully secured by readily marketable collateral. Section 22(h) permits loans to directors, executive officers and principal shareholders made pursuant to a benefit or compensation program that is widely available to employees of a subject bank provided that no preference is given to any officer, director or principal shareholder, or related interest thereto, over any other employee. In addition, the aggregate amount of extensions of credit by a bank to all insiders cannot exceed the institution's unimpaired capital and surplus. Furthermore, Section 22(g) places additional restrictions on loans to executive officers.

The affiliate transaction rules in Sections 23A and 23B of the Federal Reserve Act broaden the definition of affiliate and apply these rules to securities lending, repurchase agreements and derivatives. These rules also strengthen collateral requirements and limit Federal Reserve exemptive authority. Further, the definition of "extension of credit" for transactions with executive officers, directors and principal shareholders includes credit exposure arising from a derivative transaction, a repurchase or reverse repurchase agreement or a securities lending or borrowing transaction. These provisions have not had a material effect on the Company or the Bank.

Restrictions on Dividends. The amount of dividends payable by the Bank to the Company depends upon its earnings and capital position, and is limited by federal and state laws, regulations and policies, including the capital conservation buffer requirement. Federal law further provides that no insured depository institution may make any capital distribution (which includes a cash dividend) if, after making the distribution, the institution would be "undercapitalized," as defined in the prompt corrective action regulations. Moreover, the federal bank regulatory agencies also have the general authority to limit the dividends paid by insured banks if such payments should be deemed to constitute an unsafe and unsound practice. In addition, under Washington law, no bank may declare or pay any dividend in an amount greater than its retained earnings without the prior approval of the WDFI. WDFI also has the power to require any bank to suspend the payment of any and all dividends.

Federal Home Loan Bank System. The Bank is a member of the Federal Home Loan Bank of Des Moines, which is one of 11 regional FHLBs that provide funding to their members for making home mortgage loans, as well as loans for affordable housing and community development. Each FHLB serves members within its assigned region and is funded primarily through proceeds derived from the sale of consolidated obligations of the FHLB system. Loans are made to members in accordance with the policies and procedures established by the Board of Directors of the FHLB. At September 30, 2024, total FHLB advances to the Bank amounted to \$2,192,874,000. As a member, the Bank is required to purchase and maintain stock in the FHLB of Des Moines. The Bank also acquired the stock of the FHLB San Francisco in the Merger but is not a member of this FHLB. At September 30, 2024, the Bank held \$73,910,000 in FHLB of Des Moines stock and \$21,707,000 in FHLB of San Francisco stock, which was in compliance with requirements.

Community Reinvestment Act and Fair Lending Laws. Banks have a responsibility under the Community Reinvestment Act ("CRA") and related regulations of the FDIC to help meet the credit needs of their communities, including low- and moderate-income neighborhoods. In addition, the Equal Credit Opportunity Act and the Fair Housing Act (together, the "Fair Lending Laws") prohibit lenders from discriminating in their lending practices on the basis of characteristics specified in those statutes. An institution's failure to comply with the provisions of the CRA could, at a minimum, result in regulatory restrictions on its activities. Failure to comply with the Fair Lending Laws could result in enforcement actions by the FDIC, the CFPB and other federal regulatory agencies, including the U.S. Department of Justice.

USA Patriot Act of 2001. The USA PATRIOT Act of 2001 ("Patriot Act"), through amendments to the federal Bank Secrecy Act ("BSA"), substantially broadened the scope of United States anti money-laundering laws and regulations by imposing significant new compliance and due diligence obligations, creating new crimes and penalties and expanding the extra-territorial scope of United States jurisdiction. The United States Treasury Department has issued a number of regulations under the Patriot Act that apply to financial institutions such as the Bank. These regulations impose obligations on financial institutions to maintain appropriate policies, procedures and controls to detect, prevent and report money laundering and terrorist financing and to verify the identity of their customers. Failure of a financial institution to maintain and implement adequate risk-based programs reasonably designed to combat money laundering and terrorist financing, or to comply satisfactorily with all relevant Patriot Act and BSA requirements, could have serious legal and reputational consequences for the institution.

Anti-Money Laundering Act of 2020. The Anti-Money Laundering Act of 2020 ("AML Act") was enacted as part of the National Defense Authorization Act and requires the U.S. Treasury Department to issue National Anti-Money Laundering and

Countering the Financing of Terrorism Priorities ("AML/CFT"), which occurred in June 2021. The AML Act also includes a requirement to conduct studies and issue regulations that may alter some of the due diligence, recordkeeping and reporting requirements that the BSA and Patriot Act impose on financial institutions. The AML Act also promotes increased information-sharing and use of technology and increases penalties for violations of the BSA and includes whistleblower incentives, both of which could increase the prospect of regulatory enforcement.

Regulatory Capital Requirements. Bank holding companies and federally insured banks are required to maintain minimum levels of regulatory capital. The Federal Reserve establishes capital standards applicable to all bank holding companies, and the WDFI and FDIC establish capital standards applicable to Washington state chartered, non-member banks. The capital rules reflect, in part, certain standards initially adopted by the Basel Committee on Banking Supervision in December 2010 (which standards are commonly referred to as "Basel III") as well as requirements contemplated by the Dodd-Frank Act.

The capital rules require a capital ratio of common equity Tier 1 capital to risk based assets. Common equity Tier 1 capital generally consists of retained earnings and common stock instruments (subject to certain adjustments) as well as accumulated other comprehensive income ("AOCI") except to the extent that the Company and the Bank exercise a one-time irrevocable option to exclude certain components of AOCI, which the Company and the Bank have done. Tier 1 capital also includes non-cumulative perpetual preferred stock and limited amounts of minority interests. Regulatory deductions from capital include goodwill and intangible assets. The capital rules prescribe the manner in which certain capital elements are determined, including but not limited to, requiring certain deductions related to mortgage servicing rights and deferred tax assets. Total capital consists of Tier 1 capital and supplementary capital. Supplementary capital consists of certain capital instruments that do not qualify as core capital as well as general valuation loan and lease loss allowances up to a maximum of 1.25% of risk-weighted assets. Supplementary capital may be used to satisfy the risk-based requirement only in an amount equal to the amount of Tier 1 capital.

In determining the required amount of risk-based capital, total assets, including certain off-balance-sheet items, are multiplied by a risk-weight factor based on the risks inherent in the type of assets held by an institution. The risk categories range from 0% for low-risk assets such as U.S. Treasury securities and GNMA securities to 1,250% for various types of loans and other assets deemed to be of higher risk. Single-family residential loans having loan-to-value ratios not exceeding 90% and meeting certain additional criteria, as well as certain multi-family residential loans, qualify for a 50% risk-weight treatment. The book value of each asset is multiplied by the risk factor applicable to the asset category, and the sum of the products of this calculation equals total risk-weighted assets. The rules set forth the methods of calculating certain risk-based assets, which in turn affects the calculation of risk-based ratios. Higher or more sensitive risk weights are assigned to various categories of assets, among which are commercial real estate, credit facilities that finance the acquisition, development or construction of real property, certain exposures or credit that are 90 days past due or are non-accrual, foreign exposures, certain corporate exposures, securitization exposures, equity exposures and in certain cases mortgage servicing rights and deferred tax assets.

Both the Company and the Bank are required to have a common equity Tier 1 capital ratio of 4.5%. In addition, both the Company and the Bank are required to have a Tier 1 leverage ratio of 4.0%, a Tier 1 risk-based ratio of 6.0% and a total risk-based ratio of 8.0%. Both the Company and the Bank are required to establish a "conservation buffer," consisting of common equity Tier 1 capital, equal to 2.5%. The capital conservation buffer is designed to ensure that banks build up capital buffers outside periods of stress, which can be drawn down as losses are incurred. An institution that does not meet the conservation buffer will be subject to restrictions on certain activities including payment of dividends, stock repurchases and discretionary bonuses to executive officers.

The Federal Reserve and the FDIC are also authorized to impose capital requirements in excess of these standards on individual institutions on a case-by-case basis. Management believes that the current capital levels of the Company and the Bank are sufficient to be in compliance with the fully phased-in standards under the rules.

Any bank holding company or bank that fails to meet the capital requirements is subject to possible enforcement actions. Such actions could include a capital directive, a cease and desist or consent order, civil money penalties, restrictions on an institution's operations and/or the appointment of a conservator or receiver. FRB, FDIC and WDFI capital regulations provide that such supervisory actions, through enforcement proceedings or otherwise, could require one or more of a variety of corrective actions.

For information regarding compliance with each of these capital requirements by the Company and the Bank as of September 30, 2024, see Note R to the Consolidated Financial Statements included in Item 8 hereof.

Prompt Corrective Action. Federal statutes establish a supervisory framework based on five capital categories: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized. An institution's category depends upon its capital levels in relation to relevant capital measures, which include a risk-based capital measure, a leverage ratio capital measure and certain other factors. The federal banking agencies have adopted regulations that implement this statutory framework.

The prompt corrective action rules, which apply to the Bank but not the Company, are modified to include a common equity Tier 1 risk-based ratio and to increase certain other capital requirements for the various thresholds. For example, the requirements for the Bank to be considered well-capitalized under the rules are a 5.0% Tier 1 leverage ratio, a 6.5% common equity Tier 1 risk-based ratio, an 8.0% Tier 1 risk-based capital ratio and a 10.0% total risk-based capital ratio. To be adequately capitalized, those ratios are 4.0%, 4.5%, 6.0% and 8.0%, respectively.

An institution that is not well capitalized is subject to certain restrictions on brokered deposits, including restrictions on the rates it can offer on its deposits, generally. Any institution that is neither well capitalized nor adequately capitalized is considered undercapitalized. Federal law authorizes the FDIC to reclassify a well-capitalized institution as adequately capitalized and may require an adequately capitalized institution or an undercapitalized institution to comply with supervisory actions as if it were in the next lower category. The FDIC may not reclassify a significantly undercapitalized institution as critically undercapitalized. As of September 30, 2024, the Bank exceeded the requirements of a well-capitalized institution.

Dodd-Frank Act Stress Tests ("DFAST"). On July 6, 2018, bank regulatory agencies (the FRB, FDIC and the Office of the Comptroller of the Currency) issued a joint interagency statement regarding the impact of the Economic Growth, Regulatory Relief, and Consumer Protection Act ("EGRRCPA") on financial institutions. The EGRRCPA gave immediate relief from stress testing for applicable bank holding companies but not financial institutions until November 25, 2019. Pursuant to direction from the Bank's regulators, the Bank was provided similar relief and is no longer required to submit company-run annual stress tests. Notwithstanding these amendments to the stress testing requirements, the federal banking agencies indicated through interagency guidance that the capital planning and risk management practices of institutions with total assets less than \$100 billion would continue to be reviewed through the regular supervisory process. Although the Bank will continue to monitor its capital consistent with the safety and soundness expectations of the federal regulators, the Bank will no longer conduct company-run stress testing as a result of the legislative and regulatory amendments. The Bank continues to use customized stress testing to support the business and as part of its risk management and capital planning process.

EGRRCPA also enacted several important changes in some technical compliance areas that we believe will help reduce our regulatory burden, including:

- Prohibiting federal banking regulators from imposing higher capital standards on High Volatility Commercial Real Estate ("HVCRE") exposures unless they are for acquisition, development or construction ("ADC"), and clarifying ADC status;
- Exempting from appraisal requirements certain transactions involving real property in rural areas and valued at less than \$400,000; and
- Directing the Consumer Financial Protection Bureau to provide guidance on the applicability of the Truth in Lending and Real Estate Settlement Procedures Act Integrated Disclosure rule to mortgage assumption transactions and construction-to-permanent home loans, as well the extent to which lenders can rely on model disclosures that do not reflect recent regulatory changes.

Despite the improvements for mid-size financial institutions such as the Company that has resulted from EGRRCPA, many provisions of the Dodd-Frank Act and its implementing regulations remain in place and will continue to result in additional operating and compliance costs that could have a material adverse effect on our business, financial condition, and results of operation. In addition, the EGRRCPA requires the enactment of a number of implementing regulations, the details of which may have a material effect on the ultimate impact of the law.

Cybersecurity. The federal banking agencies have established certain expectations with respect to an institution's information security and cybersecurity programs, with an increasing focus on risk management, processes related to information technology and operational resiliency, and the use of third parties in the provision of financial services. In January 2020, the federal banking agencies jointly issued a statement reminding supervised financial institutions of sound cybersecurity risk management principles that expanded on areas articulated in the Interagency Guidelines Establishing Information Security Standards written in Section 39 of the Federal Deposit Insurance Act and Sections 501 and 505(b) of the Gramm-Leach-Bliley Act.

State regulators have also been increasingly active in implementing privacy and cybersecurity standards and regulations. Recently, several states have adopted regulations requiring certain financial institutions to implement cybersecurity programs and providing detailed requirements with respect to these programs, including data encryption requirements. Many states have also recently implemented or modified their data breach notification and data privacy requirements. We expect this trend of state-level activity in those areas to continue and are continually monitoring developments in the states in which the Company operates.

In November 2021, the U.S. federal bank regulatory agencies adopted a rule regarding notification requirements for banking organizations related to significant computer security incidents. Under the final rule, a bank holding company, such as the Company, and an FDIC-supervised insured depository institution, such as the Bank, are required to notify the Federal Reserve or FDIC, respectively, within 36 hours of incidents that have materially disrupted or degraded, or are reasonably likely to materially disrupt or degrade, the banking organization's ability to deliver services to a material portion of its customer base, jeopardize the viability of key operations of the banking organization, or impact the stability of the financial sector. Service providers are required under the rule to notify any affected bank client it provides services to as soon as possible when it determines it has experienced a computer-security incident that has materially disrupted or degraded, or is reasonably likely to materially disrupt or degrade, covered services provided by that entity to the Bank for four or more hours.

See [Item 1C - Cybersecurity](#), for additional disclosures regarding the Company's cybersecurity risk management, strategy and governance.

Financial Privacy. Under the Gramm-Leach-Bliley Act of 1999, as amended, a financial institution may not disclose non-public personal information about a consumer to unaffiliated third parties unless the institution satisfies various disclosure requirements and the consumer has not elected to opt out of the information sharing. The financial institution must provide its customers with a notice of its privacy policies and practices. The Federal Reserve, the FDIC, and other financial regulatory agencies issued regulations implementing notice requirements and restrictions on a financial institution's ability to disclose non-public personal information about consumers to unaffiliated third parties.

In addition, privacy and data protection are areas of increasing state legislative focus, and several states have recently enacted consumer privacy laws that impose significant compliance obligations with respect to personal information. For example, the Company is subject to the California Consumer Privacy Act ("CCPA") and its implementing regulations. The CCPA gives consumers the right to request disclosure of information collected about them, and whether that information has been sold or shared with others, the right to request deletion of personal information (subject to certain exceptions), the right to opt out of the sale of the consumer's personal information, and the right not to be discriminated against for exercising these rights. The CCPA contains several exemptions, including an exemption applicable to information that is collected, processed, sold, or disclosed pursuant to the Gramm-Leach-Bliley Act of 1999, as amended. In November 2020, voters in the state of California approved the California Privacy Rights Act ("CPRA"), a ballot measure that amends and supplements the substantive requirements of the CCPA by, among other things, expanding certain rights relating to personal information and its use, collection, and disclosure by covered businesses and providing certain mechanisms for administration and enforcement of the statute by creating the California Privacy Protection Agency, a watchdog privacy agency. Similar laws may in the future be adopted by other states where the Company does business. The Company has made and will make operational adjustments in accordance with the requirements of the CCPA and other state privacy laws.

Furthermore, privacy and data protection areas are expected to receive further attention at the federal level. Congress and federal regulatory agencies are considering similar laws or regulations that could create new individual privacy rights and impose increased obligations on companies handling personal data. On April 1, 2022, the federal banking agencies' new rule became effective, providing for new notification requirements for banking organizations and their service providers for significant cybersecurity incidents. Specifically, the new rule requires banking organizations to notify their primary federal regulator as soon as possible, and no later than 36 hours after, the discovery of a computer-security incident that rises to the level of a notification incident as defined by the rule. Notification is required for incidents that have materially affected or are reasonably likely to materially affect the viability of a banking organization's operations, its ability to deliver banking products and services, or the stability of the financial sector. Service providers are required under the rule to notify any affected bank to which it provides services as soon as possible when it determines it has experienced a computer-security incident that has materially disrupted or degraded, or is reasonably likely to materially disrupt or degrade, covered services provided by that entity to the bank for four or more hours. The potential effects of state or federal privacy and data protection laws on the Company's business cannot be determined at this time and will depend both on whether such laws are adopted by states in which the Company does business and/or at the federal level and the requirements imposed by any such laws.

Taxation

In addition to federal income tax, the Company is also subject to income, franchise, excise or gross receipts tax in states (and some cities) where the Company has branches or is deemed to have sufficient nexus for tax purposes. The Company generally files consolidated federal and state income tax returns with its subsidiaries.

The Company's federal income tax returns are open and subject to potential examination by the IRS for fiscal year 2021 and later.

Competition

We operate in a highly competitive environment. Our competitors include other banks, savings associations, community banks, credit unions, fintech companies and other financial intermediaries, and new market participants offering services similar to those that we offer. We compete with some competitors within our geographic market area, and with others on a product specific basis, such as the residential mortgage market. Our ability to compete effectively depends on our ability to provide first-rate, friendly and professional customer service and deliver the banking solutions that our customers want and need. We are also dependent upon our ability to attract and retain employees while managing compensation and other costs.

Availability of Financial Data

Under the Securities Exchange Act of 1934 ("Exchange Act"), the Company is required to file annual, quarterly and current reports, proxy statements and other information with the SEC. We file reports on Forms 10-K, 10-Q and 8-K, and amendments to those reports, with the SEC. The public may obtain copies of these reports at the SEC's website: www.sec.gov.

The Company has adopted and posted on its website a code of ethics that applies to its senior financial officers. The Company's website also includes the charters for its audit committee, compensation committee, risk management committee, executive committee, technology committee and nominating and governance committee.

The address for the Company's website is www.wafdbank.com. The Company makes available on its website, free of charge, its annual reports on Form 10-K, current quarterly reports on Form 10-Q, reports on Form 8-K, proxy statements and any amendments to those reports (among others), as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission (SEC). We also make available on our website public financial information for which a report is not required to be filed with or furnished to the SEC. Our SEC reports and such other information can be accessed through the investor relations section of our website (<https://www.wafdbank.com/about-us/investor-relations>). The Company's website provides a link to all our filings on the SEC's Edgar website, and the company will provide a printed copy of any of our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements and any amendments to those reports (among others) to any requesting shareholder, free of charge. The information found on our website is not part of this or any other report that we file or furnish to the SEC.

Item 1A. Risk Factors

Ownership of our Common Stock involves risk. Investors should carefully consider, in addition to the other information included in this Annual Report on Form 10-K, the following risk factors. The risks described below may adversely affect our business, financial condition and results of operations. These risks are not the only risks we face; additional risks and uncertainties not currently known or that are currently considered to be immaterial may also materially and adversely affect our business.

Operational Risks

Fluctuating interest rates could adversely affect our business.

Significant increases in market interest rates on loans, or the perception that an increase may occur, could adversely affect both our ability to originate new loans and our ability to grow. Beginning early in 2022, in response to growing signs of inflation, the Federal Reserve Bank increased interest rates rapidly, causing the federal funds rate to reach a 22-year high. Although the FRB reduced its benchmark rates in September 2024, the inflationary outlook in the United States is currently uncertain. Rapid changes in interest rates make it difficult for the Bank to balance its loan and deposit portfolios, which may adversely affect our results of operations by, for example, reducing asset yields or spreads, creating operating and system issues, or having other adverse impacts on our business. Persistent inflation could lead to higher interest rates, which could, in turn, increase the borrowing costs of our customers, making it more difficult for them to repay their loans or other obligations. High interest rates could also push down asset prices and weaken economic activity.

Further, our profitability is dependent to a large extent upon net interest income, which is the difference (or “spread”) between the interest earned on loans, securities and other interest-earning assets and the interest paid on deposits, borrowings, and other interest-bearing liabilities. The level of net interest income is a function of the average balances of interest-earning assets and interest-bearing liabilities and the spread between the amounts of the yield on such assets and the cost of such liabilities. These factors are influenced by both the pricing and the mix of interest-earning assets and interest-bearing liabilities which, in turn, are impacted by such external factors as the local economy, competition for loans and deposits, the monetary policy of the Federal Open Market Committee of the Federal Reserve Board of Governors (the “FOMC”) and market interest rates. Furthermore, movements in interest rates, the pace at which such movements occur and the volume and mix of our interest-bearing assets and liabilities influence the level of net interest income. The cost of customer deposits is largely based on short-term interest rates, the level of which is driven by the FOMC. However, the yields generated by long-term loans, such as single-family residential and multifamily mortgage loans, and securities are typically driven by longer-term (10 year) interest rates, which are set by the market and vary from day to day.

As a result of the interest rate increases experienced in 2022 and 2023, our interest expense on both deposits and borrowings increased significantly. Because of the differences in maturities and repricing characteristics of our interest-earning assets and interest-bearing liabilities, changes in interest rates do not produce equivalent changes in interest income earned on interest-earning assets and interest paid on interest-bearing liabilities. Accordingly, fluctuations in interest rates could adversely affect our interest rate spread, and, in turn, our profitability. For example, if the interest rates on interest-bearing liabilities increase at a faster pace than the interest rates on interest-earning assets, the result could be a reduction in our net interest income and with it, a reduction in earnings. The same could be true if interest rates on interest-earning assets decline faster than the rates on interest-bearing liabilities. Net interest income and earnings would be similarly impacted if the interest rates on interest-earning assets decline more quickly than the interest rates on interest-bearing liabilities. In addition, changes in interest rates could affect the Bank’s ability to originate loans and attract and retain deposits; the fair values of its securities and other financial assets; the fair values of its liabilities; and the average lives of its loan and securities portfolios. Additionally, decreases in interest rates could lead to increased loan refinancing activity, which, in turn, would alter the balance of our interest-earning assets and impact net interest income. Increases in interest rates could reduce loan refinancing activity, which could result in compression of the spread between loan yields and more quickly rising funding rates. We may also be exposed to movements in market rates to a degree not experienced by other financial institutions, as a result of our significant portfolio of fixed-rate single-family home loans, which are longer-term in nature than the customer accounts and borrowed money that constitute our liabilities.

We are currently anticipating that there will be further decreases in the target federal funds rate in 2025 but the inflationary outlook remains uncertain. However, if interest rates do not decrease, or if the Federal Reserve were to rapidly increase the target federal funds rate, the increase in rates could continue to constrain our interest rate spread and may adversely affect our business forecasts. On the other hand, decreases in interest rates, may result in a change in the mix of noninterest and interest-bearing accounts. We are unable to predict changes in interest rates, which are affected by factors beyond our control, including inflation, deflation, recession, unemployment, money supply and other changes in financial markets.

We are exposed to risks related to fraud and cyber-attacks.

Cybersecurity, and the continued development and enhancement of controls, processes, and practices designed to protect customer information, systems, computers, software, data, and networks from attack, damage, or unauthorized access remain a priority for the Company. As cybersecurity threats continue to evolve, we may be required to expend additional resources to continue to enhance, modify, and refine our protective measures against these evolving threats.

We are continuously enhancing and expanding our digital products and services to meet customer and business needs with desired outcomes. These digital products and services often include storing, transmitting, and processing confidential customer, employee, financial, and business information. Due to the nature of this information, and the value it has for internal and external threat actors, we, and our third-party service providers, continue to be subject to cyber-attacks and fraud activity that attempts to gain unauthorized access, misuse information and information systems, steal information, disrupt or degrade information systems, spread malicious software, and other illegal activities.

We believe we have robust preventive, detective, and administrative safeguards and security controls to minimize the probability and magnitude of a material event. However, if we are unable to maintain them, we may fall victim to a material adverse cybersecurity event. Because the tactics and techniques used by threat actors to bypass safeguards and security controls change frequently, and often are not recognized until after an event has occurred, we may be unable to anticipate future tactics and techniques, or to implement adequate and timely protective measures.

We are subject to additional risk with respect to third-party vendors that process or handle personal and financial data of our customers, partners, suppliers or employees. These third-party vendors may themselves use other vendors to store or process our data, which further elevates our risk exposure. Our third-party vendors have been, and may in the future be, subject to security incidents, including those caused by computer viruses, malware, ransomware, phishing attempts, social engineering, hacking or other means of unauthorized access. Control failures of security measures managed by our third-party service providers could cause us to suffer damage to our reputation and could require us to incur substantial expenses, which could have a materially adverse effect on our business, financial condition, and results of operations.

To date, we have no knowledge of a material cyber-attack or other material information security incident affecting the systems we operate and control. However, our risk and exposure to these matters remains heightened because of, among other things, the evolving nature of these threats, the continuation of a remote or hybrid work environment for our employees and service providers, and our plans to continue to implement and expand digital banking services, expand operations, and use third-party information systems that includes cloud-based infrastructure, platforms, and software. Recent instances of attacks specifically targeting banks and financial services businesses indicate that the risk to our systems remains significant. We, and our third-party providers, are regularly the subject of attempted attacks and the ability of the attackers and the method of their attacks continues to grow in sophistication. Threat actors, including nation state attackers, could also use artificial intelligence for malicious purposes, increasing the frequency and complexity of their attacks. Potential threats to our technologies, systems, networks, and other devices, as well as those of our employees, third party vendors, and other third parties with whom we interact, include Distributed Denial of Service ("DDoS") attacks, computer viruses, hacking, malware, ransomware, credential stuffing, phishing, and other forms of social engineering. Such cyber-attacks and other security incidents are designed to lead to various harmful outcomes, such as unauthorized transactions against our customers' accounts, unauthorized or unintended access to confidential information, or the release, gathering, monitoring, disclosure, loss, destruction, corruption, disablement, encryption, misuse, modification or other processing of confidential or sensitive information (including personal information), intellectual property, software, methodologies or business secrets, disruption, sabotage or degradation of service, systems or networks, or other damage. These threats may derive from, among other things, error, fraud or malice on the part of our employees, insiders, or third parties or may result from accidental technological failure. Any of these parties may also attempt to fraudulently induce employees, service providers, customers, partners or other third-party users of our systems or networks to disclose confidential or sensitive information (including personal information) in order to gain access to our systems, networks or data or that of our customers, partners, or third parties with whom we interact, or to unlawfully obtain monetary benefit through misdirected or otherwise improper payment. A cyber-attack or other security incident on the systems we operate and control could cause us to suffer damage to our reputation, result in productivity losses, require us to incur substantial expenses, including response costs associated with investigation and resumption of services, remediation expenses costs associated with customer notification and credit monitoring services, increased insurance premiums, regulatory penalties and fines, and costs associated with civil litigation, any of which could have a materially adverse effect on our business, financial condition, and results of operations.

We also face additional costs when our customers become the victims of cyber-attacks. For example, various retailers have reported that they have been the victims of a cyber-attack in which large amounts of their customers' data, including debit and credit card information, is obtained. Our customers may be the victims of phishing scams, providing cyber criminals access to their accounts, or credit or debit card information. In these situations, we incur costs to replace compromised cards and address fraudulent transaction activity affecting our customers, as well as potential increases to insurance premiums for policies we may maintain to cover these losses.

Both internal and external fraud and theft are risks. If confidential customer, employee, monetary, or business information were to be mishandled or misused, we could suffer significant regulatory consequences, reputational damage, and financial loss. Such mishandling or misuse could include, for example, if such information were erroneously provided to parties who are not permitted to have the information, either by fault of our systems, employees, or counterparties, or if such information were to be intercepted or otherwise inappropriately taken by third parties, or if our own employees abused their access to financial systems to commit fraud against our customers and the Company. These activities can occur in connection with activities such as the origination of loans and lines of credit, ACH transactions, wire transactions, ATM transactions, and checking transactions, and result in financial losses as well as reputational damage.

Operational errors can include information system misconfiguration, clerical or record-keeping errors, or disruptions from faulty or disabled computer or telecommunications systems. Because the nature of the financial services business involves a high volume of transactions, certain errors, which may be automated or manual, may be repeated or compounded before they are discovered and successfully rectified. Because of the Company's large transaction volume and its necessary dependence upon automated systems to record and process these transactions, there is a risk that technical flaws, tampering, or manipulation of those automated systems, arising from events wholly or partially beyond its control, may give rise to disruption of service to customers and to financial loss or liability.

The occurrence of any of these risks could result in a diminished ability for us to operate our business, additional costs to correct defects, potential liability to clients, reputational damage, and regulatory intervention, any of which could adversely affect our business, financial condition and results of operations.

Inflationary pressures and rising prices may affect our results of operations and financial condition.

Inflation rates moved closer to the FRB's target rate in 2024, but remained somewhat elevated and as of September 2024, above the FRB's target of 2%. The inflation experienced in 2022 and 2023 has led to increased costs to our customers, making it more difficult for them to repay their loans or other obligations increasing our credit risk. The inflationary outlook in the United States is currently uncertain. If inflationary pressures do not subside, sustained higher interest rates by the Federal Reserve may be needed to tame persistent inflationary price pressures, which could push down asset prices and weaken economic activity. A deterioration in economic conditions in the United States and our markets could result in a further increase in loan delinquencies and non-performing assets, decreases in loan collateral values and a decrease in demand for our products and services, all of which, in turn, would adversely affect our business, financial condition and results of operations.

Integrating Luther Burbank with the Company may prove more difficult, costly or time consuming than expected, and the anticipated benefits and cost savings of the Merger may not be realized.

On March 1, 2024, the Company closed the Merger with Luther Burbank. The Merger involves the integration of two companies that have previously operated independently and with different business models. The ultimate success of the Merger will depend, in part, on our ability to realize the anticipated cost savings from combining the businesses of WaFd and Luther Burbank. To realize the anticipated benefits and cost savings from the Merger, we must successfully integrate Luther Burbank's operations with ours in a manner that permits those cost savings to be realized, without adversely affecting current revenues and future growth. If the integration is more costly than projected, the anticipated benefits of the Merger may not be realized fully or at all or may take longer to realize than expected. While we have realized 45% in annualized cost-savings due to the merger as of September 30, 2024, exceeding the original 25% target, an inability to maintain the full extent of these cost savings following the Merger, as well as any delays encountered in the integration process, could have an adverse effect upon the revenues, levels of expenses and operating results of the combined company, which may adversely affect the value of our Common Stock. It is possible that the integration process could result in the loss of key employees, the disruption of each company's ongoing businesses or inconsistencies in standards, controls, procedures, and policies that adversely affect the companies' ability to maintain relationships with clients, customers, depositors, and employees or to achieve the anticipated benefits and cost savings of the Merger. Integration efforts between the companies may also divert management attention and resources. These integration matters could have an adverse effect on the combined company for an undetermined period after completion of the Merger.

Current uncertain economic conditions pose challenges, and could adversely affect our business, financial condition and results of operations.

We are operating in an uncertain economic environment. The pandemic caused a global economic slowdown, and while we have seen some economic recovery, continuing supply chain issues, labor shortages and inflation risks continue to affect the economic recovery. U.S. debt ceiling and budget deficit concerns have increased the possibility of additional credit-rating downgrades and economic slowdowns, or a recession in the United States. There remain increased risks of a government shutdown if the spending bills necessary to fund the government through the fiscal year that ends September 30, 2025 are not

passed by Congress. Future deterioration in the U.S. credit and financial markets could result in losses or significant deterioration in the fair value of our U.S. government issued, sponsored or guaranteed investments. At September 30, 2024, we had \$2.2 billion invested in U.S. government and agency obligations, and further downgrades could affect the stability of securities issued or guaranteed by the federal government and the valuation or liquidity of our portfolio of such investment securities.

Economic uncertainty, or a recessionary or stagnant economy, could result in financial stress on the Bank's borrowers, which could adversely affect our business, financial condition and results of operations. Deteriorating conditions in the regional economies we serve, or in certain sectors of those economies, in excess of the reasonable and supportable forecasts we used to estimate credit losses, could drive losses beyond that which is provided for in our allowance for loan losses. We could also face the following risks in connection with the following events:

- Market developments and economic stagnation or slowdown may affect consumer confidence levels and may cause adverse changes in payment patterns, resulting in increased delinquencies and default rates on loans and other credit facilities.
- The processes we use to estimate the allowance for credit losses and other reserves may prove to be unreliable. Such estimates rely upon complex modeling inputs and judgments, including forecasts of economic conditions, which may be rendered inaccurate and/or no longer subject to accurate forecasting.
- Our ability to assess the creditworthiness of our borrowers may be impaired if the models and approaches we use to select, manage, and underwrite loans become less predictive of future charge-offs.
- Regulatory scrutiny of the industry could increase, leading to increased regulation of the industry that could lead to a higher cost of compliance, limit our ability to pursue business opportunities and increase our exposure to litigation or fines.
- Ineffective monetary policy or other market conditions could cause rapid changes in interest rates and asset values that would have a materially adverse impact on our profitability and overall financial condition.
- Further erosion in the fiscal condition of the U.S. Treasury could lead to new taxes that would limit our ability to pursue growth and return profits to shareholders.

If these conditions or similar ones continue to exist or worsen, we could experience continuing or increased adverse effects on our financial condition.

Changes to monetary policy by the Federal Reserve could adversely impact our results of operations.

The Federal Reserve is responsible for regulating the supply of money in the United States, including open market operations used to stabilize prices in times of economic stress, as well as setting monetary policies. These activities strongly influence our rate of return on certain investments, our hedge effectiveness for mortgage servicing and our mortgage origination pipeline, as well as our costs of funds for lending and investing, all of which may adversely impact our liquidity, results of operations, financial condition and capital position.

Unstable global economic conditions may have serious adverse consequences on our business, financial condition, and operations.

The global credit and financial markets have from time-to-time experienced extreme volatility and disruptions, including severely diminished liquidity and credit availability, declines in consumer confidence, declines in economic growth, increases in unemployment rates, high rates of inflation, and uncertainty about economic stability. Changes in trade policies by the United States or other countries, such as tariffs or retaliatory tariffs, may cause inflation which could impact the prices of products sold by our borrowers and have the potential to reduce demand for their products impacting their profitability and making it difficult for our borrowers to repay their loans. The financial markets and the global economy may also be adversely affected by the current or anticipated impact of military conflict, including the conflict between Russia and Ukraine, and the evolving conflict in the Middle East. These events have increased and are expected to continue to increase volatility in commodity and energy prices, including oil, and continuing hostilities raise the possibility of supply disruptions. Rising tensions and global instability have the potential to affect consumer confidence in the U.S. and abroad, therefore having a broader effect on financial markets. Changes in trade policies or sanctions imposed by the United States and other countries in response to such conflict could further adversely impact the financial markets and the global economy, and any economic countermeasures by the affected countries or others could exacerbate market and economic instability. Our general business strategy may be adversely affected by any such economic downturn, volatile business environment, hostile third-party action or continued unpredictable and unstable market conditions.

Our allowance for credit losses ("ACL") may not be adequate to cover future loan losses, which could adversely affect our financial condition and results of operations.

If our customers are unable to repay their loans according to the original terms, and the collateral securing the payment of those loans is insufficient to pay any remaining loan balance, we will be required to characterize the loan as non-performing or write it off as a loss. We maintain an ACL to provide for loan defaults and non-performance, however, losses may exceed the value of the collateral securing the loans and the allowance may not fully cover any excess loss.

We make various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of our borrowers and the value of the real estate and other assets serving as collateral for the repayment of loans. Our ACL is based on these judgments, as well as historical loss experience and an evaluation of the other risks associated with our loan portfolio, including but not limited to, economic trends and conditions, changes in underwriting standards, management, competition, and trends in delinquencies, non-accrual and adversely classified loans, the size and composition of the loan portfolio, current economic conditions and geographic concentrations within the portfolio. Banking regulatory agencies, as part of their examination process, review our loans and ACL. If our assumptions and judgments used to determine the ACL prove to be incorrect, if the value of the collateral securing the loans decreases substantially or if regulators disagree with our judgments, we may need to increase the ACL in amounts that exceed our expectations. Material additions to the ACL, or losses in excess of the ACL, would adversely affect our results of operations and financial condition.

We are exposed to risks related to our operational, technological, and third-party provided technology infrastructure.

We rely extensively on the successful and uninterrupted functioning of information technology and telecommunications systems to conduct our business. This includes internally developed systems, internally managed systems, outsourced systems provided by third-party service providers, internet facing digital products and services, mobile technologies and the on-going operational maintenance of each service. Any disruptions, failures, or inaccuracies of these systems, including changes and improvements, could result in our inability to service customers, manage operations, manage risk, meet regulatory obligations, or provide timely and accurate financial reporting which could damage our reputation, result in loss of customer business, subject us to regulatory scrutiny, or expose us to civil litigation and possible financial liability.

In many instances, the Company's products and services to customers are dependent upon third-party service providers, who provide necessary, or critical, services and support. Any disruption of such services, or an unplanned termination of a third-party license or service agreement related thereto, could adversely affect our ability to provide necessary products and services for our customers.

In recent years, we have made a significant ongoing investment to enhance our technological capabilities with the objectives of enhancing customer experience, growing revenue, and improving operating efficiency. There is a risk that these investments may not provide the anticipated benefits and/or will prove significantly more costly and time consuming to produce. If this occurs, we may see a loss of customers, and our financial results and ability to execute on our strategic plan may be adversely impacted.

We are subject to complex state and federal laws, rules, regulations and standards regarding data privacy and cybersecurity, which impact how we conduct our business.

We are subject to complex and evolving data privacy laws, rules, regulations, standards and contractual obligations (collectively "data privacy laws") that relate to the privacy and security of the personal information of customers, employees or others. These data privacy laws require, among other things, that we make certain privacy disclosures, maintain a robust security program, require disclosures and notifications during a cyber or information security incident, and regulate our collection, use, sharing, retention, and safeguarding of consumer or employee information. State and federal regulators may also hold us responsible for privacy and data protection obligations performed by our third-party service providers while providing services to us, as well as disclosures and notifications during a cyber or information security incident. Consumers also have the option to direct banks and other financial institutions not to share information about transactions and experiences with affiliated companies for the purpose of marketing products or services.

State regulators have also been increasingly active in implementing privacy and cybersecurity standards and regulations. Recently, several states have adopted regulations requiring certain financial institutions to implement cybersecurity programs and provide detailed requirements with respect to these programs, including data encryption requirements. Many states have also recently implemented or modified their data breach notification and data privacy requirements. We expect this trend of state-level activity in those areas to continue and are continually monitoring developments in the states in which the Company operates. As the regulatory environment becomes more rigorous, we anticipate that compliance with these requirements will result in additional costs and expenses, and may impact the way we conduct business. Our failure to comply with data privacy laws could result in potentially significant regulatory or governmental investigations, litigation, fines, or

sanctions, or cause damage to our reputation, which could have a material adverse effect on our business, financial condition or results of operations.

The development and use of Artificial Intelligence (“AI”) presents risks and challenges that may adversely impact our business.

We or our third-party (or fourth party) vendors, clients or counterparties may develop or incorporate AI technology in certain business processes, services, or products. The development and use of AI presents a number of risks and challenges to our business. The legal and regulatory environment relating to AI is uncertain and rapidly evolving, both in the U.S. and internationally, and includes regulatory schemes targeted specifically at AI as well as provisions in intellectual property, privacy, consumer protection, employment, and other laws applicable to the use of AI. These evolving laws and regulations could require changes in our implementation of AI technology and increase our compliance costs and the risk of non-compliance. AI models, particularly generative AI models, may produce output or take action that is incorrect, that reflects biases included in the data on which they are trained, that results in the release of private, confidential, or proprietary information, that infringes on the intellectual property rights of others, or that is otherwise harmful. In addition, the complexity of many AI models makes it difficult to understand why they are generating particular outputs. This limited transparency increases the challenges associated with assessing the proper operation of AI models, understanding and monitoring the capabilities of the AI models, reducing erroneous output, eliminating bias, and complying with regulations that require documentation or explanation of the basis on which decisions are made. Further, we may rely on AI models developed by third parties, and, to that extent, would be dependent in part on the manner in which those third parties develop and train their models, including risks arising from the inclusion of any unauthorized material in the training data for their models and the effectiveness of the steps these third parties have taken to limit the risks associated with the output of their models, matters over which we may have limited visibility. Any of these risks could expose us to liability or adverse legal or regulatory consequences and harm our reputation and the public perception of our business or the effectiveness of our security measures.

If we are not able to retain or attract key employees, or if we were to suffer the loss of a significant number of employees, we could experience a disruption in our business.

If a key employee or a substantial number of employees depart or become unable to perform their duties, it may negatively impact our ability to conduct business as usual. Unanticipated departures, including in connection with acquisition activity, such as our recent acquisition of Luther Burbank, might require us to divert resources from other areas of our operations, which could create additional stress for other employees, including those in key positions. The loss of qualified and key personnel, or an inability to continue to attract, retain and motivate key personnel could adversely affect our business and consequently impact our financial condition and results of operations.

Our risk management framework may not be effective in mitigating risks and losses to us.

Our risk management framework is comprised of various processes, systems and strategies designed to manage the types of risks to which we are subject, including, among others, credit, market, liquidity, interest rate, cybersecurity and compliance. Our framework also includes financial or other modeling methodologies that involve management assumptions and judgment. Because we rely on assumptions and judgment calls, our risk management framework may not be effective under all circumstances and may not adequately mitigate any risk of loss to us. If our framework is not effective, we could suffer unexpected losses and our financial condition, operations or business prospects could be materially and adversely affected. We may also be subject to potentially adverse regulatory consequences.

Climate change could adversely affect our business, affect client activity levels and damage our reputation.

Concerns over the long-term impacts of climate change have led and will continue to lead to governmental efforts around the world to mitigate those impacts. Consumers and businesses are also changing their behavior and business preferences as a result of these concerns. New governmental regulations or guidance relating to climate change, as well as changes in consumers’ and businesses’ behaviors and business preferences, may affect whether and on what terms and conditions we will engage in certain activities or offer certain products or services. The governmental and supervisory focus on climate change could also result in our becoming subject to new or heightened regulatory requirements, such as requirements relating to operational resiliency or stress testing for various climate stress scenarios. Any such new or heightened requirements could result in increased regulatory, compliance or other costs or higher capital requirements. In connection with the transition to a low carbon economy, legislative or public policy changes and changes in consumer sentiment could negatively impact the businesses and financial condition of our clients, which may decrease revenues from those clients and increase the credit risk associated with loans and other credit exposures to those clients. Our business, reputation and ability to attract and retain employees may also be harmed if our response to climate change is perceived to be ineffective or insufficient.

Furthermore, the long-term impacts of climate change have and will continue to have a negative impact on our business, as well as on our customers and their business. Physical risks include extreme storms, tsunamis, floods, wildfires or other catastrophic events that damage or destroy offices or other assets, or that damage or destroy property and inventory securing loans we make. These catastrophic events may also interrupt our customer's business operations, putting them in financial difficulty, and increasing the risk of default. Our customers are also facing increases in energy, insurance and commodity costs driven by climate change, as well as new regulatory requirements resulting in increased operational costs.

A pandemic or similar health crisis, may adversely affect our business and our customers, counterparties, employees, and third-party service providers in the future.

The spread of COVID-19 created a global public-health crisis that resulted in significant economic uncertainty, and impacted household, business, economic, and market conditions across the world, including in the western United States where we conduct nearly all of our business.

Throughout the pandemic our operations were impacted by the need to close certain offices and limit how customers conduct business through our branch network. Many of our employees continue to work remotely, which exposes us to increased cybersecurity risks such as phishing, malware, and other cybersecurity attacks, all of which could expose us to liability and could seriously disrupt our business operations.

A similar pandemic or major health crisis could negatively impact our capital, liquidity, and other financial positions and our business, results of operations, and prospects, affect significantly more households and businesses, or cause additional limitations on commercial activity, increased unemployment, increased property vacancy rates and general economic and financial instability. A slow-down or reversal in the economic recovery of the regions in which we conduct our business could result in declines in loan demand and collateral values. Negative impacts on our customers caused by a pandemic or other major health crisis could result in increased risk of delinquencies, defaults, foreclosures and losses on our loans. Future actions of governmental authorities taken in response to a pandemic or similar crisis, such as eviction forbearance, occupancy restrictions, vaccine mandates, or suspension of mortgage foreclosures, could have a negative impact on our business.

Regulatory and Litigation Risks

Non-Compliance with banking rules and regulations, including the USA PATRIOT Act, Bank Secrecy Act, Community Reinvestment Act, Fair Lending Laws, Real Estate Settlement Procedures Act, Truth-in-Lending Act, Flood Insurance Reform Act or other laws and regulations could result in fines or sanctions, and curtail our expansion opportunities.

Financial institutions are required under the USA PATRIOT Act of 2001 (the "Patriot Act") and Bank Secrecy Act ("BSA") to develop programs to prevent financial institutions from being used for money-laundering and terrorist activities. Financial institutions are also obligated to file suspicious activity reports with the U.S. Treasury Department's Office of Financial Crimes Enforcement Network. These rules also require financial institutions to establish procedures for identifying and verifying the identity of customers seeking to open new financial accounts. Our failure or our inability to comply with the Patriot Act and BSA statutes and regulations could result in fines or penalties, curtailment of expansion opportunities, enforcement actions, intervention or sanctions by regulators and costly litigation or expensive additional controls and systems.

The Bank was previously subject to a Consent Order from the Office of the Comptroller of the Currency ("OCC") for its BSA program that was issued in February 2018 (the "BSA Consent Order"). The BSA Consent Order resulted in the Bank incurring significant expenses to implement an effective AML/CFT Program, including payment of a \$2,500,000 civil money penalty. The OCC terminated the BSA Consent Order in December 2021. However, the Bank remains subject to the BSA, the Patriot Act, and other laws and regulations requiring financial institutions, among other duties, to institute and maintain an effective anti-money laundering program and file suspicious activity and currency transaction reports as appropriate. Expanded laws and regulations relating to residential and consumer lending activities could create significant new compliance burdens and financial costs. Failure to maintain an effective AML/CFT program could have serious business, financial and reputational consequences for the Bank.

The Community Reinvestment Act ("CRA"), the Equal Credit Opportunity Act, the Fair Housing Act and other fair lending laws and regulations impose community investment requirements and nondiscriminatory lending requirements on financial institutions. The FDIC, CFPB, the United States Department of Justice and other federal agencies are responsible for enforcing these laws and regulations. A successful regulatory challenge to our performance under the CRA, receiving a less than satisfactory CRA rating, or challenges related to other fair lending laws and regulations could result in a wide variety of sanctions, including the required payment of damages, civil money penalties, injunctive relief, imposition of restrictions on merger and acquisition activity, and restrictions on expansion activity, including opening new branches or entering new lines of business. Private parties may also have the ability to challenge an institution's performance under fair lending laws in private

class action litigation. Any of these actions could have a material adverse effect on our business, financial condition and results of operations.

Failure to comply with the 2020 and 2013 Consent Orders from the Consumer Financial Protection Bureau regarding our Home Mortgage Disclosure Act submissions could result in additional regulatory enforcement action.

In March 2020, the Consumer Financial Protection Bureau (the “CFPB”) Office of Enforcement formally notified us of alleged violations of the Home Mortgage Disclosure Act (“HMDA”) associated with our HMDA reporting submissions. The CFPB alleged that the Bank did not accurately report all required relevant information within the annual HMDA submissions. We responded to the CFPB, noting that the Bank has instituted enhanced procedures to ensure compliance with HMDA, and submitted amended HMDA filings. In October 2020, after further discussions with the CFPB, we entered into a consent order related to our HMDA reporting, under which we agreed to pay a \$200,000 civil money penalty and implement a HMDA compliance management system while adhering to a compliance plan. The consent order will be in effect for 10 years. We had previously entered into a consent order with the CFPB in 2013, also relating to HMDA reporting deficiencies, resulting in a \$34,000 civil money penalty. The 2013 HMDA consent order remains in effect. Any further deficiencies in our HMDA reporting submissions could result in additional regulatory enforcement actions, cause us to incur additional significant compliance costs and subject us to larger fines. Moreover, continued deficiencies in our HMDA reporting could have serious reputational consequences for the Bank. Any of these results could have a material adverse effect on our business, financial condition and results of operations.

We operate in a highly regulated industry, which limits the manner and scope of our business activities.

We are subject to extensive supervision, regulation and examination by the WDFI, the FDIC and the CFPB. In addition, the Federal Reserve is responsible for regulating the holding company. This regulatory structure is designed primarily for the protection of the deposit insurance funds and consumers and not to benefit our shareholders. This regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities and examination policies to address not only compliance with applicable laws and regulations (including laws and regulations governing consumer credit, CRA, and anti-money laundering and anti-terrorism laws), but also capital adequacy, asset quality and risk, management ability and performance, earnings, liquidity, data reporting and various other factors. As part of this regulatory structure, we are subject to policies and other guidance developed by the regulatory agencies with respect to capital levels, the timing and amount of dividend payments, the classification of assets and the establishment of adequate loan loss reserves for regulatory purposes. Under this structure the WDFI, the FDIC, the CFPB and the Federal Reserve have broad discretion to impose restrictions and limitations on our operations if they determine, among other things, that our operations are unsafe or unsound, fail to comply with applicable law or are otherwise inconsistent with laws and regulations or with the supervisory policies of these agencies. This supervisory framework could materially impact the conduct, growth and profitability of our operations. In particular, the FDIC has specific authority to take “prompt corrective action,” if the Bank’s capital falls below its current “well capitalized” level, including limiting the Bank’s ability to take brokered deposits, requiring the Bank to raise additional capital and subject it to progressively more severe restrictions on its operations, management and capital distributions, and replacement of senior executive officers and directors. If the Bank ever became “critically undercapitalized,” it would also be subject to the appointment of a conservator or receiver.

Failure to comply with applicable laws and regulations can result in a range of sanctions and enforcement actions, including the imposition of civil money penalties, formal agreements and cease and desist orders; prior-identified deficiencies in our HMDA reporting and AML/CFT programs have resulted in Consent Orders from the CFPB and OCC, required us to incur significant expenses and compliance costs and subjected us to civil penalties. Failure to meet regulatory requirements could require the Bank to incur additional significant costs in order to bring our programs and operations into compliance, negatively impact our reputation, and have a material adverse effect on our business, financial condition and results of operations.

Recent national and state legislation and regulatory initiatives to support the financial services industry have been coupled with numerous restrictions and requirements that could detrimentally affect our business.

The Dodd-Frank Act has had a substantial impact on the financial services industry since its passage in 2010. The Dodd-Frank Act creates a framework through which regulatory reform has been and continues to be written. While many of the rules required by the Dodd-Frank Act have been implemented, others are still being drafted. As a result, the impact of the future regulatory requirements continue to be uncertain. We expect the way we conduct business to continue to be affected by these regulatory requirements, including through limitations on our ability to pursue certain lines of business, capital requirements, enhanced reporting obligations, and increased costs.

The failures of Silicon Valley Bank and Signature Bank are expected to result in modifications to or additional laws and regulations governing banks and bank holding companies, including increasing capital requirements, modifications to regulatory requirements with respect to liquidity risk management, deposit concentrations, capital adequacy, stress testing and contingency planning, and safe and sound banking practices, or enhanced supervisory or enforcement activities. Other legislative initiatives could detrimentally impact our operations in the future. Regulatory bodies may enact new laws, promulgate new regulations or view matters or interpret laws and regulations differently than they have in the past, or commence investigations or inquiries into our business practices. For example, the Biden Administration announced a government-wide effort to eliminate “junk fees” which could subject our business practices to even further scrutiny. The CFPB’s action on junk fees thus far has largely focused on fees associated with deposit products, such as “surprise” overdraft fees and non-sufficient funds fees. However, what constitutes a “junk fee” remains undefined. The CFPB is actively soliciting consumer input on fee practices associated with other consumer financial products or services, signaling that the “junk fee” initiative is likely to continue to broaden in scope. As a result of this regulatory focus, we have changed how we assess overdraft and non-sufficient funds fees and we may be required to implement additional changes based on regulatory directives or guidance. Such changes have led to and may continue to cause a reduction in our non-interest income thus impacting our overall net income.

The extent of the impact of any future legislation will be dependent on the specific details of the final legislation passed, if any, but the potential changes outlined above could, among other things, increase our costs, limit our ability to pursue business opportunities and the types of financial services and products we may offer, and impact future growth, any of which could materially and adversely affect our business, results of operations or financial condition.

Deposit insurance premiums could increase further in the future.

The FDIC insures deposits at FDIC-insured financial institutions, including the Bank. The FDIC charges insured financial institutions premiums to maintain the Deposit Insurance Fund ("DIF") at a specific level. Historically, unfavorable economic conditions increased bank failures and these additional bank failures decreased the DIF. Extraordinary growth in insured deposits during the first and second quarters of 2020 caused the ratio of the DIF to total insured deposits to fall below the current statutory minimum of 1.35%. In order to restore the DIF to its statutorily mandated minimums, the FDIC significantly increased deposit insurance premium rates, including the Bank's, resulting in increased expenses. The revised assessment rate schedules became effective January 1, 2023, and were applicable to the first quarterly assessment period of 2023 (i.e., January 1 through March 31, 2023, with an invoice payment date of June 30, 2023). In November 2023, the FDIC approved a final rule to impose a special assessment to recover the losses to the deposit insurance fund resulting from the closures of Silicon Valley Bank and Signature Bank. Beginning in the first calendar quarter of 2024, the FDIC began collecting the special assessment and it is expected to continue collecting the special assessment for a total of eight quarters. The FDIC may further increase the assessment rates or impose additional special assessments in the future to restore and then steadily increase the DIF. FDIC insurance premiums could increase in the future in response to similar declining economic conditions. A material increase in the Bank's FDIC premiums could have an adverse effect on its business, financial condition and results of operations.

We are subject to various claims and litigation, which could result in significant expenses, losses and damage to our reputation.

We are, from time to time, subject to claims and proceedings related to our operations. These claims and legal actions could include supervisory or enforcement actions by our regulators, criminal proceedings by prosecutorial authorities, or civil claims by our customers, former customers, contractual counterparties, and current and former employees. We may also face class action lawsuits for, among other things, alleged violations of employment, state wage and hour and consumer protection laws. These claims could involve large monetary demands, including civil money penalties or fines imposed by government authorities, and significant defense costs. If such claims and legal actions are brought, and are not resolved in a manner favorable to the Company, they could result in financial liability and/or reputational harm, which could have a material adverse effect on our financial condition and results of operations.

Banking institutions are also increasingly the target of class action lawsuits, including claims alleging deceptive practices or violations of account terms in connection with non-sufficient funds or overdraft charges and violations of the Fair Labor Standards Act (“FLSA”). In 2022, the Bank paid \$495,000 plus claims administrative expenses to settle a class action lawsuit related to allegations of improper assessments of overdraft and insufficient funds fees. In May 2024, we received court approval for the settlement of a class action claim related to alleged violations of the FLSA associated with claims for allegedly unpaid wages and overtime for certain of our non-exempt employees under which the Bank ultimately paid approximately \$2.1 million. If another class action lawsuit is filed or determined adversely to us, or we were to enter into a settlement agreement in connection with such a matter, we could be exposed to monetary damages, reputational harm, or subject to limits on our ability to operate our business, which could have an adverse effect on our financial condition, and operating results.

Our real estate lending also exposes us to the risk of environmental liabilities.

In the course of our business, it is necessary to foreclose and take title to real estate, which could subject us to environmental liabilities with respect to these properties. Hazardous substances or waste, contaminants, pollutants or sources thereof may be discovered on properties during our ownership or after a sale to a third party. We could be held liable to a governmental entity or to third parties for property damage, personal injury, investigation and clean-up costs incurred by these parties in connection with environmental contamination, or may be required to investigate or clean up hazardous or toxic substances or chemical releases at such properties. The costs associated with investigation or remediation activities could be substantial and could substantially exceed the value of the real property. In addition, as the owner or former owner of a contaminated site, we may be subject to common law claims by third parties based on damages and costs resulting from environmental contamination emanating from the property. We may be unable to recover costs from any third party. These occurrences may materially reduce the value of the affected property, and we may find it difficult or impossible to use or sell the property prior to or following any environmental remediation. If we ever become subject to significant environmental liabilities, our business, financial condition and results of operations could be materially and adversely affected.

Market and Industry Risks

Recent negative developments affecting the banking industry, and resulting media coverage, have eroded customer confidence in the banking system.

The high-profile bank failures of 2023 generated significant market volatility among publicly traded bank holding companies and, in particular, regional banks like the Company. These market developments also negatively impacted customer confidence in the safety and soundness of regional banks. While the Department of the Treasury, the FRB, and the FDIC took steps to ensure that depositors of the failed banks would have access to their deposits, including uninsured deposit accounts, there is no guarantee that such actions will be successful in restoring customer confidence in regional banks and the banking system more broadly. If other bank failures occur and financial institutions enter receivership or become insolvent in the future due to financial conditions affecting the banking system and financial markets, it could disrupt the financial services industry and customers may choose to maintain deposits with larger financial institutions or invest in higher yielding short-term fixed income securities, all of which could materially adversely impact the Company's liquidity, loan funding capacity, net interest margin, capital and results of operations.

As a result of the bank failures, the FDIC imposed a special assessment to recoup losses to the deposit fund. If additional bank failures were to occur, we could face increased regulation of our industry, including increased compliance costs and limitations on our ability to pursue business opportunities; significantly higher Federal Deposit Insurance Corporation premiums or additional special assessments; adverse impacts on our stock price and volatility of our Common Stock; and increased competition for deposits due to a lack of consumer confidence in regional banks. If these conditions or similar ones continue to exist or worsen, we could experience continuing or increased adverse effects on our financial condition.

A downturn in the real estate market would hurt our business.

The Bank's business activities and credit exposure are concentrated in real estate lending, in particular commercial real estate loans which are generally viewed as having more risk of default than residential real estate loans or certain other types of loans or investments. The market for real estate is cyclical and the outlook for this sector is uncertain. A downturn in the real estate market, accompanied by falling values and increased foreclosures would hurt our business because a large majority of our loans are secured by real estate.

If a significant decline in market values occurs, the collateral for loans will provide decreasing levels of security. As a result, our ability to recover the principal amount due on defaulted loans by selling the underlying real estate will be diminished, and we will be more likely to suffer losses on defaulted loans. Because our loan portfolio contains commercial real estate loans with relatively large balances, the deterioration of these loans may cause a significant increase in our nonperforming loans which could result in a loss of earnings from these loans, an increase in the provision for loan losses, or an increase in loan charge-offs, any of which would have an adverse impact, which could be material, on our business, financial condition, and results of operations.

We own real estate as a result of foreclosures resulting from non-performing loans. If other lenders or borrowers liquidate significant amounts of real estate in a rapid or disorderly fashion, or if the FDIC elects to dispose of significant amounts of real estate from failed financial institutions in a similar fashion, it could have an adverse effect on the values of the properties owned by the Company by depressing the value of these real estate holdings. In such a case, we may incur further write-downs and charge-offs, which could, in turn, adversely affect our business, financial condition and results of operations.

Changes in retail distribution strategies and consumer behavior may adversely impact our business, financial condition and results of operations.

We have significant investments in bank premises and equipment for our branch network as well as our retail work force and other branch banking assets. Advances in technology, as well as changing customer preferences for accessing our products and services, are requiring us to change our retail distribution strategy. As a result of the current market environment and customer behavior, we have undertaken a branch optimization strategy that has led to the closure, consolidation or sale of certain branches in our network. These actions could lead to losses on these assets or could adversely impact the carrying value of other long-lived assets and may lead to increased expenditures to renovate and reconfigure remaining branches or to otherwise further reform our retail distribution channel. In addition, any changes in our branch network strategy could adversely impact our business, financial condition or operations if it results in the loss of customers or deposits which we rely on as a low cost and stable source of funds for our loans and operations.

We may suffer losses in our loan portfolio due to inadequate or faulty underwriting and loan collection practices.

There are risks inherent in any loan portfolio, which we attempt to address by adhering to specific underwriting and loan collection practices. Underwriting practices often include analysis of a borrower's prior credit history; financial statements; tax returns; cash flow projections; valuation of collateral; personal guarantees of loans to businesses; and verification of liquid assets. If the underwriting process fails to capture accurate information or proves to be inadequate, we may incur losses on loans that appeared to meet our underwriting criteria, and those losses may exceed the amounts set aside as reserves in the allowance for credit losses. Loan collection resources may be expanded to meet increases in nonperforming loans resulting from economic downturns or to service any loans acquired, resulting in higher loan administration costs. We are also exposed to the risk of improper documentation of foreclosure proceedings that would also increase the cost of collection.

Our operations are focused in the western United States, subjecting us to the risks of general economic conditions in these market areas.

Substantially all of the Bank's loans are to individuals, businesses and real estate developers in the Pacific Northwest, California, Arizona, Utah, Texas, New Mexico and Nevada. As a result, our business depends significantly on general economic conditions in these market areas. A substantial increase in unemployment rates, or severe declines in housing prices and property values in any of these primary market areas could have a material adverse effect on our business due to a number of factors, including:

- Loan delinquencies may increase.
- Problem assets and foreclosures may increase.
- Demand for the Bank's products and services may decline.
- Collateral for loans made by the Bank, especially real estate, may decline in value, in turn reducing a customer's borrowing power and reducing the value of assets and collateral associated with the loans.
- Natural disasters and catastrophic events such as wildfires, floods and earthquakes may damage or destroy collateral for loans made by the Bank and negatively impact the collateral's value and a customer's ability to repay loans.

Our liquidity may be adversely impacted by issues arising from certain industry deficiencies in foreclosure practices, including delays and challenges in the foreclosure process.

Foreclosure process issues and the potential legal and regulatory responses to them could negatively impact the process and timing to completion of foreclosures for residential mortgage lenders, including the Bank. During the COVID-19 pandemic, certain states in which we do business enacted temporary stays on evictions and foreclosures, or instituted a right to forbearance for homeowners experiencing financial hardship. Even before the adoption of these emergency policies, foreclosure timelines have increased in recent years due to, among other reasons, delays associated with the significant increase in the number of foreclosure cases as a result of economic downturns, additional consumer protection initiatives related to the foreclosure process and voluntary or mandatory programs intended to permit or require lenders to consider loan modifications or other alternatives to foreclosure. Should these stays or rights to forbearance be enacted again, or if new legislation is passed regarding residential foreclosures, we may be limited in our ability to take timely possession of real estate assets collateralizing loans, which may increase our loan losses. Increases in the foreclosure timeline could also result in increased costs, and may have an adverse effect on collateral values and our ability to minimize our losses.

Impairment of goodwill may adversely impact future results of operations.

Accounting standards require that we account for acquisitions using a method that could result in goodwill. If the purchase price of the acquired company exceeds the fair value of the acquired net assets, the excess will be included in the

Company's Statement of Financial Condition as goodwill. The Company has a significant goodwill balance and, in accordance with GAAP, we evaluate it for impairment at least annually and more often if events or circumstances indicate the possibility of impairment. Evaluations may be based on many factors, some of which are the price of our Common Stock, discounted cash flow projections and data from comparable market acquisitions. A significant and sustained decline in our stock price and market capitalization, a significant decline in our expected future cash flows, a significant adverse change in the business climate or slower growth rates could result in impairment of our goodwill. Future evaluations of goodwill may result in the impairment and write-down of our goodwill balance which could have a material adverse impact on our earnings and adversely affect our operating results.

Competitive Risks

The Bank faces strong competition from other financial institutions and new market participants, offering services similar to those offered by the Bank.

Many competitors, including fintech companies, offer the same types of loan and deposit services that the Company offers. These competitors include national and multinational banks, other regional banks, savings associations, community banks, credit unions, fintechs, and other financial intermediaries. In particular, our competitors include national banks and major financial companies whose greater resources may afford them a marketplace advantage by enabling them to maintain numerous banking locations, launch new technologies and mount extensive promotional and advertising campaigns. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. Many of our competitors have substantially greater resources to invest in technological improvements than we do. Our future success will depend, in part, upon our ability to address the needs of our clients by using technology to provide products and services that will satisfy client demands for convenience, as well as to create additional efficiencies in our operations. We may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers. In addition, the implementation of technological changes and upgrades to maintain current systems and integrate new ones may also cause service interruptions, transaction processing errors and system conversion delays and may cause us to fail to comply with applicable laws. There can be no assurance that we will be able to successfully manage the risks associated with our increased dependency on technology. Additionally, recent technological breakthroughs have made it possible for other non-traditional competitors to enter the marketplace and compete for traditional banking services. Increased competition within our geographic market area may result in reduced loan originations and deposits. Ultimately, competition from current and future competitors may affect our business materially and adversely.

We may not be able to continue to grow organically or through acquisitions.

Historically, we have expanded through a combination of organic growth and acquisitions. If market and regulatory conditions change, we may be unable to grow organically or successfully compete for, complete, and integrate potential future acquisitions at the same pace as we have achieved in recent years, or at all. We have historically used our strong stock currency and capital resources to complete acquisitions. Downturns in the stock market and the market price of our stock, changes in our capital position, and changes in our regulatory standing could each have a negative impact on our ability to complete future acquisitions.

Our entry into California may present increased risk that may adversely impact our business, prospects and financial condition.

The Merger with Luther Burbank resulted in the Bank's initial entry into the state of California. We have no operating experience in California, are new to this market area, and will be relying on the experience and expertise of Luther Burbank's lending and business development officers to help with our transition. We may be unsuccessful in retaining those existing employees. The banking and financial services business in California is highly competitive. The entry of the Bank into California presents us with different competitive conditions, and we will be required to compete for loans, deposits and customers for financial services with other commercial banks, savings and loan associations, securities and brokerage companies, mortgage companies, insurance companies, finance companies, money market funds, credit unions, fintechs, and other nonbank financial service providers in California. Many of these competitors are much larger in total assets and capitalization, have greater access to capital markets and offer a broader array of financial services than the Company. As a result, there can be no assurance that we will be able to compete effectively in California, and if we are unable to compete effectively in California, the benefits we were anticipating from the Merger may not be fully achieved, and our results of operations and financial conditions could be materially and adversely affected.

Security Ownership Risks

Our ability to pay dividends is subject to limitations that may affect our ability to continue to pay dividends to shareholders.

The Company is a separate legal entity from the bank subsidiary and does not have significant operations of its own. The availability of dividends from the Bank is limited by the Bank's earnings and capital, as well as various federal and state statutes and regulations. It is possible, depending upon the financial condition of the Bank and other factors, that the Bank may not be able to pay dividends to the Company. If the Bank is unable to pay dividends to the Company, then we may not be able to pay dividends on our preferred or Common Stock to our shareholders. If the Bank's earnings are not sufficient to make dividend payments to us while maintaining adequate capital levels, then our liquidity may be affected and our stock price may be negatively affected by our inability to pay dividends, which will have an adverse impact on both the Company and our shareholders.

Our 4.875% Fixed Rate Non-Cumulative Perpetual Preferred Stock, Series A (“Series A Preferred Stock”) ranks senior to our Common Stock, and we are prohibited from paying dividends on our Common Stock unless we have paid dividends on our Series A Preferred.

Shares of our Series A Preferred Stock rank senior to our Common Stock with respect to the payment of dividends and distributions of assets upon liquidation, dissolution or winding up. Holders of Series A Preferred Stock are entitled to receive, when, as, and if declared by our Board of Directors (or a duly authorized committee of our Board of Directors), out of assets legally available for the payment of dividends under Washington law, non-cumulative cash dividends based on the liquidation preference of the Series A Preferred Stock at a rate equal to 4.875% per annum for each quarterly dividend period, beginning on April 15, 2021. If we do not or are unable to pay quarterly dividends on our Series A Preferred Stock, we may not pay a dividend to the holders of our Common Stock. Our stock price may be negatively affected by our inability to pay dividends, which will have an adverse impact on both the Company and our shareholders.

In addition, if we fail to pay, or declare and set apart for payment, dividends on our Series A Preferred Stock for six quarterly dividend periods, whether or not consecutive, the number of directors on our Board of Directors will automatically be increased by two, and the holders of shares of Series A Preferred Stock will have the right to elect two additional members of our Board of Directors (the “Preferred Stock Directors”) to fill such newly created directorships.

The market price for our Common Stock may be volatile.

The market price of our Common Stock could fluctuate substantially in the future in response to a number of factors, including those discussed below. The market price of our Common Stock has in the past fluctuated significantly, including in 2023 as a result of the high-profile bank failures. We expect to see additional volatility in the financial markets due to the uncertainty caused by the continuing global conflicts, commodity shortages and price fluctuations, recent bank failures, uncertainty over the U.S. government debt ceiling, risks of government shutdowns and changing Federal Reserve policy. Some additional factors that may cause the price of our Common Stock to fluctuate include:

- general conditions in the financial markets and real estate markets.
- bank failures and the regulatory response.
- macro-economic and political conditions in the U. S. and the financial markets generally.
- variations in the operating results of the Company and our competitors.
- events affecting other companies that the market deems comparable to the Company.
- changes in securities analysts' estimates of our future performance and the future performance of our competitors.
- announcements by the Company or our competitors of mergers, acquisitions and strategic partnerships.
- additions or departure of key personnel.
- the presence or absence of short selling of the Company's Common Stock.
- future sales by us of our Common Stock or debt securities.

The stock markets in general have experienced substantial price and trading fluctuations. These fluctuations have resulted in volatility in the market prices of securities that often has been unrelated or disproportionate to changes in operating performance. These broad market fluctuations are expected to continue for the near future, and may adversely affect the trading price of our Common Stock.

There may be future sales or other dilution of the Company's equity, which may adversely affect the market price of our Common Stock or depositary shares.

Our Board of Directors is authorized to cause the Company to issue one or more classes or series of preferred stock junior to our Series A Preferred Stock from time to time without any action on the part of our shareholders, and our Board of Directors also has the power, without shareholder approval, to set the terms of any such classes or series of preferred stock that

may be issued, including voting rights, dividend rights, and preferences over the Common Stock with respect to dividends or upon our dissolution, winding up and liquidation and other terms.

The issuance of any additional shares of common or of preferred stock or convertible securities or the exercise of such securities could be substantially dilutive to existing shareholders. As we did for the Merger with Luther Burbank, we may also elect to use Common Stock to fund new acquisitions, which will further dilute existing shareholders. Holders of our Common Stock have no preemptive rights that entitle holders to purchase their pro rata share of any offering of shares of any class or series and, therefore, such sales or offerings could result in increased dilution to our shareholders.

We rely, in part, on external financing to fund our operations and the unavailability of such funding in the future could adversely impact our growth and prospects.

We rely on customer deposits, advances from the FHLB and other borrowings to fund our operations. Management has historically been able to replace maturing deposits, if desired; however, we may not be able to replace such funds at any given point in time if our financial condition or market conditions change or if the cost of doing so might adversely affect our business, financial condition and results of operations.

If we need additional funds for our liquidity needs, we may seek additional debt to achieve our long-term business objectives. Such borrowings, if sought, may not be available to us or, if available, may not be on favorable terms. If additional financing sources are unavailable or are not available on reasonable terms, our business, financial condition and results of operations may be adversely affected.

A person holding our Common Stock could have the voting power of their shares of Common Stock on all matters significantly reduced under Washington's anti-takeover statutes, if the person acquires 10% or more of the voting stock of the Company.

We are incorporated in the state of Washington and subject to Washington state law. Some provisions of Washington state law could interfere with or restrict takeover bids or other change-in-control events affecting us. For example, Chapter 23B.19 of the Washington Business Corporation Act, with limited exceptions, prohibits a “target corporation” from engaging in specified “significant business transactions” for a period of five years after the share acquisition by an acquiring person, without complying with certain shareholder approval requirements. An acquiring person is defined as a person or group of persons that beneficially own 10% or more of our voting securities. Such prohibited transactions include, among other things:

- certain mergers, or consolidations with, disposition of assets to, or issuances of stock to or redemption of stock from, the acquiring person;
- termination of 5% or more of the employees of the target corporation as a result of the acquiring person's acquisition of 10% or more of the shares;
- allowing the acquiring person to receive any disproportionate benefit as a shareholder; and
- liquidating or dissolving the target corporation.

After the five-year period, certain “significant business transactions” are permitted, if they comply with certain “fair price” provisions of the statute or are approved by a majority of the outstanding shares other than those of which the acquiring person has beneficial ownership. As a Washington corporation, the Company is not permitted to “opt out” of this statute.

The Company's business or the value of its common shares could be negatively affected as a result of actions by activist shareholders.

The Company values constructive input from shareholders, and our Board of Directors and management team are committed to acting in the best interests of all of the Company's shareholders. Activist shareholders who disagree with the composition of the Board of Directors, the Company's strategic direction, or the way the Company is managed may seek to effect change through various strategies that range from private engagement to public filings, proxy contests, efforts to force transactions not supported by the Board of Directors, and litigation. Responding to some of these actions can be costly and time-consuming, may disrupt the Company's operations and divert the attention of the Board of Directors and management. Such activities could interfere with the Company's ability to execute its strategic plan and to attract and retain qualified executive leadership. The perceived uncertainty as to the Company's future direction resulting from activist strategies could also affect the market price and volatility of the Company's common shares.

Item 1B. Unresolved Staff Comments

None.

Item 1C. Cybersecurity

Cybersecurity risk management and strategy

We recognize the value of personal and financial information and are dedicated to protecting the confidentiality, integrity, and availability of our data and systems. From the Board of Directors to our Customer Service Representatives, all individuals at the organization are responsible for handling confidential data with care.

Our Information Security Program is aligned with applicable federal and state regulations, the Federal Financial Institutions Examination Council (FFIEC) Examination Guidance, and industry-accepted security standards such as the National Institute of Standards and Technology (NIST) Cybersecurity Framework, which are at the forefront of cybersecurity guidelines for federal agencies in the U.S. We employ a defense in depth strategy that incorporates preventive, detective, and administrative safeguards including, but not limited to, advanced anti-malware and firewall technologies, anti-phishing and web filtering controls, robust patch management and vulnerability management processes, configuration hardening, participation with FS-ISAC (Financial Services Information Sharing and Analysis Center) for sharing and consuming threat information, and we perform regular security testing to evaluate our defenses against real-world threats. We have an extensive information security training program that aims to regularly educate our colleagues on current best practices on handling sensitive information and expectations for protecting the organization and our clients. All employees complete mandatory cybersecurity training on at least a quarterly basis, including how to identify phishing attacks. Colleagues are tested regularly with simulated social engineering attacks to ensure awareness and preparedness. As an additional risk mitigation measure, the Bank maintains cybersecurity insurance in the event that a material incident does occur.

The ability to mitigate cybersecurity risks is dependent upon an effective risk assessment process that identifies, measures, controls, and monitors material risks stemming from cybersecurity threats. These threats include any potential unauthorized activities occurring through the Company's information systems that could adversely affect the confidentiality, integrity, or availability of the Company's information systems or the data contained therein. The Company's Information Security Program includes a comprehensive information security risk assessment process that incorporates the following elements:

- Identifying threats, measuring risk, defining information security requirements, and implementing controls to reduce risk.
- Identifying reasonably foreseeable internal and external threats that may lead to unauthorized disclosure, misuse, alteration, or destruction of sensitive information or information systems.
- Assessing the likelihood and potential damage posed by these threats, considering the degree of information sensitivity and the Company's operations, inclusive of substantive changes to people, processes and technology.
- Aligning the Information Security Program with the Company's enterprise-wide risk management program, which identifies, measures, mitigates, and monitors risk.
- Evaluating the adequacy of policies, procedures, information systems, and other arrangements designed to control identified risks.
- Providing input for internal and external auditors and independent third-party engagements, including in relation to third party operated penetration tests.
- Exercising risk oversight to conduct appropriate, risk-based due diligence and monitoring to understand risks associated with our third-party vendors and outsourced services.

The risk assessment process is designed to identify assets requiring risk reduction strategies and includes an evaluation of the key factors applicable to the operation. The Company conducts a variety of information security assessments throughout the year, both internally and through third-party specialists. We partner with the Cybersecurity and Infrastructure Security Agency (CISA), under the Department of Homeland Security, to conduct regular vulnerability scanning against our public facing assets, and on a recurring basis we partner with outside firms to conduct thorough security assessments against our external and internal environment. Results of those assessments are further evaluated, and remediation activity is prioritized.

Our cybersecurity and IT teams prepare for and respond to cybersecurity attacks and incidents, including defending against unauthorized access to our systems, and crafting response plans intended to significantly reduce impacts on operations and customers. We understand that cyber threats are unwavering and evolving in this digital age, and because of that we continue to increase investments in people and technology to help us mature our practices and maintain confidence in our ability to safeguard our assets. While cybersecurity risks have the potential to materially affect the Company's business,

financial condition, and results of operations, the Company does not believe that risks from cybersecurity threats or attacks, including as a result of any previous cybersecurity incidents, have materially affected the Company, including our business strategy, results of operations or financial condition. With regard to the possible impact of future cybersecurity threats or incidents, see [Item 1A, Risk Factors](#).

Cybersecurity Governance

The Risk Management Committee ("RMC") and the Technology Committee of our Board of Directors oversee the company's approach to managing cybersecurity risks. On a quarterly basis, the Board committees receive a comprehensive update from management on our cybersecurity risk management strategy. This includes information on emerging threats, the company's cybersecurity posture, progress toward risk mitigation goals, significant cybersecurity incidents or developments, and the steps management has taken to address these risks. During these sessions, the Board committees typically review materials detailing current and potential risks, as well as the company's capacity to mitigate those risks. The committee also engages in discussions with our Chief Information Security Officer and Chief Information Officer about these matters. Additionally, Board committee members are encouraged to engage in ongoing, informal conversations with management regarding cybersecurity news and updates to our risk management and strategy initiatives. Material cybersecurity risks are also reviewed during Board discussions on key topics such as enterprise risk management, operational budgeting, business continuity planning, mergers and acquisitions, and brand management. Three individuals on the Board of Directors have deep technology expertise, while one of those individuals is responsible for leading cloud security at a Fortune 50 technology company.

Our cybersecurity risk management and strategy are overseen by our Chief Information Security Officer, who leads a team with decades of combined experience in information security management, cybersecurity strategy development, and the implementation of effective cybersecurity programs. The team holds a variety of relevant degrees and professional certifications.

These members of management are responsible for overseeing and monitoring the prevention, mitigation, detection, and remediation of cybersecurity incidents as part of their involvement in the cybersecurity risk management and strategy processes, including the execution of our incident response plan.

Item 2. Properties

The Company owns the building in which its principal executive offices are located in Seattle, Washington, as well as certain branch properties. The Company evaluates on a continuing basis the suitability and adequacy of its offices, both branches and administrative centers, and has opened, relocated, remodeled or closed locations as necessary to maintain efficient and attractive premises. For further information on these activities, see Notes J and N to the Consolidated Financial Statements in “Item 8. Financial Statements and Supplementary Data” of this report.

Item 3. Legal Proceedings

The Company and its consolidated subsidiaries are involved in legal proceedings occurring in the ordinary course of business that in the aggregate are believed by management to be immaterial to the financial statements of the Company. The effects of legal proceedings did not have a material impact on the Company's consolidated financial statements.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant’s Common Equity, Related Shareholder Matters and Issuer Purchases of Equity Securities

Common Stock

The Company’s Common Stock is traded on the Nasdaq Global Select Market of The Nasdaq Stock Market LLC under the symbol “WAFD.” At September 30, 2024, the number of shareholders of record was 994. This figure does not represent the actual number of beneficial owners of Common Stock because shares are frequently held in “street name” by securities dealers and others for the benefit of individual owners who may vote the shares.

Additional information about stock options and other equity compensation plans is included in Note Q to the Consolidated Financial Statements in “Item 8. Financial Statements and Supplementary Data” of this report.

The Company’s ability to pay dividends is subject to bank regulatory requirements, including (but not limited to) the capital adequacy regulations and policies established by the Board of Governors of the Federal Reserve System. The Board of Directors’ dividend policy is to review our financial performance, capital adequacy, regulatory compliance and cash resources on a quarterly basis, and, if such review is favorable, to declare and pay a quarterly cash dividend to common shareholders.

The Company’s 4.875% Fixed Rate Non-Cumulative Perpetual Preferred Stock, Series A (the “Series A Preferred”), ranks senior to the Company’s Common Stock with respect to payment of dividends, and dividends (if declared) accrue and are payable on the Series A Preferred a rate of 4.875% per annum, payable quarterly, in arrears. While the Series A Preferred is outstanding, unless the full dividend for the preceding quarterly period is paid in full, or declared and a sum set aside, no dividend may be declared or paid on the Company’s Common Stock.

Issuer Purchases of Equity Securities

The Company’s stock repurchase program was publicly announced by the Board of Directors on February 3, 1995 and has no expiration date. Under this program, a total of 86,956,264 shares of the Company’s Common Stock have been authorized for repurchase. The following table shows the share repurchases made for the three months ended September 30, 2024.

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs
July 1, 2024 to July 31, 2024	1,551	\$ 34.69	—	11,501,005
August 1, 2024 to August 31, 2024	3,016	33.80	—	11,501,005
September 1, 2024 to September 30, 2024	2,607	36.08	—	11,501,005
Total	7,174	\$ 34.82	—	11,501,005

Performance Graphs

The following graphs compare the cumulative total return to WaFd shareholders (stock price appreciation plus reinvested dividends) to the cumulative total return of the Nasdaq Stock Market Index (U.S. Companies) and the KBW Bank Index for the five year period ended September 30, 2024, and since WaFd first became a publicly traded company on November 9, 1982, respectively. The graphs assume that \$100 was invested on September 30, 2019, and November 9, 1982, respectively, in WaFd Common Stock, the Nasdaq Stock Market Index and the Nasdaq Financial Stocks Index, and that all dividends were reinvested. Management of WaFd cautions that the stock price performance shown in the graphs below should not be considered indicative of potential future stock price performance.

Item 6. [Reserved]

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

This discussion should be read in conjunction with our Consolidated Financial Statements and related notes in “Item 8. Financial Statements and Supplementary Data” of this report. In the following discussion, unless otherwise noted, references to increases or decreases in average balances in items of income and expense for a particular period and balances at a particular date refer to the comparison with corresponding amounts for the period or date for the previous year.

In addition to historical financial information, the following discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of many factors, including those discussed under “Risk Factors” and elsewhere in this Annual Report on Form 10-K. This section of this Form 10-K generally discusses 2024 and 2023 items and year-to-year comparisons between 2024 and 2023. For management's review of the factors that affected our results of operations for the years ended September 30, 2023 and 2022, refer to our Annual Report on Form 10-K for the year ended September 30, 2023, which was filed with the Securities and Exchange Commission on November 17, 2023.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to use judgment in making estimates and assumptions that affect the reported amounts within the consolidated financial statements. Actual results may differ from these estimates. While our significant accounting policies are described in more detail in [Note A](#) to the Consolidated Financial Statements, we believe that the accounting policies discussed below are critical for understanding our historical and future performance. Critical accounting policies and estimates are those that we consider the most important to the portrayal of our financial condition and results of operations because they require our most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of the matters that are inherently uncertain.

Allowance for Credit Losses. Management's determination of the amount of the ACL is a critical accounting estimate as it requires significant reliance on the credit risk we ascribe to individual borrowers, the use of estimates and significant judgment as to the amount and timing of expected future cash flows on individually evaluated loans, significant reliance on historical loss rates on homogeneous portfolios, consideration of our quantitative and qualitative evaluation of past events, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amounts.

Going forward, the methodology used to calculate the ACL will be significantly influenced by the composition, characteristics and quality of our loan portfolio, as well as the prevailing economic conditions and forecasts utilized. Material changes to these and other relevant factors may result in greater volatility to the allowance for credit losses, and therefore, greater volatility in our reported earnings.

Business Combinations. The Company applies the acquisition method of accounting for business combinations. Under the acquisition method, the acquiring entity recognizes the assets acquired and liabilities assumed at their acquisition date fair values. Management utilizes prevailing valuation techniques appropriate for the asset or liability being measured in determining these fair values. This method often involves estimates based on third party valuations based on discounted cash flow analyses or other valuation techniques, all of which are inherently subjective. Any excess of the purchase price over the fair value of net assets and other identifiable intangible assets acquired is recorded as goodwill.

Assets acquired and liabilities assumed from contingencies must also be recognized at fair value if the fair value can be determined during the measurement period. Acquisition-related costs, including conversion and restructuring charges, are expensed as incurred. Fair values are subject to refinement over the measurement period, not to exceed one year after the closing date.

Management uses various valuation methodologies to estimate the fair value of acquired assets and liabilities which often involve a significant degree of judgement. Changes in the assumptions utilized within these valuations, including downturns in economic or business conditions, could have a significant adverse impact on the carrying value of assets which could result in impairment losses affecting the Company's financial statements as a whole.

Goodwill. Goodwill represents the excess of the acquisition consideration over the fair value of assets acquired and liabilities assumed. We have determined our goodwill balance is all related to a single reporting unit and perform an annual impairment assessment on August 31st, or sooner if an impairment indicator exists. We perform a quantitative impairment assessment and, upon performing the quantitative test, if the carrying value of the reporting unit exceeds its fair value, an impairment loss is recognized in an amount equal to that excess.

When performing the quantitative assessment of goodwill impairment, we estimate the fair value of our reporting unit using the market capitalization approach, based on quoted market prices of our securities, adjusted for the effect of a control premium. Based on the results of the annual quantitative evaluation for 2024, the fair value of our single reporting unit exceeded its respective carrying value and did not result in impairment for the reporting unit.

The Company continuously monitors for events and circumstances that could negatively impact the key assumptions in determining fair value. While the Company believes the judgments and assumptions used in the goodwill impairment test are reasonable, different assumptions or changes in general industry, market and macro-economic conditions could change the estimated fair values and, therefore, future impairment charges could be required, which could be material to the consolidated financial statements.

Select information regarding the ACL is under the "Allowance for Credit Losses" heading within this section below. For further details on the ACL, business combinations or goodwill, see [Notes A, B, and E to the Consolidated Financial Statements in "Item 8. Financial Statements and Supplementary Data."](#)

ALLOWANCE FOR CREDIT LOSSES

The following table provides detail regarding the Company's allowance for credit losses.

Twelve Months Ended September 30,	2024	2023	2022	2021	2020
	(In thousands)

Commercial & industrial	58,748	58,773	(25)	— %
Construction	22,267	29,408	(7,141)	(24)%
Land - acquisition & development	7,900	7,016	884	13 %
Total commercial loans	153,373	137,194	16,179	12 %
Consumer loans				
Single-family residential	40,523	28,029	12,494	45 %
Construction - custom	1,427	2,781	(1,354)	(49)%
Land - consumer lot loans	2,564	3,512	(948)	(27)%
HELOC	3,049	2,859	190	7 %
Consumer	2,817	2,832	(15)	(1)%
Total consumer loans	50,380	40,013	10,367	26 %
Total allowance for loan losses	203,753	177,207	26,546	15 %
Reserve for unfunded commitments	21,500	24,500	(3,000)	(12)%
Total allowance for credit losses	\$ 225,253	\$ 201,707	\$ 23,546	12 %

The allowance for loan losses increased by \$26,546,000, or 14.98%, from \$177,207,000 as of September 30, 2023, to \$203,753,000 at September 30, 2024. As of September 30, 2024, the allowance of \$203,753,000 is for loans that are evaluated on a pooled basis, which was comprised of \$144,848,000 related to the quantitative component and \$58,905,000 related to management's qualitative overlays. The fluctuations that resulted in the overall increase from the prior year can be seen in the table above. The allowance for multi-family and single-family residential loans increased largely as a result of the Merger. The allowance for both consumer and commercial construction loans decreased as projects were completed and transitioned to CRE and single-family loans which also contributed to increases.

The Company recorded a provision for credit losses of \$17,500,000 in 2024, compared to a provision of \$41,500,000 for 2023. These amounts are net of provision and recapture related to the unfunded commitments reserve. In 2024, provisioning included the initial provision of \$16,000,000 recorded on LBC loans acquired, as well as adjustments resulting from qualitative considerations such as prolonged and intensified borrower sensitivity to high interest rates and operating costs due to inflationary pressures. For the year ended September 30, 2024, net charge-offs were \$1,356,000, compared to charge-offs of \$45,101,000 in the prior year. The ratio of the total ACL to total gross loans decreased to 1.01% as of September 30, 2024, as compared to 1.03% as of September 30, 2023. The decrease was primarily related to a shift in mix of loan types within the portfolio. Loan portfolios with lower historical losses, like multi-family and single family residential saw increased balances as a result of the Merger while those with higher historical losses, like construction, saw decreases.

The reserve for unfunded loan commitments was \$21,500,000 as of September 30, 2024, compared to \$24,500,000 as of September 30, 2023.

Management believes the total ACL is sufficient to absorb estimated losses inherent in the portfolio of loans and unfunded commitments.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following table sets forth the amount of the Bank's allowance for loan losses by loan portfolio and class.

(1) Represents the loans receivable for each respective loan class as a % of total loans receivable.

(2) Represents the allowance for each respective loan class as a % of loans receivable for that same loan class. The underlying commercial & industrial loan balances for September 30, 2023, 2022, 2021, 2020 include PPP loans for which no allowance was recorded. These PPP loan balances were \$1,000,000, \$10,000,000, \$312,000,000 and \$745,000,000 as of September 30, 2023, 2022, 2021 and 2020 respectively.

(3) This does not include a reserve for unfunded commitments of \$21,500,000, \$24,500,000, \$32,500,000, \$27,500,000 and \$25,000,000 as of September 30, 2024, 2023, 2022, 2021 and 2020, respectively.

ASSET QUALITY

Modifications to Borrowers Experiencing Financial Difficulty. Loans may be modified as the result of borrowers experiencing financial difficulty needing relief from the contractual terms of their loan. Most loan modifications to borrowers experiencing financial difficulty are accruing and performing loans where the borrower has approached the Bank about modification due to temporary financial difficulties. Each request for modification is individually evaluated for merit and likelihood of success. Often a term extension is needed in the short term in order to evaluate the need for further corrective action. Payment delays and interest-only payments may also be approved during the modification period. Principal forgiveness is not an available option for restructured loans.

Non-Performing Assets. When a borrower violates a condition of a loan, the Bank attempts to cure the default by contacting the borrower. In most cases, defaults are cured promptly. If the default is not cured within an appropriate time frame, typically 90 days, the Bank may institute appropriate action to collect the loan, such as making demand for payment or initiating foreclosure proceedings on the collateral. If foreclosure occurs, the collateral will typically be sold at public auction and may be purchased by the Bank.

Loans are placed on non-accrual status when, in the judgment of management, the probability of collecting interest or principal is deemed to be insufficient to warrant further accrual. When a loan is placed on non-accrual status, previously accrued but unpaid interest is deducted from interest income. The Bank does not accrue interest on loans 90 days past due or more. See Note A to the Consolidated Financial Statements included in Item 8 hereof for additional information.

For commercial loans, six consecutive payments on newly restructured loan terms are generally required prior to returning the loan to accrual status. In some instances after the required six consecutive payments are made, a management assessment will conclude that collection of the entire principal balance is still in doubt. In those instances, the loan will remain on non-accrual. Homogeneous loans may or may not be on accrual status at the time of restructuring, but all are placed on accrual status upon the restructuring of the loan.

Real estate acquired by foreclosure or deed-in-lieu thereof ("REO" or "Real Estate Owned") is classified as real estate held for sale. When property is acquired, it is recorded at the fair market value less estimated selling costs at the date of acquisition. Interest accrual ceases on the date of acquisition and all costs incurred in maintaining the property from that date forward are expensed as incurred. Costs incurred for the improvement or development of such property are capitalized. See Note A to the Consolidated Financial Statements included in Item 8 hereof for additional information.

The following table sets forth information regarding the Bank's non-performing assets.

September 30,	2024	2023	2022	2021	2020

Total non-performing assets to total assets	0.28 %	0.26 %	0.21 %	0.22 %	0.20 %

- (1) For the year ended September 30, 2024, the Bank recognized \$1,775,000 in interest income on cash payments received from borrowers on non-accrual loans. The Bank would have recognized interest income of \$3,081,000 for the same period had these loans performed according to their original contract terms. The recognized interest income may include more than twelve months of interest for some of the non-accrual loans that were brought current or paid off. In addition to the non-accrual loans reflected in the above table, the Bank had \$356,893,000 of loans that were less than 90 days delinquent at September 30, 2024 but were classified as substandard for one or more reasons. If these loans were deemed non-performing, the Company's ratio of total non-performing assets and performing restructured loans as a percent of total assets would have increased to 1.55% at September 30, 2024. For a discussion of the Bank's policy for placing loans on non-accrual status, see Note A to the Consolidated Financial Statements included in Item 8 of this report.

Non-performing assets increased 33.7% to \$77,418,000, or 0.28% of total assets, at September 30, 2024, compared to \$57,924,000, or 0.26% of total assets, at September 30, 2023. The increase was primarily a result of an increase of \$19,119,000 in non-accrual loans partially offset by a \$418,000 increase in real estate owned. Other property owned of \$3,310,000 as of September 30, 2024 is comprised entirely of a government guarantee related to equipment obtained via a commercial loan foreclosure.

As of September 30, 2024, real estate owned totaled \$4,567,000, an increase of \$418,000, or 10.1%, from \$4,149,000 as of September 30, 2023. During 2024, the Bank sold real estate owned properties for total net proceeds of \$6,802,000. The majority of REO properties are former bank premises that are expected to be sold.

The ratio of the allowance for loan losses to non-accrual loans decreased to 293% as of September 30, 2024, from 351% as of September 30, 2023.

CHANGES IN FINANCIAL CONDITION

Cash and cash equivalents: Cash and cash equivalents increased to \$2,381,102,000 at September 30, 2024, as compared to \$980,649,000 at September 30, 2023. This increase reflects cash received from LBC as a result of the Merger combined with cash received from the recent LBC multi-family and LBC single-family residential loan portfolio sales, offset by pay-downs on borrowings.

Available-for-sale investment securities: Available-for-sale securities increased \$577,612,000, or 29.0%, during the year ended September 30, 2024, to \$2,572,709,000, due to the addition of \$516,308,000 in AFS investments obtained in the Merger combined with normal investing activity. During this time, the Bank had purchases of \$549,159,000 offset by principal repayments and maturities of \$386,564,000 and sales of \$182,682,000. As of September 30, 2024, the Company had a net unrealized loss on available-for-sale securities of \$44,168,000, which is recorded net of tax within AOCI, compared to an unrealized loss of \$123,519,000 as of September 30, 2023.

Substantially all of the Company’s AFS debt securities are issued by U.S. government agencies or U.S. government-sponsored enterprises. These securities carry the explicit and/or implicit guarantee of the U.S. government and have a long history of zero credit loss. The remaining securities are issued by highly-rated municipalities or corporate borrowers. The Company does not believe that any of its AFS debt securities have credit loss impairment as of September 30, 2024, therefore, no allowance was recorded. The impact going forward will depend on the composition, characteristics, and credit quality of the securities portfolios as well as the economic conditions at future reporting periods.

Held-to-maturity investment securities: Held-to-maturity securities increased by \$13,386,000 to \$436,972,000, or 3.2%, during the year ended September 30, 2024, largely due to the purchase of \$47,092,000 of HTM securities. These purchases were offset by principal repayments and maturities of \$36,013,000 during the period. The increase also included \$2,570,000 in HTM securities obtained in the Merger. There were no held-to-maturity securities sold during the year ended September 30, 2024. As of September 30, 2024, the net unrealized loss on held-to-maturity securities was \$35,926,000, compared to \$68,398,000 the year prior, which management attributes to the change in interest rates since acquisition.

Substantially all of the Company’s HTM debt securities are issued by U.S. government agencies or U.S. government-sponsored enterprises. These securities carry the explicit and/or implicit guarantee of the U.S. government and have a long history of zero credit loss, thus the Company did not record an allowance for credit losses for HTM securities as of September 30, 2024. The impact going forward will depend on the composition, characteristics, and credit quality of the securities portfolios as well as the economic conditions at future reporting periods.

The table below shows the available-for-sale and held-for-investment securities portfolios categorized by contractual maturity band.

September 30, 2024	Amortized Cost	Weighted Average Yield
	(\$ in thousands)	
Due in less than 1 year	\$ 49,384	4.70 %
Due after 1 year through 5 years	354,344	5.12
Due after 5 years through 10 years	484,630	4.99
Due after 10 years	2,165,491	4.47
	\$ 3,053,849	4.63 %

For further information on our investment portfolio, see Note C to the Consolidated Financial Statements in “Item 8. Financial Statements and Supplementary Data” of this report.

Loans receivable: Loans receivable, net of related contra accounts, increased \$3,439,804,000, or 19.7%, to \$20,916,354,000 at September 30, 2024, from \$17,476,550,000 one year earlier. The increase resulted primarily from the addition of loans obtained in the Merger. The balance change also reflects originations of \$3,632,071,000, a decrease to loans-in-process of \$886,142,000 and principal repayments of \$4,302,359,000 during the year ended September 30, 2024. Commercial loan originations

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

accounted for 72.5% of total originations and consumer originations were 27.5% as the Bank continues to focus on commercial lending, coupled with growing economies in all major markets in which we operate.

The following table presents loan balances by category and the year-over-year change.

The contractual loan payment period for residential mortgage loans originated by the Bank normally ranges from 15 to 30 years. Experience during recent years has indicated that, because of prepayments in connection with refinancing and sales of property, residential loans typically have a weighted average life of approximately eight years.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following tables provide information regarding loans receivable by loan class and geography.

September 30, 2024	Multi-family	Commercial Real Estate	Commercial and Industrial	Construction	Land - A & D	Single - Family Residential	Construction - custom	Land - Lot Loans	Consumer	HELOC	Total

(1) Includes loans from outside of our nine state footprint.

Allowance for credit losses: For details, see the "Allowance for Credit Losses" section above in this report.

Non-performing assets: For details, see the "Asset Quality" section above in this report.

Real estate owned: For details, see the "Asset Quality" section above in this report.

Interest receivable: Interest receivable was \$102,827,000 as of September 30, 2024, an increase of \$15,824,000, or 18.2%, since September 30, 2023. The increase was the result of a 19.7% increase in loans receivable combined with the increase in interest rates.

Bank Owned Life Insurance: Bank-owned life insurance increased to \$267,633,000 as of September 30, 2024 from \$242,919,000 as of September 30, 2023, primarily as a result of policies obtained in the Merger. The investments in bank-owned life insurance serve to assist in funding growing employee benefit costs.

Intangible assets: The Bank's intangible assets totaled \$448,425,000 at September 30, 2024 compared to \$310,619,000 as of September 30, 2023. The increase is largely the result of the Merger which created \$104,707,000 in Goodwill and a Core Deposit Intangible balance of \$37,022,000. The balance at September 30, 2024 is comprised of \$411,360,000 of goodwill and the unamortized balance of the core deposit and other intangibles of \$37,065,000.

Customer accounts: As of September 30, 2024, customer deposits totaled \$21,373,970,000 compared with \$16,070,329,000 at September 30, 2023, a \$5,303,641,000, or 33.0%, increase largely due to deposits obtained in the Merger. During 2024, transaction accounts increased by \$1,051,872,000 or 9.8% while time deposits increased by \$4,251,769,000 or 80.1% as 66% of the LBC customer accounts were time deposits.

The following table shows customer deposits by account type.

(\$ in thousands)	September 30, 2024			September 30, 2023

5.00% and higher	153,429	710	306,963	316,598	—	99,944	877,644
Total	<u>\$ 2,923,299</u>	<u>\$ 3,140,279</u>	<u>\$ 2,543,201</u>	<u>\$ 814,546</u>	<u>\$ 23,160</u>	<u>\$ 112,300</u>	<u>\$ 9,556,785</u>

Historically, a significant number of time deposit account holders roll over their balances into new time deposits of the same term at the Bank's then current rate. To ensure a continuity of this trend, the Bank expects to continue to offer market rates of interest. The ability to retain maturing time deposits is difficult to project; however, the Bank believes that by competitively pricing these certificates, roll-over levels deemed appropriate by management can be achieved on a continuing basis.

At September 30, 2024, the Bank had \$4,024,661,000 of time deposits in amounts of \$250,000 or more outstanding, maturing as follows: \$1,057,121,000 within 3 months; \$1,277,315,000 over 3 months through 6 months; \$1,030,587,000 over 6 months through 12 months; and \$659,638,000 thereafter.

Time deposits with a maturity of one year or less have penalties for premature withdrawal equal to 90 days of interest. When the maturity is greater than one year but less than four years, the penalty is 180 days of interest. When the maturity is greater than four years, the penalty is 365 days of interest. Early withdrawal penalty fee income for the years ended 2024, 2023 and 2022 amounted to \$1,082,000, \$1,618,000 and \$267,000, respectively.

For additional details on customer accounts, including uninsured deposits, see Note K to the Consolidated Financial Statements in “Item 8. Financial Statements and Supplementary Data” of this report.

Borrowings: Total borrowings decreased to \$3,267,589,000 as of September 30, 2024, as compared to \$3,650,000,000 at September 30, 2023. The weighted average rate for borrowings was 3.93% as of September 30, 2024, versus 3.98% at September 30, 2023, the decrease being primarily due to higher rates on new short-term borrowings. The Bank has entered into interest rate swaps to hedge interest rate risk and convert certain FHLB advances to fixed rate payments. Taking into account these hedges, the weighted average effective maturity of FHLB advances at September 30, 2024 was 2.34 years.

RESULTS OF OPERATIONS

COMPARISON OF 2024 RESULTS WITH 2023

Net Income: Net income decreased \$57,385,000, or 22.3%, to \$200,041,000 for the year ended September 30, 2024, as compared to \$257,426,000 for the year ended September 30, 2023. The change was due to the factors described below.

Net Interest Income: For the year ended September 30, 2024, net interest income was \$660,832,000, a decrease of \$29,402,000 or 4.3% from the year ended September 30, 2023. Net interest margin was 2.69% for the year ended September 30, 2024 compared to 3.40% in the prior year. The decrease was the result of the combination of greater growth in interest-bearing liabilities balances than in interest-paying assets and a larger increase in the rate paid on those liabilities compared to the rates earned on interest-earning assets. Average interest-bearing liabilities grew by 27.2% while average interest-earning assets grew by 20.8%. Rates on interest-bearing liabilities increased by 128 basis points outpacing the 46 basis points increase in the average rate on interest-earning assets.

Rate/Volume Analysis

The table below sets forth certain information regarding changes in interest income and interest expense of the Company for the years indicated. For each category of interest-earning asset and interest-bearing liability, information is provided on changes attributable to: (1) changes in volume (changes in volume multiplied by old rate) and (2) changes in rate (changes in rate multiplied by old average volume). The change in interest income and interest expense attributable to changes in both volume and rate has been allocated proportionately to the change due to volume and the change due to rate.

(1) Includes interest on cash equivalents and dividends on stock of the FHLB of Des Moines, the FHLB of San Francisco and FRB of San Francisco.

Provision for Credit Losses: The Company recorded a provision for credit losses of \$17,500,000 in 2024, compared to a provision of \$41,500,000 for 2023. In 2024, the provision included the initial provision of \$16,000,000 recorded on LBC loans acquired, as well as adjustments resulting from qualitative considerations such as prolonged and intensified borrower sensitivity to high interest rates and operating costs due to inflationary pressures. For the year ended September 30, 2024, net charge-offs were \$1,356,000, compared to \$45,101,000 in the prior year.

Non-interest Income: Non-interest income was \$60,692,000 for the year ended September 30, 2024, an increase of \$8,491,000, or 16.3%, from \$52,201,000 for the year ended September 30, 2023. The increase in other income is primarily due to increased income from the Company's subsidiary, WAFD Insurance Group combined with a decrease in unrealized losses recorded for certain equity method investments in fiscal 2024 compared to the prior year. The reduced losses on the equity method investment made up \$2,371,000 of the overall increase.

Non-interest Expense: Total non-interest expense was \$448,272,000 for the year ended September 30, 2024, an increase of \$72,237,000, or 19.2%, from the \$376,035,000 for the year ended September 30, 2023. Compensation and benefits costs increased \$37,614,000 or 19.1% year-over-year primarily due to Merger-related retention, severance and change-in-control expenses combined with a larger post-Merger workforce. FDIC premiums increased \$8,845,000 in 2024 compared to the prior year as a result of both the FDIC's special assessment and the Company's increased size post-Merger. Information technology costs increased by \$3,859,000 in 2024 as compared to 2023 due to increased telephone and data lines combined with conversion costs and termination fees related to the Merger. Other expense increased by \$18,449,000 and included Merger-related expenses of \$8,873,000, a \$2,000,000 charitable donation and \$6,626,000 in amortization expense related to the core deposit intangible asset created in the Merger.

The Company's efficiency ratio was 62.1% for 2024 as compared to 50.7% for the prior year. The number of staff, including part-time employees on a full-time equivalent basis, was 2,208 and 2,120 at September 30, 2024 and 2023, respectively. Total operating expense for the years ended September 30, 2024, and 2023 were 1.71% and 1.74%, respectively, of average assets.

Gain on Real Estate Owned: Gain on real estate owned, net was \$304,000 for the year ended September 30, 2024, compared to of \$176,000 for the year ended September 30, 2023. This amount includes ongoing maintenance expense, periodic valuation adjustments, and gains on sales of REO.

Income Tax Expense: Income tax expense was \$56,015,000 for the year ended September 30, 2024, a decrease of \$11,635,000, or 17.2%, from the \$67,650,000 for the year ended September 30, 2023. The decrease is mostly due to an 21.2% decrease in pre-tax income. The effective tax rate for 2024 was 21.88% as compared to 20.81% for the year ended September 30, 2023. The Company's effective tax rate varies from the Federal statutory rate of 21% mainly due to state taxes, tax-exempt income and tax-credit investments. For the current year, income tax was also impacted by the LBC Merger and consideration of California State and Local taxes.

COMPARISON OF 2023 RESULTS WITH 2022

For management's review of the factors that affected our results of operations for the years ended September 30, 2023 and 2022 refer to our Annual Report on Form 10-K for the year ended September 30, 2023, which was filed with the Securities and Exchange Commission on November 17, 2023.

LIQUIDITY AND CAPITAL RESOURCES

The principal sources of funds for the Company's activities are loan repayments (including prepayments), net deposit inflows, borrowings, repayments and sales of investments and retained earnings, if applicable. The Company's principal sources of revenue are interest on loans and interest and dividends on investments. Additionally, the Company earns fee income for loan, deposit, insurance and other services.

On February 8, 2021, in connection with an underwritten public offering, the Company issued 300,000 shares of 4.875% Noncumulative Perpetual Series A Preferred Stock ("Series A Preferred Stock"). Net proceeds, after underwriting discounts and expenses, were \$293,325,000. The public offering consisted of the issuance and sale of 12,000,000 depositary shares, each representing a 1/40th interest in a share of the Series A Preferred Stock, at a public offering price of \$25.00 per depositary share. Holders of the depositary shares are entitled to all proportional rights and preferences of the Series A Preferred Stock (including dividend, voting, redemption and liquidation rights). The depositary shares are traded on the NASDAQ under the symbol "WAFDP." The Series A Preferred Stock is redeemable at the option of the Company, subject to all applicable regulatory approvals, on or after April 15, 2026.

The Company's shareholders' equity at September 30, 2024, was \$3,000,300,000, or 10.69% of total assets, as compared to \$2,426,426,000, or 10.80% of total assets, at September 30, 2023. The Company's shareholders' equity was greatly impacted in the year by the stock issued in the Merger valued at \$465,504,000. Other items affecting shareholders' equity were net income of \$200,041,000, the payment of \$74,267,000 in Common Stock dividends, payment of \$14,625,000 in preferred stock dividends, \$27,069,000 of treasury stock purchases, as well as other comprehensive loss of \$8,930,000. The Company paid out 41.2% of its 2024 earnings in cash dividends to common shareholders, compared with 26.6% last year. For the year ended September 30, 2024, the Company returned 50.7% of net income to shareholders in the form of cash dividends and share repurchases as compared to 36.6% for the year ended September 30, 2023. Management believes the Company's strong net worth position allows it to manage balance sheet risk and provide the capital support needed for controlled growth in a regulated environment. The Company's share repurchase program may be modified, suspended or terminated at any time, and the timing and amount of share repurchases is subject to market conditions and the market price of the Company's Common Stock, as well as other factors.

The Bank has a credit line with the FHLB - DM of up to 45% of total assets depending on specific collateral eligibility. This line provides the Bank a substantial source of additional liquidity. The Bank has entered into borrowing agreements with the FHLB - DM to borrow funds under a short-term floating rate cash management advance program and fixed-rate term loan agreements. All borrowings are secured by stock of the FHLB - DM, deposits with the FHLB - DM, and a blanket pledge of qualifying loans receivable. The Bank also has a credit line with the FHLB - SF in support of LBC borrowings from the FHLB - SF, but the Bank is unable to take down new advances against this line. The FHLB - SF credit line is secured by a line-item

pledge of single-family residential mortgages that are specifically identified. Based on collateral pledged as of September 30, 2024, the Bank had \$6,029,890,000 of additional borrowing capacity at the FHLB - DM.

To ensure ample contingent liquidity the Bank participates in the FRB of San Francisco Borrower-in-Custody program which collateralizes primary credit borrowings and serves as a backstop for the FHLB - DM credit line. Due to differing program requirements between the FHLB - DM and FRB of San Francisco, participating in both increases the amount of eligible collateral that may be pledged in support of contingent liquidity needs. The Bank is also eligible to borrow under the Federal Reserve Bank's primary credit program. The Bank elected to utilize the Federal Reserve's Bank Term Funding Program ("BTFP") to leverage its highly favorable terms to fortify the Bank's liquidity position. These borrowings are repayable at any time without penalty and are currently the lowest cost funding source available. The Federal Reserve ceased making new BTFP loans on March 11, 2024.

The Company's cash and cash equivalents were \$2,381,102,000 at September 30, 2024, which is a 142.8% increase from the balance of \$980,649,000 as of September 30, 2023. During the year, the Company completed the sale of approximately \$2,800,000,000 in multifamily loans and approximately \$400,000,000 in single-family loans from the acquired LBC loan portfolio. The proceeds from the sales have increased liquidity adding approximately \$1 billion in cash after paying down borrowings. See "Changes in Financial Condition" above and the "Statement of Cash Flows" included in the financial statements for additional details regarding this change.

The following table presents the Company's significant fixed and determinable contractual obligations, within the categories described below, by contractual maturity or payment amount.

September 30, 2024	Total	Less than 1 Year	1 to 5 Years	Over 5 Years
(In thousands)				
Customer accounts (1)	\$ 21,373,970	\$ 20,423,963	\$ 949,943	\$ 64
Debt obligations (2)	3,318,307	3,174,068	93,521	50,718
Operating lease obligations	49,250	11,786	23,021	14,443
	<u>\$ 24,741,527</u>	<u>\$ 23,609,817</u>	<u>\$ 1,066,485</u>	<u>\$ 65,225</u>

(1) Includes non-maturing customer transaction accounts.

(2) Represents contractual maturities of FHLB advances and FRB borrowings. Taking into account cash flow hedges, the weighted average effective maturity of FHLB advances at September 30, 2024 is 2.34 years.

These obligations are included in the Consolidated Statements of Financial Condition. The payment amounts of the operating lease obligations represent those amounts contractually due.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

INTEREST RATE RISK

The primary source of income for the Bank is net interest income, which is the difference between the interest income generated by interest-earning assets and the interest expense incurred for interest-bearing liabilities. The level of net interest income is a function of the average balance of interest-earning assets and interest-bearing liabilities and the difference between the yield on earning assets and the cost of interest-bearing liabilities. Both the pricing and mix of the Company's interest-earning assets and interest-bearing liabilities influence these factors. All else being equal, if the interest rates on the Company's interest-bearing liabilities increase at a faster pace than the interest rates on its interest-earning assets, the result would be a reduction in net interest income and with it, a reduction in net earnings. Conversely, if the interest rates on the Company's interest-bearing liabilities decrease at a slower pace than the interest rates on its interest-earning assets, the result would be a reduction in net interest income and with it, a reduction in net earnings.

Interest rates, both in terms of their overall levels and volatility, can greatly influence our profitability. Our goal in managing interest rate risk is to assess and control how changes in interest rates affect our net interest income, helping us achieve our financial objectives. We mitigate exposure to interest rate fluctuations through actions determined by the Asset/Liability Management Committee ("ALCO"). This committee meets at least quarterly to establish asset/liability management policies, develop and implement strategies to enhance balance sheet positioning and earnings, and assess interest rate sensitivity. The Company's Board oversees the asset/liability management process, reviews interest rate risk analyses prepared by ALCO, and annually approves the Financial Management policy.

Interest rate risk arises in part due to the Bank's significant holdings of fixed-rate single-family home loans, which are longer-term than customer accounts that constitute its primary liabilities. Accordingly, assets do not usually respond as quickly to changes in interest rates as liabilities. In the absence of management action, net interest income can be expected to decline when interest rates rise and to expand when interest rates fall. Shortening the maturity or repricing of the investment portfolio is one action that management can take. The composition of the investment portfolio was 53.8% variable rate and 46.2% fixed rate as of September 30, 2024 to provide some protection against changing rates. In addition, the Bank is producing more commercial loans that have shorter terms and/or variable rates. There has also been focus on increasing less rate sensitive transaction deposit accounts. These accounts make up 55.3% of the deposit portfolio as of September 30, 2024.

The Company's balance sheet strategy, in conjunction with low operating costs, has allowed the Company to manage interest rate risk, within guidelines established by the Board, through all interest rate cycles. It is Management's objective to grow the dollar amount of net interest income, through the rate cycles, acknowledging that there will be some periods of time when that will not be feasible. Cash and cash equivalents of \$2,381,102,000 and shareholders' equity of \$3,000,300,000 provide management with flexibility in managing interest rate risk. Based on management's assessment of the current interest rate environment, the Company has taken steps, including growing commercial loans having shorter average lives and transaction deposit accounts, to position itself for changing interest rates.

Net Interest Income Sensitivity. We estimate the sensitivity of our net interest income to changes in market interest rates using an interest rate simulation model that includes assumptions related to the level of balance sheet growth, deposit repricing characteristics and the rate of prepayments for multiple interest rate change scenarios. Interest rate sensitivity depends on certain repricing characteristics in our interest-earning assets and interest-bearing liabilities, including the maturity term structure, contractual rate changes and prepayment/attrition characteristics of assets and liabilities, all of which vary with changes in market interest rates. The analysis presented below assumes a constant balance sheet. Actual results would differ from the assumptions used in this model, as management monitors and adjusts loan and deposit pricing and the composition and overall size of the balance sheet to respond to changing interest rates.

In the event of an immediate and parallel decrease of 200 basis points across all interest rates, the model estimates that net interest income would decrease 1.0% in the next year. This compares to an estimated increase of 7.8% for the same measure as of September 30, 2023. It is noted that a steepening yield curve where the spread between short-term rates and long-term rates increases would likely result in higher net interest income.

In the event of an immediate and parallel increase of 200 basis points across all interest rates, the model estimates that net interest income would increase by 2.8% in the next year. This compares to an estimated decrease of 2.0% for the same measure as of September 30, 2023.

Net Portfolio Value ("NPV") Sensitivity. The NPV is an estimate of the market value of shareholders' equity at a point in time. It is derived by calculating the difference between the present value of expected cash flows from assets and the present value of expected cash flows from liabilities and off-balance-sheet contracts. The sensitivity of the NPV to changes in interest rates provides a longer-term view of interest rate risk of the current balance sheet as it incorporates all future expected cash flows.

As of September 30, 2024, in the event of an immediate and parallel decrease of 200 basis points in interest rates, the NPV is estimated to increase by \$273,000,000, or 9.2%, and the NPV-to-total assets ratio to increase to 11.6% from a base of 11.0%. As of September 30, 2023, in the event of an immediate and parallel decrease of 200 basis points in interest rates, the NPV was estimated to increase by \$583,000,000, or 22.1%, and the NPV-to-total assets ratio to increase to 14.3% from a base of 12.4%. The change in the sensitivity of the NPV ratio to this assumed change in interest rates is primarily due to the steepening of the yield curve and changes in balance sheet mix year over year. Prepayment speeds for single family mortgages are increasing though still low at September 30, 2024 with the Bank's conditional payment rate ("CPR") for this portfolio segment at 8.6%, up slightly from 7.0% the year before.

As of September 30, 2024, in the event of an immediate and parallel increase of 200 basis points in interest rates, the NPV is estimated to decrease by \$741,000,000, or 24.9%, and the NPV-to-total assets ratio to decline to 8.7% from a base of 11.0%. As of September 30, 2023, in the event of an immediate and parallel increase of 200 basis points in interest rates, the NPV was estimated to decrease by \$723,000,000, or 27.4%, and the NPV-to-total assets ratio to decline to 9.5% from a base of 12.4%. Opposite to the down scenario above, this change in the sensitivity of the NPV ratio to the assumed change in interest rates is due to the flattening of the yield curve and changes in balance sheet mix year over year in this scenario.

Interest Rates. The Company measures the difference between the rate on interest-earning assets and the rate on interest-bearing liabilities at the end of each period. The period end interest rate spread was 1.91% at September 30, 2024 and 2.61% at September 30, 2023. As of September 30, 2024, the weighted-average rate on interest-earning assets increased by 4 basis points to 5.11% compared to September 30, 2023. The higher rate on interest-earning assets is due primarily to the Federal Reserve Bank's rate increases from March 2022 until September 2024, which have led to higher rates on adjustable rate loans, investment securities and cash as well as asset mix shifting to loans receivable. As of September 30, 2024, the weighted-average rate on interest-bearing liabilities increased by 74 basis points to 3.20% compared to September 30, 2023. The higher rate on interest-bearing liabilities primarily resulted from the addition of higher yielding deposits in the Merger which also had a higher concentration of the rate sensitive time deposits, customer deposits repricing and higher rates on new borrowings. The period end interest rate spread for the last eight fiscal quarters is shown below:

	SEP 2024	JUN 2024	MAR 2024	DEC 2023	SEP 2023	JUN 2023	MAR 2023	DEC 2022
Interest rate on loans and mortgage-backed securities	5.16 %	5.18 %	4.94 %	5.11 %	5.08 %	4.97 %	4.81 %	4.59 %
Interest rate on other interest-earning assets	4.85	5.13	5.02	4.94	4.98	4.74	4.45	3.19
Combined, all interest-earning assets	5.11	5.17	4.94	5.09	5.07	4.94	4.77	4.46
Interest rate on customer accounts	3.09	2.91	2.92	2.35	2.12	1.82	1.48	0.94
Interest rate on borrowings (1)	3.93	4.10	4.48	3.99	3.98	3.93	3.69	3.14
Combined cost of funds	3.20	3.10	3.24	2.67	2.46	2.22	1.91	1.29
Interest rate spread	1.91 %	2.07 %	1.70 %	2.42 %	2.61 %	2.72 %	2.86 %	3.17 %

(1) Represents the effective rate taking into consideration cash flow hedges on FHLB borrowings.

The chart below shows the volatility of our period end net interest spread (dashed line measured against the right axis) compared to the relatively consistent growth in net interest income (solid line measured against the left axis). The relative consistency of net interest income is accomplished by actively managing the size and composition of the balance sheet through different rate cycles.

Net Interest Margin. The net interest margin is measured using net interest income divided by average interest-earning assets for the period. The net interest margin decreased to 2.69% for the year ended September 30, 2024, from 3.40% for the year ended September 30, 2023. The yield on interest-earning assets increased 46 basis points to 5.59% and the cost of interest-bearing liabilities increased by 128 basis points to 3.46%. The higher yield on interest-earning assets was primarily due to the impact of rising rates on adjustable rate assets and cash. The higher rate in interest-bearing liabilities was primarily due to higher rates on interest-bearing customer accounts combined with the higher interest rates on borrowings and customer accounts obtained in the Merger.

For the year ended September 30, 2024, average interest-earning assets increased by 20.8% to \$24,559,665,000, up from \$20,327,301,000 for the year ended September 30, 2023. Balance sheet growth in 2024 was primarily due to the Merger. During 2024, average loans receivable increased \$3,405,267,000, or 19.9%, while the combined average balances of mortgage-backed securities, other investment securities and cash increased by \$822,850,000 or 26.5%.

During 2024, average interest-bearing customer deposit accounts increased \$3,420,825,000 or 26.5% and the average balance of borrowings increased by \$980,514,000, or 30.1%, from 2023, primarily due to the Merger.

The following table sets forth the information explaining the changes in the net interest income and net interest margin.

Net Interest Income and Margin Summary

	Year Ended September 30,								
	2024		2023		2022				
	Average Balance	Interest	Average Rate	Average Balance	Interest	Average Rate			
	(\$ in thousands)								
Assets									
Loans receivable (1)	\$ 20,500,281	\$1,165,849	5.69 %	\$ 17,095,014	\$ 900,068	5.27 %	\$ 15,083,111	\$ 601,593	3.99 %
Mortgage-backed securities	1,597,566	59,782	3.74	1,362,415	43,184	3.17	1,141,501	26,332	2.31
Cash & Investments (2)	2,330,505	133,608	5.73	1,742,806	91,058	5.22	2,500,008	33,555	1.34
FHLB & FRB stock	131,313	12,471	9.50	127,066	8,645	6.80	87,861	4,879	5.55
Total interest-earning assets	24,559,665	1,371,710	5.59 %	20,327,301	1,042,955	5.13 %	18,812,481	666,359	3.54 %
Other assets	1,682,721			1,484,271			1,343,848		
Total assets	\$ 26,242,386			\$ 21,811,572			\$ 20,156,329		
Liabilities and Shareholders' Equity									
Interest-bearing customer accounts	\$ 16,327,208	532,434	3.26 %	\$ 12,906,383	237,233	1.84 %	\$ 12,738,719	43,041	0.34 %
Borrowings	4,242,431	178,444	4.21	3,261,917	115,488	3.54	1,731,120	28,729	1.66
Total interest-bearing liabilities	20,569,639	710,878	3.46 %	16,168,300	352,721	2.18 %	14,469,839	71,770	0.50 %
Noninterest-bearing customer accounts	2,593,567			2,969,970			3,249,120		
Other liabilities	322,071			296,840			242,213		
Total liabilities	23,485,277			19,435,110			17,961,172		
Shareholders' equity	2,757,109			2,376,462			2,195,157		
Total liabilities and shareholders' equity	\$ 26,242,386			\$ 21,811,572			\$ 20,156,329		
Net interest income/interest rate spread	\$ 660,832		2.13 %	\$ 690,234		2.95 %	\$ 594,589		3.04 %
Net interest margin (3)			2.69 %			3.40 %			3.16 %

(1) Interest income includes net amortization-accretion of deferred loan fees, costs, discounts and premiums of \$37,489,000, \$20,130,000 and \$29,156,000 for year ended 2024, 2023 and 2022, respectively.

(2) Includes cash equivalents and non-mortgage backed security investments, such as U.S. agency obligations, mutual funds, corporate bonds, and municipal bonds.

(3) Net interest income divided by average interest-earning assets.

The following table shows the potential impact of changing interest rates on net income for one year. The Company's focus is primarily on the impact of abrupt upward or downward changes in short term rates. It is important to note that this is not a forecast or prediction of future events, but is used as a tool for measuring potential risk. This analysis assumes zero balance sheet growth and a constant percentage composition of assets and liabilities.

Basis Point Increase (Decrease) in Interest Rates	Potential Increase (Decrease) in Net Interest Income	
	September 30, 2024	
	(In thousands, except percentages)	
(300)	\$ (35,155)	(4.27)%
(200)	(8,414)	(1.02)
(100)	1,702	0.21
100	(274)	(0.03)
200	22,686	2.76

Actual results will differ from the assumptions used in this model, as management monitors and adjusts both the size and the composition of the balance sheet in order to respond to changing interest rates. In a rising interest rate environment, it is likely that the Company will grow its balance sheet to offset margin compression that may occur. Improvement in the net interest income sensitivity during the year is primarily the result of interest rate swap activity, as well as increased time deposits and an increased federal funds balances which help reduce sensitivity in rising shock scenarios.

Another method used to quantify interest rate risk is the NPV analysis. This analysis calculates the difference between the present value of interest-bearing liabilities and the present value of expected cash flows from interest-earning assets and off-balance-sheet contracts. The following tables set forth an analysis of the Company's interest rate risk as measured by the estimated changes in NPV resulting from instantaneous and sustained parallel shifts in the yield curve (measured in 100-basis-point increments).

The tables below express the NPV under varying interest scenarios.

September 30, 2024			
Change in Interest Rates	Estimated NPV Amount	Estimated Increase/(Decrease) in NPV Amount	NPV as % of Assets
(Basis Points)	(In thousands)	(In thousands)	
200	\$ 2,236,691	\$ (740,588)	8.69 %
100	2,472,251	(505,028)	9.41
No change	2,977,279	—	10.99
(100)	3,045,962	68,683	11.08
(200)	3,249,949	272,670	11.56
(300)	3,232,362	255,083	11.32

As of September 30, 2024, the Company was in compliance with all of its interest rate risk policy limits.

Item 8. Financial Statements and Supplementary Data

Index to financial statements and financial statement schedules:

Report of Independent Registered Public Accounting Firm (PCAOB ID: 34)	64
Financial statements and supplementary data:	
Consolidated Statements of Financial Condition	68
Consolidated Statements of Operations	69
Consolidated Statements of Comprehensive Income	70
Consolidated Statements of Shareholders' Equity	71
Consolidated Statements of Cash Flows	72
Notes to Consolidated Financial Statements	74

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Directors of WaFd, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated statements of financial condition of WaFd, Inc. and subsidiaries (the "Company") as of September 30, 2024 and 2023, the related consolidated statements of operations, comprehensive income, shareholders' equity, and cash flows, for each of the three years in the period ended September 30, 2024, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of September 30, 2024, and 2023, and the results of its operations and its cash flows for each of the three years in the period ended September 30, 2024, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of September 30, 2024, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated November 20, 2024, expressed an unqualified opinion on the Company's internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current-period audit of the financial statements that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Allowance for Loan Losses - Refer to Notes A and E to the financial statements

Critical Audit Matter Description

The estimate of the Company's expected credit losses under the CECL methodology is based on relevant information about current conditions, past events, and reasonable and supportable forecasts regarding collectability of the reported amounts. In order to estimate the allowance for loan losses ("ALL"), the Company used either a cohort or weighted average remaining maturities methodology to determine the historical loss rate, by loan portfolio class, then considered whether qualitative adjustments to those historical loss rates were warranted.

Significant management judgments are required in determining whether, and to what extent, qualitative adjustments for each portfolio loan class are required. These adjustments are made after considering the conditions over the period from which historical loss experience was based and are split into two components: 1) asset or class specific risk characteristics or current

conditions at the reporting date related to portfolio credit quality, remaining payments, volume and nature, credit culture and management, business environment or other management factors, not captured in the historical loss rates and 2) reasonable and supportable forecasts of future economic conditions and collateral values.

Given the significance of the ALL and management judgment required for quantitative and qualitative evaluation of past events, current conditions, and reasonable and supportable forecasts, performing audit procedures to evaluate the ALL requires a high degree of auditor judgment and increased extent of effort.

We have identified the ALL estimate for certain loan portfolio classes as a critical audit matter based upon the above factors.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the ALL estimate for loan portfolio classes for which we concluded the ALL was significant included the following, among others:

- We tested the effectiveness of management’s controls over model applicability, qualitative adjustments, the reasonable and supportable forecast adjustments, and management’s review and approval process over the final determination of the ALL.
- We tested the underlying data and mathematical accuracy of the cohort methodology used to determine most loan portfolio class historical loss rates.
- We involved credit specialists to assist us in evaluating the reasonableness and conceptual soundness of the methodologies applied in the credit loss estimation model.
- To test the qualitative adjustments, we performed analysis to evaluate management’s determination of the qualitative adjustments made to account for specific risk characteristics or current conditions that differ from the period over which the historical loss rate was determined. Our procedures included evaluating management’s inputs and assumptions used in determining the qualitative and forecast adjustments by comparing the information to internal and external source data including, among others, the economic forecasts utilized by the Company and third-party economic forecasts for selected assumptions. In addition, we performed procedures on the overall ALL amount, inclusive of the qualitative adjustments, by evaluating the Company’s analysis of peers’ estimated current expected credit losses for loans to the Company’s recorded ALL.

Fair Value of Acquired Loans Receivable and Core Deposit Intangible Assets - Refer to Note B to the financial statements

Critical Audit Matter Description

On February 29, 2024, WaFd, Inc. closed its previously announced merger with Luther Burbank Corporation ("Luther Burbank" or "LBC") a California corporation, effective as of March 1, 2024 (the "Merger Date"). Pursuant to the Merger Agreement, Luther Burbank merged with and into the Company (the "Corporate Merger"), with the Company surviving the Corporate Merger. Promptly following the Corporate Merger, Luther Burbank’s wholly-owned bank subsidiary, Luther Burbank Savings, merged with and into WaFd Bank with WaFd Bank as the surviving institution.

The Corporate Merger has been accounted for as a business combination. Under the acquisition method, the acquiring entity recognizes the assets acquired and liabilities assumed at their acquisition date fair values. Management utilizes prevailing valuation techniques appropriate for the asset or liability being measured in determining these fair values. This method often involves estimates based on third party valuations based on discounted cash flow analyses or other valuation techniques, all of which are inherently subjective. Any excess of the purchase price over the fair value of net assets and other identifiable intangible assets acquired is recorded as goodwill. The allocation of the total purchase consideration to the estimated fair values of the acquired loans receivable ("acquired loans") and core deposit intangible assets acquired was \$3.2 billion and \$37 million at the Merger Date, respectively.

A valuation of the acquired loans was performed by a third party, as of the Merger Date, to assess the fair value. The loans were valued at the pool level, based on loan type and interest rate terms, using a discounted cash flow methodology. The methodology included projecting cash flows based on the contractual terms of the loans and the cash flows were adjusted to reflect credit loss expectations along with prepayments. Discount rates were developed based on the relative risk of the cash

flows, taking into consideration the loan type, market rates as of the valuation date, recent originations in the portfolio, credit loss expectations, and liquidity expectations. Lastly, cash flows adjusted for credit loss expectations were discounted to present value and summed to arrive at the fair value of the loans.

The fair value of the core deposit intangible assets was estimated based on a cost savings methodology as of the Merger Date that gave consideration to expected customer attrition rates, net maintenance cost of the deposit base, interest costs associated with customer deposits, and the alternative cost of funds.

We identified the fair value of the acquired loans and the core deposit intangible assets as part of the Corporate Merger as a critical audit matter because a high degree of auditor judgement and an increased extent of effort, including the involvement of our valuation specialists, was required to evaluate the reasonableness of the methodologies and certain assumptions used by management to determine the fair values. Specifically, the (i) credit assumptions, (ii) discount rate, and (iii) prepayment rate used for acquired loans, and the (iv) discount rate, (v) attrition assumptions, (vi) maintenance expense assumptions, and (vii) the alternative cost of funds for the core deposit intangible assets.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the methodologies and certain assumptions used by management to determine the fair values of the acquired loans and the core deposit intangible assets as part of the Corporate Merger included the following, among others:

- We tested the effectiveness of controls over the purchase accounting allocation, including those over the valuation methodologies and assumptions utilized.
- We evaluated, with the assistance of our fair value specialists, the appropriateness of the (i) valuation methodologies, (ii) credit assumptions, discount rate, and prepayment rate assumptions used for acquired loans, and the discount rate, attrition, maintenance expense, and the alternative cost of funds assumptions for core deposit intangible assets, as well as the (iii) mathematical accuracy of the valuation calculations.
- We tested the completeness and accuracy of certain underlying loan and deposit information used in the valuation of the acquired loans and the core deposit intangible assets, respectively.

/s/ Deloitte & Touche LLP

Seattle, Washington
November 20, 2024

We have served as the Company's auditor since 1982.

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Company and nature of operations. Washington Federal Bank, a federally-insured Washington state chartered commercial bank dba WaFd Bank (the "Bank" or "WaFd Bank"), was founded on April 24, 1917 in Ballard, Washington and is engaged primarily in providing lending, depository, insurance and other banking services to consumers, mid-sized to large businesses, and owners and developers of commercial real estate. Washington Federal, Inc., a Washington corporation was formed as the Bank's holding company in November, 1994.

On September 27, 2023, Articles of Amendment were filed with the Washington Secretary of State to change the name of Washington Federal, Inc. to WaFd, Inc. This change was effective on September 29, 2023. As used throughout this document, the terms "WaFd" or the "Company" or "we" or "us" and "our" refer to WaFd, Inc. and its consolidated subsidiaries, and the term "Bank" refers to the operating subsidiary, Washington Federal Bank dba WaFd Bank.

The Company is headquartered in Seattle, Washington. The Bank conducts its activities through a network of 210 bank branches located in Washington, Oregon, Idaho, Utah, Arizona, Nevada, New Mexico, California and Texas.

Basis of presentation and use of estimates. The Company's accounting and financial reporting policies conform to accounting principles generally accepted in the United States of America (U.S. GAAP). Inter-company balances and transactions have been eliminated in consolidation. In preparing the consolidated financial statements, the Company makes estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements and revenues and expenses during the reporting periods and related disclosures. The areas that require application of significant management judgments often result in the need to make estimates about the effect of matters that are inherently uncertain and may change in future periods. Actual results could differ materially from those estimates. Certain amounts in the financial statements from prior periods have been reclassified to conform to the current financial statement presentation. In certain instances, amounts in text are presented by rounding to the nearest thousand.

On February 29, 2024, WaFd, Inc. closed its previously announced merger with Luther Burbank Corporation ("Luther Burbank" or "LBC"), a California corporation, effective as of 12:00am Pacific Time on March 1, 2024 (the "Effective Time"). Pursuant to the Merger Agreement, at the Effective Time Luther Burbank merged with and into the Company (the "Corporate Merger"), with the Company surviving the Corporate Merger. Promptly following the Corporate Merger, Luther Burbank's wholly-owned bank subsidiary, Luther Burbank Savings, merged with and into WaFd Bank with WaFd Bank as the surviving institution (the "Bank Merger"). The Corporate Merger and the Bank Merger are collectively referred to in this Annual Report on Form 10-K as the "Merger."

The Merger was accounted for using the acquisition method of accounting and was effectively an all-stock transaction accounted for as a business combination. The Company's financial results for any periods ended on and prior to February 29, 2024 reflect WaFd results only on a standalone basis. As a result, financial results for the year ended September 30, 2024 may not be directly comparable to prior reported periods. Refer to Note B - Business Combination for further details.

The Company's fiscal year end is September 30. All references to 2024, 2023 and 2022 represent balances as of September 30, 2024, September 30, 2023, and September 30, 2022, or activity for the fiscal years then ended.

Business Combinations. The Company applies the acquisition method of accounting for business combinations. Under the acquisition method, the acquiring entity recognizes the assets acquired and liabilities assumed at their acquisition date fair values. Management utilizes prevailing valuation techniques appropriate for the asset or liability being measured in determining these fair values. This method often involves estimates based on third party valuations based on discounted cash flow analyses or other valuation techniques, all of which are inherently subjective. Any excess of the purchase price over the fair value of net assets and other identifiable intangible assets acquired is recorded as goodwill. Assets acquired and liabilities assumed from contingencies must also be recognized at fair value if the fair value can be determined during the measurement period. Acquisition-related costs, including conversion and restructuring charges, are expensed as incurred. Fair values are subject to refinement over the measurement period, not to exceed one year after the closing date.

Preferred stock. On February 8, 2021, in connection with an underwritten public offering, the Company issued 300,000 shares of 4.875% Noncumulative Perpetual Series A Preferred Stock ("Series A Preferred Stock"). Net proceeds, after underwriting discounts and expenses, were \$293,325,000. The public offering consisted of the issuance and sale of 12,000,000 depository

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

shares, each representing a 1/40th interest in a share of the Series A Preferred Stock, at a public offering price of \$25.00 per depositary share. Holders of the depositary shares are entitled to all proportional rights and preferences of the Series A Preferred Stock (including, dividend, voting, redemption and liquidation rights). The depositary shares are traded on the NASDAQ Global Select Market under the symbol "WAFDP." The Series A Preferred Stock is redeemable at the option of the Company, subject to all applicable regulatory approvals, on or after April 15, 2026.

Cash and cash equivalents. Cash and cash equivalents include cash on hand, amounts due from banks, overnight investments and repurchase agreements with an initial maturity of three months or less.

Restricted cash balances. As of September 30, 2024 and September 30, 2023, the Bank held counterparty cash collateral of \$168,200,000 and \$326,750,000, respectively, related to derivative contracts.

Equity investments. The Company records equity investments within Other assets in its Consolidated Statements of Financial Condition. These equity investments are accounted for under different methods.

- Low-income housing tax credit investments are accounted for under the proportional amortization method.
- For equity investments where the Company has significant influence, the Company applies the equity method of accounting, which adjusts the carrying value of the investment to recognize a proportionate share of the financial results of the investment entity, regardless of whether any distribution is made. Any adjustments to the fair value of these investments are recorded in Other income in the Consolidated Statements of Operations.
- For certain nonmarketable equity investments where the equity method of accounting is not applicable, the Company applies the fair value method. Any adjustments to the fair value of these investments are recorded in Other income in the Consolidated Statements of Operations. Fair value is determined by reference to readily determinable market values, if applicable. As these investments do not have readily determinable fair values, they are generally accounted for at cost minus impairment, if any, plus or minus changes resulting from observable transactions involving the same or similar investments from the same issuer. This practice is referred to as the measurement alternative.
- Equity investments in qualified real estate funds can use the net asset value ("NAV") expedient for fair value measurement. Under this method, the NAV is determined by the fund as fair value for the investment. At September 30, 2024, equity investments held by the Company and recorded at NAV had a carrying amount of \$36,317,000 and a remaining unfunded commitment of \$3,280,000. These NAV based investments cannot be transferred without consent and we do not have redemption rights except in certain transformational events. Equity investments measured at NAV are not classified in the fair value hierarchy.

Debt securities, including mortgage-backed securities. The Company accounts for debt securities in two categories: held-to-maturity ("HTM") and available-for-sale ("AFS"). Premiums and discounts on debt securities are deferred and recognized into income over the contractual life of the asset using the effective interest method.

HTM securities are accounted for at amortized cost, but the Company must have both the positive intent and the ability to hold those securities to maturity. There are very limited circumstances under which securities in the HTM category can be sold without jeopardizing the cost basis of accounting for the remainder of the securities in this category.

Available-for-sale securities are accounted for at fair value. Gains and losses realized on the sale of these securities are accounted for based on the specific identification method. Unrealized gains and losses for AFS securities are excluded from earnings and reported net of the related tax effect in the accumulated other comprehensive income component of shareholders' equity.

Allowance for Credit Losses (HTM Debt Securities). For HTM debt securities, the Company is required to utilize the current expected credit loss methodology ("CECL") to estimate expected credit losses. Substantially all of the Company's HTM debt securities are issued by U.S. government agencies or U.S. government-sponsored enterprises. These securities carry the explicit and/or implicit guarantee of the U.S. government and have a long history of zero credit loss. Therefore, the Company did not record an allowance for credit losses for these securities. As of September 30, 2024, the Company determined that the expected credit loss on its corporate and municipal bonds was immaterial, and therefore, an allowance for credit losses was not recorded. See [Note C "Investment Securities"](#) and [Note F "Fair Value Measurements"](#) for more information about HTM debt securities.

Allowance for Credit Losses (Available-for-Sale Debt Securities). The impairment model for AFS debt securities differs from the CECL methodology applied for HTM debt securities because AFS debt securities are measured at fair value rather

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

than amortized cost. For AFS debt securities in an unrealized loss position, the Company first assesses whether it intends to sell, or it is more likely than not that it will be required to sell, the security before recovery of its amortized cost basis. If either criteria is met, the security's amortized cost basis is written down to fair value through income. For AFS debt securities where neither of the criteria are met, the Company evaluates whether the decline in fair value has resulted from credit losses or other factors. In making this assessment, management considers the extent to which fair value is less than amortized cost, any changes to the credit rating of the security by a rating agency, and adverse conditions specifically related to the security, among other factors. If this assessment indicates that a credit loss exists, the present value of cash flows expected to be collected from the security are compared to the amortized cost basis of the security. If the present value of cash flows expected to be collected is less than the amortized cost basis, a credit loss exists and an allowance for credit losses is recorded for the credit loss, limited to the amount that the fair value is less than the amortized cost basis. Any remaining discount that has not been recorded through an allowance for credit losses is recognized in other comprehensive income. Changes in the allowance for credit losses are recorded as a provision (or release) for credit losses. Losses are charged against the allowance when management believes the uncollectibility of an AFS security is confirmed or when either of the criteria regarding intent or requirement to sell is met. As of September 30, 2024, the Company determined that the unrealized loss positions in AFS securities were not the result of credit losses, and therefore, an allowance for credit losses was not recorded. See [Note C "Investment Securities"](#) and [Note F "Fair Value Measurements"](#) for more information about AFS debt securities.

Loans receivable. Loans that are performing in accordance with their contractual terms are carried at the unpaid principal balance, net of premiums, discounts and net deferred loan fees. Net deferred loan fees include non-refundable loan origination fees less direct loan origination costs. Net deferred loan fees, premiums and discounts are amortized into interest income using either the interest method or straight-line method over the terms of the loans, adjusted for actual prepayments. In addition to fees and costs for originating loans, various other fees and charges related to existing loans may occur, including prepayment charges, late charges and assumption fees.

When a borrower fails to make a required payment on a loan, the Bank attempts to cure the deficiency by contacting the borrower. Contact is made after a payment is 30 days past its grace period. In most cases, deficiencies are cured promptly. If the delinquency is not cured within 90 days, the Bank may institute appropriate action to foreclose on the property. If foreclosed, the property is sold at a public sale and may be purchased by the Bank.

Allowance for Credit Losses (Loans Receivable). The Company maintains an allowance for credit losses ("ACL") for the expected credit losses of the loan portfolio as well as unfunded loan commitments. The amount of ACL is based on ongoing, quarterly assessments by management. CECL requires an estimate of the credit losses expected over the life of an exposure (or pool of exposures). See [Note E "Allowance for Losses on Loans"](#) for details.

The ACL consists of the allowance for loan losses and the reserve for unfunded commitments. The estimate of expected credit losses under the CECL methodology is based on relevant information about past events, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amounts. Historical loss experience is generally the starting point for estimating expected credit losses. We then consider whether the historical loss experience should be adjusted for asset-specific risk characteristics or current conditions at the reporting date that did not exist over the period that historical experience was based for each loan type. Finally, we consider forecasts about future economic conditions or changes in collateral values that are reasonable and supportable.

Portfolio segment is defined as the level at which an entity develops and documents a systematic methodology to determine its ACL. The Company has designated two loan portfolio segments, commercial loans and consumer loans. These loan portfolio segments are further disaggregated into classes, which represent loans of similar type, risk characteristics, and methods for monitoring and assessing credit risk. The commercial loan portfolio segment is disaggregated into five classes: multi-family, commercial real estate, commercial and industrial, construction, and land acquisition and development. The risk of loss for the commercial loan portfolio segment is generally most indicated by the credit risk rating assigned to each borrower. Commercial loan risk ratings are determined by experienced senior credit officers based on specific facts and circumstances and are subject to periodic review by an independent internal team of credit specialists. The consumer loan portfolio segment is disaggregated into five classes: single-family-residential mortgage, custom construction, consumer lot loans, home equity lines of credit, and other consumer. The risk of loss for the consumer loan portfolio segment is generally most indicated by delinquency status and general economic factors. Each commercial and consumer loan portfolio class may also be further segmented based on risk characteristics.

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

For most of our loan portfolio classes, the historical loss experience is determined using a cohort methodology. This method pools loans into groups (“cohorts”) sharing similar risk characteristics and tracks each cohort’s net charge-offs over the lives of the loans to calculate a historical loss rate. The historical loss rates for each cohort are then averaged to calculate an overall historical loss rate which is applied to the current loan balance to arrive at the quantitative baseline portion of the allowance for credit losses for the respective loan portfolio class. For certain loan portfolio classes, the Company determined there was not sufficient historical loss information to calculate a meaningful historical loss rate using the cohort methodology. For any such loan portfolio class, the weighted-average remaining maturity (“WARM”) methodology is being utilized until sufficient historical loss data is obtained. The WARM method multiplies an average annual loss rate by the expected remaining life of the loan pool to arrive at the quantitative baseline portion of the allowance for credit losses for the respective loan portfolio class.

The Company also considers qualitative adjustments to the historical loss rate for each loan portfolio class. The qualitative adjustments for each loan class consider the conditions over the period from which historical loss experience was based and are split into two components: 1) asset or class specific risk characteristics or current conditions at the reporting date related to portfolio credit quality, remaining payments, volume and nature, credit culture and management, business environment or other management factors and 2) reasonable and supportable forecast of future economic conditions and collateral values.

The Company performs a quarterly asset quality review which includes a review of forecasted gross charge-offs and recoveries, nonperforming assets, criticized loans, risk rating migration, delinquencies, etc. The asset quality review is performed by management and the results are used to consider a qualitative overlay to the quantitative baseline. The second qualitative adjustment noted above, economic conditions and collateral values, encompasses a one-year reasonable and supportable forecast period. The overlay adjustment for the reasonable and supportable forecast assumes an immediate reversion after the one-year forecast period to historical loss rates for the remaining life of the respective loan pool.

The Company may establish a specific reserve for individually evaluated loans that do not share similar risk characteristics with the loans included in each respective loan pool if management deems it appropriate. If this occurs, these individually evaluated loans are removed from their respective pools. These loans typically represent collateral dependent loans, but may also include other non-performing loans.

Collateral-Dependent Loans. A financial asset is considered collateral-dependent when the debtor is experiencing financial difficulty and repayment is expected to be provided substantially through the sale or operation of the collateral. For all classes of loans and leases deemed collateral-dependent, the Company elected the practical expedient to estimate expected credit losses based on the collateral’s fair value less cost to sell. In most cases, the Company records a partial charge-off to reduce the loan’s carrying value to the collateral’s fair value less cost to sell. Substantially all of the collateral consists of various types of real estate including residential properties; commercial properties such as retail centers, office buildings, and lodging; agricultural land; and vacant land.

Modifications to Borrowers Experiencing Financial Difficulties. The Company will consider modifying the interest rates and terms of a loan if it determines that a modification is a better alternative to foreclosure. Most loan modifications to borrowers experiencing financial difficulty are accruing and performing loans where the borrower has approached the Company about modifications due to temporary financial difficulties. Each request is individually evaluated for merit and likelihood of success. Often a term extension is needed in the short term in order to evaluate the need for further action. Payment delays and interest-only payments may also be approved during the modification period. Principal forgiveness is not an available option for restructured loans.

For commercial loans, modifications could be any of the above-listed modification types available or a mix thereof. Modifications to extend the term, lower the payment amount or delay payment could be offered for the purposes of providing borrowers additional time to return to compliance with the terms of their loans. Renewals of commercial lines to borrowers experiencing financial difficulty are disclosed within Note D - Loans Receivable though many of these modifications are made in the normal course of business and not as a result of the borrower’s difficulties.

For consumer loans, modifications typically consist of minor payment delays or deferrals and may include a modification of the existing contractual rate or extension of the maturity date, or both, when it is determined the borrowers are likely to successfully maintain compliance with these modified loan terms.

Non-accrual loans. Loans are placed on non-accrual status when, in the judgment of management, the probability of collection of interest is deemed to be insufficient to warrant further accrual. When a loan is placed on non-accrual status, previously

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

accrued but unpaid interest is deducted from interest income. The Company does not accrue interest on loans 90 days or more past due. If payment is made on a loan so that the loan becomes less than 90 days past due, and the Company expects full collection of principal and interest, the loan is returned to full accrual status. Any interest ultimately collected is credited to income in the period of recovery. A loan is charged-off when the loss is estimable, and it is confirmed that the borrower is not expected to be able to meet contractual obligations.

If a consumer loan is on non-accrual status before being modified, it will stay on non-accrual status following restructuring until it has been performing for at least six months, at which point it may be moved to accrual status. For commercial loans, six consecutive payments on newly restructured loan terms are required prior to returning the loan to accrual status. In some instances, after the required six consecutive payments are made, management will conclude that collection of the entire principal and interest due is still in doubt. In those instances, the loan will remain on non-accrual status.

Accrued interest receivable. The Company has made the following elections regarding accrued interest receivable ("AIR"):

- Presenting accrued interest receivable balances separately from their underlying instruments within the consolidated statements of financial condition.
- Excluding accrued interest receivable that is included in the amortized cost of financing receivables from related disclosure requirements.
- Continuing our policy to write off accrued interest receivable by reversing interest income in cases where the Company does not reasonably expect to receive payment.
- Not measuring an allowance for credit losses for accrued interest receivable due to the Company's policy of writing off uncollectible accrued interest receivable balances in a timely manner. We believe accrued interest receivable recorded as of September 30, 2024 is collectible.

Off-balance-sheet credit exposures. Off-balance-sheet credit exposures for the Company include unfunded loan commitments and letters of credit from the Federal Home Loan Banks of both Des Moines and San Francisco, which are used as collateral for public funds deposits. The reserve for unfunded commitments is recognized as a liability (other liabilities in the consolidated statements of financial condition), with adjustments to the reserve recognized through provision for credit losses in the consolidated statements of income. The reserve for unfunded commitments represents the expected lifetime credit losses on off-balance sheet obligations such as commitments to extend credit and standby letters of credit. However, a liability is not recognized for commitments that are unconditionally cancellable by the Company. The reserve for unfunded commitments is determined by estimating future draws, including the effects of risk mitigation actions, and applying the expected loss rates on those draws. Loss rates are estimated by utilizing the same loss rates calculated for the allowance for credit losses related to the respective loan portfolio class. See Note N "Commitments and Contingencies" for details.

Client swap program hedges. Interest rate swap agreements are provided to certain clients who desire to convert their obligations from variable to fixed interest rates. Under these agreements, the Bank enters into a variable-rate loan agreement with a customer in addition to a swap agreement, and then enters into a corresponding swap agreement with a third party in order to offset its exposure on the customer swap agreement. As the interest rate swap agreements with the customers and third parties are not designated as accounting hedges under FASB ASC 815, the instruments are marked to market in earnings. The change in fair value of the offsetting swaps are included in other non-interest income and there is minimal impact on net income. There is fee income earned on the swaps that is included in loan fee income.

Borrowings cash flow hedges. The Company has entered into interest rate swaps to convert a series of future short-term borrowings to fixed-rate payments. These interest rate swaps qualify as cash flow hedging instruments under ASC 815 so gains and losses are recorded in Other Comprehensive Income to the extent the hedge is effective. Gains and losses on the interest rate swaps are reclassified from OCI to earnings in the period the hedged transaction affects earnings and are included in the same income statement line item that the hedged transaction is recorded.

Mortgage loan "last-of-layer" portfolio hedges. The Company has entered into interest rate swaps to hedge the portion of the respective closed portfolios of prepayable mortgage loans that are expected to remain at the end of the hedge term. These hedges qualify as last-of-layer hedges under ASC 815 and provide for matching of the recognition of the gains and losses on the interest rate swap and the related hedged item.

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

Commercial loan fair value hedges. The Company has entered into interest rate swaps to hedge long term fixed rate commercial loans. These hedges qualify as fair value hedges under ASC 815 and provide for matching of the recognition of the gains and losses on the interest rate swap and the related hedged loan.

Premises and equipment. Premises and equipment are stated at cost, less accumulated depreciation. Depreciation is computed on the straight-line method over the estimated useful lives of the respective assets. Costs for improvements are capitalized. Charges for ordinary maintenance and repairs are expensed to operations as incurred.

Real estate owned. Real estate properties acquired through foreclosure of loans or through acquisitions are recorded initially at fair value less selling costs and are subsequently recorded at lower of cost or fair value. Costs for improvements are capitalized. Any gains (losses) and maintenance costs are recorded in Gain (loss) on real estate owned, net.

Intangible assets. Goodwill represents the excess of the cost of businesses acquired over the fair value of the net assets acquired. Other intangibles, including core deposit intangibles, are acquired assets that lack physical substance but can be distinguished from goodwill. Goodwill is not amortized but is evaluated for potential impairment on an annual basis and between tests if circumstances such as material adverse changes in legal, business, regulatory and economic factors exist. We have determined our goodwill balance is all related to a single reporting unit and perform a quantitative impairment assessment. An impairment loss is recorded when the carrying amount of goodwill exceeds its implied fair value. If circumstances indicate that the carrying value of the assets may not be recoverable, an impairment charge could be recorded. Other intangible assets are amortized over their estimated lives and are subject to impairment testing when events or circumstances change.

The Company performed its annual impairment assessment as of August 31, 2024 and concluded the fair value of our single reporting unit exceeded its respective carrying value and did not result in impairment for the reporting unit. When performing the quantitative assessment of goodwill impairment, we estimated the fair value of our reporting unit using the market capitalization approach, based on our stock price, adjusted for the effect of a control premium.

The Company continuously monitors for events and circumstances that could negatively impact the key assumptions in determining fair value. While the Company believes the judgments and assumptions used in the goodwill impairment test is reasonable, different assumptions or changes in general industry, market and macro-economic conditions could change the estimated fair values and, therefore, future impairment charges could be required, which could be material to the consolidated financial statements.

As a result of the Merger, the Company recorded \$104,707,000 in goodwill and \$37,022,000 in core deposit intangible assets. Additional information on the Merger and purchase price allocation is provided in Note B "Business Combination". The core deposit intangible asset value was determined by an analysis of the cost differential between the core deposits acquired, inclusive of estimated servicing costs, and alternative funding sources for those deposits. The core deposit intangible asset recorded is amortized on an accelerated basis over 6 years. In addition to the effects of the Merger, the Company added a small amount of intangibles during fiscal 2024 as the result of acquisitions made by subsidiary WAFD Insurance Group, Inc. No impairment losses separate from the scheduled amortization have been recognized in the periods presented.

<u>Fiscal Year</u>	<u>Expense</u>
	(In thousands)
2025	\$ 9,862
2026	7,317
2027	5,567
2028	5,205
2029	5,112

Income taxes. Income taxes are accounted for using the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements. Under this method, a deferred tax asset or liability is determined based on the temporary differences between the financial statement and corresponding tax treatment of income, gains, losses, deductions or credits using enacted tax rates in effect for the year in which the differences are expected to reverse. The provision for income taxes includes current and deferred income tax expense based on net income adjusted for temporary and permanent differences such as depreciation, loan loss reserve, tax-exempt interest, and affordable housing tax credits. Reserves for uncertain tax positions, together with any related interest and penalties, if applicable, and amortization of affordable housing tax credit investments are recorded within income tax expense.

Accounting for stock-based compensation. We recognize in the statement of operations the grant-date fair value of stock options and other equity-based forms of compensation issued to employees over the employees' requisite service period (generally the vesting period). The requisite service period may be subject to performance conditions. Stock options and restricted stock awards generally vest ratably over two to five years and are recognized as expense over that same period of time. The exercise price of each option equals the market price of the Company's Common Stock on the date of the grant, and the maximum term is ten years.

Certain grants of restricted stock are subject to performance-based and market-based vesting as well as other approved vesting conditions and cliff vest based on those conditions. Compensation expense is recognized over the service period to the extent restricted stock awards are expected to vest. See [Note Q "Stock Award Plans"](#) for additional information.

Business segments. As the Company manages its business and operations on a consolidated basis, management has determined that there is one reportable business segment.

Regulatory matters. On October 9, 2013, the CFPB entered a Consent Order against the Bank that required the Bank to pay a civil money penalty of \$34,000, and to adopt an enhanced compliance program related to reporting Home Mortgage Disclosure

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

Act ("HMDA") data. The Bank has adopted an enhanced HMDA program, which continues to be subject to review by the CFPB. On October 27, 2020 the CFPB entered a second Consent Order against the Bank for violations related to the Bank's HMDA reporting obligations. The 2020 Consent Order required the Bank to pay a \$200,000 civil money penalty and develop and implement a HMDA compliance management system. Both HMDA Consent Orders remain in place.

New Accounting Pronouncements. In October 2023, the FASB issued ASU 2023-06 *Disclosure Improvements: Codification Amendments in Response to the SEC's Disclosure Update and Simplification Initiative* to clarify or improve disclosure and presentation requirements on a variety of topics and align the requirements in the FASB accounting standard codification with the Securities and Exchange Commission regulations. The amendments will be effective for the Company only if the SEC removes the related disclosure requirement from its existing regulations no later than June 30, 2027. If the SEC timely removes such a related requirement from its existing regulations, the corresponding amendments within the ASU will become effective for the Company on the same date with early adoption permitted. The Company does not expect the amendments in this update to have a material impact on our consolidated financial statements.

In November 2023, the FASB issued ASU 2023-07, *Segment Reporting - Improvements to Reportable Segment Disclosures (Topic 280)* to improve reportable segment disclosure requirements through enhanced disclosures about significant segment expenses. The ASU applies to all public entities that are required to report segment information in accordance with ASC 280. For public companies, amendments in this ASU are effective for fiscal years beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024 with early adoption permitted. The Company does not expect this ASU to have a material effect on our consolidated financial statements.

In December 2023, the FASB issued ASU 2023-09, *Income Tax - Improvements to Income Tax Disclosures (Topic 740)* which requires reporting companies to break out their income tax expense and tax rate reconciliation in more detail. For public companies, the requirements will become effective for fiscal years beginning after December 15, 2024, with early adoption permitted. The Company does not expect this ASU to have a material effect on our consolidated financial statements.

In March 2024, the FASB issued ASU 2024-02, *Codification Improvements – Amendments to Remove References to the Concepts Statements*. This accounting standards update removes references to various FASB Concept Statements in the codified accounting standards in order to avoid reliance or interpretations based on such Concept Statements, which are not authoritative. For public business entities, the amendments in this update are effective for fiscal years beginning after December 15, 2024, with early adoption permitted. The Company does not expect this ASU to have a material effect on our consolidated financial statements.

In November 2024, the FASB issued ASU 2024-03, *Disaggregation of Income Statement Expenses*. This accounting standards update will require public companies to disclose, in the notes to financial statements, specified information about certain costs and expenses at each interim and annual reporting period. The amendments in this ASU are effective for fiscal years beginning after December 15, 2026, with early adoption permitted. The Company does not expect this ASU to have a material effect on our consolidated financial statements.

NOTE B - BUSINESS COMBINATION

At the Effective Time on March 1, 2024 ("the Merger Date"), WaFd, Inc. acquired Luther Burbank, headquartered in Santa Rosa, California. The Merger was effectively an all-stock transaction and has been accounted for as a business combination. Pursuant to the Merger Agreement, on the Merger Date, each holder of LBC common stock received 0.3353 of a share of WaFd common stock for each share of LBC common stock held. As of the Merger Date, WaFd had 64,311,764 shares of common stock outstanding and issued 17,088,886 shares of WaFd common stock to the LBC shareholders which represents approximately 21% of the voting interests in WaFd, Inc. upon completion of the Merger.

The purchase price for purposes of the transaction accounting adjustments is calculated based on the number of shares of WaFd stock issued to LBC shareholders and the closing share price on the Merger Date as shown in the following table (amounts in thousands except share and per share data).

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

Number of WaFd shares issued to LBC shareholders		17,089
WaFd market price per share on February 29, 2024	\$	27.24
Purchase price of shares issued to LBC shareholders	\$	465,501
Cash in lieu of fractional shares	\$	3
Purchase price consideration	\$	465,504

The Merger was accounted for under the acquisition method of accounting. Assets acquired and liabilities assumed in the Merger were recorded at their respective acquisition date estimated fair values and have been adjusted subsequent to the Merger Date based on new information. These estimates were recorded based on initial valuations available at the Merger Date, and these estimates, including initial accounting for deferred taxes, are considered preliminary as of September 30, 2024. In many cases, the determination of fair value required management to make estimates about discount rates, expected future cash flows, market conditions and other future events that are highly subjective in nature and subject to change. While the Company believes that the information available on the Merger Date provided a reasonable basis for estimating fair value, additional information may be obtained during the measurement period that would result in changes to the estimated fair value amounts. The measurement period ends on the earlier of one year after the Merger Date or the date the Company concludes that all necessary information about the facts and circumstances that existed as of the Merger Date have been obtained. Management anticipates that facts obtained during the measurement period could result in adjustments to the Merger Date valuation amounts presented herein.

The table below displays the amounts recognized as of the Merger Date for each major class of assets acquired and liabilities assumed:

Accrued expenses and other liabilities		100,113
Total liabilities assumed	\$	7,316,380
Net Assets Acquired	\$	360,797
Goodwill	\$	104,707

In connection with the Merger, the Company recorded approximately \$104,707,000 of goodwill. Goodwill represents the excess of the purchase price over the fair value of the assets acquired net of fair value of liabilities assumed. Information regarding goodwill and the carrying amount and amortization of intangible assets are provided in Note A.

The following is a description of the methods used to determine the fair values of significant assets and liabilities presented above.

Cash and cash equivalents – The carrying amount of these items is a reasonable estimate of their fair value based on the short-term nature of these assets.

Investment securities – Fair values for investment securities are based on quoted market prices. The actual sales prices of securities were used for those securities sold in March 2024, shortly after the Merger, rather than the quoted market price as sales prices were determined to be the best indicator of fair value.

Loans receivable – A valuation of the loans held for investment portfolio was performed by a third party as of the Merger Date to assess the fair value. The loans held for investment portfolio was segmented into three groups, including performing purchased credit deteriorated ("PCD") loans, non-performing PCD loans and non-PCD loans. The loans were further pooled based on loan type and interest rate terms. The loans were valued at the pool level using a discounted cash flow methodology. The methodology included projecting cash flows based on the contractual terms of the loans and the cash flows were adjusted to reflect credit loss expectations along with prepayments. Discount rates were developed based on the relative risk of the cash

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

flows, taking into consideration the loan type, market rates as of the valuation date, recent originations in the portfolio, credit loss expectations, and liquidity expectations. Lastly, cash flows adjusted for credit loss expectations were discounted to present value and summed to arrive at the fair value of the loans.

The Company is required to record PCD assets, defined as a more-than-insignificant deterioration in credit quality since origination or issuance, at the purchase price plus the allowance for credit losses expected at the time of acquisition. Under this method, there is no credit loss expense affecting net income on acquisition of PCD assets. Changes in estimates of expected credit losses after acquisition are recognized in subsequent periods as provision for credit losses (or recapture of credit losses) arises. Any non-credit discount or premium resulting from acquiring a pool of purchased financial assets with credit deterioration is allocated to each individual asset. At the Merger Date, the initial allowance for credit losses, determined on a collective basis, is allocated to individual assets to appropriately allocate any non-credit discount or premium. The non-credit discount or premium, after the adjustment for the allowance for credit losses, is accreted to interest income using the interest method based on the effective interest rate determined at the Merger Date.

Of the \$3.2 billion net loans held for investment acquired, \$293 million were identified as PCD loans on the Merger Date. The following table provides a summary of these PCD loans at acquisition:

	March 1, 2024
	(In thousands)
Principal of PCD loans acquired	\$ 293,204
PCD ACL at acquisition	(7,403)
Non-credit discount on PCD loans	(45,869)
Fair value of PCD loans	\$ 239,932

Loans held for sale – The loans held for sale portfolio was recorded at fair value based on quotes or bids from third parties.

Premises and equipment - The fair values of premises are based on a market approach by obtaining third-party appraisals and broker opinions of value for land, office and branch space.

Core deposit intangible – The core deposit intangible represents the low cost of funding acquired core deposits provide relative to the Company’s marginal cost of funds. The fair value was estimated based on a cost savings methodology that gave consideration to expected customer attrition rates, net maintenance cost of the deposit base, interest costs associated with customer deposits, and the alternative cost of funds. The estimated fair value was grossed-up for the expected tax amortization benefit. The intangible asset is being amortized over 6 years using an accelerated method, based upon the period over which estimated economic benefits are estimated to be received.

Customer Accounts – The fair values used for the demand and savings deposits equal the amount payable on demand at the Merger Date. The fair value of time deposits is estimated by discounting the estimated future cash flows using current rates offered for deposits with similar remaining maturities.

Borrowings – The fair value of Federal Home Loan Bank ("FHLB") advances and Federal Reserve Bank ("FRB") borrowings is estimated by discounting the estimated future cash flows using rates currently available to the Company for debt with similar remaining maturities.

The operating results of the Company include the operating results produced by the acquired assets and assumed liabilities in the Merger for the period March 1, 2024 to September 30, 2024.

The following table shows the impact of merger-related expenses for the years ended September 30, 2024 and September 30, 2023.

Year Ended

	\$ 26,319	\$ 3,015

The following table presents unaudited pro forma information as if the Merger had occurred on October 1, 2022. The pro forma adjustments give effect to any change in interest income due to the accretion of the discount (premium) associated with the fair value adjustments to acquired loans, any change in interest expense due to estimated premium amortization/discount accretion associated with the fair value adjustment to acquired interest-bearing deposits, borrowings and long-term debt and the amortization of the core deposit intangible that would have resulted had the deposits been acquired as of October 1, 2022. The pro forma information is not indicative of what would have occurred had the Merger occurred as of the beginning of the year prior to the Merger Date. The pro forma amounts below do not reflect the Company's expectations as of the date of the pro forma information of further operating cost savings and other business synergies expected to be achieved, including revenue growth as a result of the Merger. As a result, actual amounts differed from the unaudited pro forma information presented.

	<u>2,118,616</u>	<u>2,910</u>	<u>(126,429)</u>	<u>1,995,097</u>	<u>4.64</u>
Held-to-maturity securities					
Mortgage-backed securities					
Agency pass-through certificates	423,586	—	(68,398)	355,188	2.88
	<u>423,586</u>	<u>—</u>	<u>(68,398)</u>	<u>355,188</u>	<u>2.88</u>
	<u>\$ 2,542,202</u>	<u>\$ 2,910</u>	<u>\$ (194,827)</u>	<u>\$ 2,350,285</u>	<u>4.35 %</u>

The Company purchased \$549,159,000 of available-for-sale investment securities and \$47,092,000 held-to-maturity investment securities during 2024. Sales of available-for-sale securities totaled \$182,682,000 and there were no sales of held-to-maturity investment securities in 2024. Substantially all mortgage-backed securities have contractual due dates that exceed 25 years.

The Company elected to exclude AIR from the amortized cost basis of debt securities disclosed throughout this footnote. For AFS securities, AIR totaled \$9,311,000 and \$8,641,000 as of September 30, 2024 and September 30, 2023, respectively. For HTM debt securities, AIR totaled \$1,154,000 and \$1,013,000 as of September 30, 2024 and September 30, 2023, respectively. AIR is included in the “interest receivable” line item on the Company’s consolidated statements of financial condition.

The following tables show the gross unrealized losses and fair value of securities as of September 30, 2024 and September 30, 2023, by length of time that individual securities in each category have been in a continuous loss position. There were 209 and 232 securities with an unrealized loss as of September 30, 2024 and September 30, 2023, respectively. The decline in fair value since purchase is attributable to changes in interest rates. Because the Company does not intend to sell these securities and does not consider it more likely than not that it will be required to sell these securities before the recovery of amortized cost basis, which may be upon maturity, the Company does not consider these investments to be impaired.

Substantially all of the Company's held-to-maturity debt securities are issued by U.S. government agencies or U.S. government-sponsored enterprises. These securities carry the explicit and/or implicit guarantee of the U.S. government and have a long history of zero credit loss. Therefore, the Company did not record an allowance for credit losses for these securities as of September 30, 2024 or September 30, 2023. The Company does not consider HTM investments to have any credit impairment.

The Company does not believe that the available-for-sale debt securities that were in an unrealized loss position have any credit loss impairment as of September 30, 2024 or September 30, 2023. The Company does not intend to sell the investment securities that were in an unrealized loss position and it is not more likely than not that the Company will be required to sell the investment securities before recovery of their amortized cost basis, which may be at maturity. Available-for-sale debt securities issued by U.S. government agencies or U.S. government-sponsored enterprises carry the explicit and/or implicit guarantee of the U.S. government and have a long history of zero credit loss. Corporate debt securities and municipal bonds are considered to have an issuer of high credit quality and the decline in fair value is due to changes in interest rates and other market conditions. The issuers continue to make timely principal and interest payments on the bonds. The fair value is expected to recover as the bonds approach maturity.

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

NOTE D - LOANS RECEIVABLE

For a detailed discussion of loans and credit quality, including accounting policies and the CECL methodology used to estimate the allowance for credit losses, see [Note A "Summary of Significant Accounting Policies"](#) above.

The Company's loans held for investment are divided into two portfolio segments, commercial loans and consumer loans, with each of those segments further split into loan classes for purposes of estimating the allowance for credit losses.

The following table is a summary of loans receivable by loan portfolio segment and class.

	September 30, 2024		September 30, 2023	
	(\$ in thousands)		(\$ in thousands)	
Gross loans by category				
Commercial loans

Net loans	<u>\$ 20,916,354</u>		<u>\$ 17,476,550</u>	

The Company elected to exclude AIR from the amortized cost basis of loans for disclosure purposes and from the calculations of estimated credit losses. As of September 30, 2024 and September 30, 2023, AIR for loans totaled \$92,362,000 and \$77,349,000, respectively, and is included in the "accrued interest receivable" line item on the Company's consolidated statements of financial condition.

Loans in the amount of \$16,957,014,000 and \$8,941,201,000 at September 30, 2024 and September 30, 2023, respectively, were pledged to secure borrowings and available lines of credit. None of the agencies to which we have pledged loans have the right to sell or re-pledge them.

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

The following summary breaks down the Company's fixed rate and adjustable rate loans by time to maturity or to rate adjustment. The table below does not account for fixed rate loans that are swapped to floating using derivatives. See Note G for details regarding fair value hedges of individual fixed rate commercial loans and also hedges of a specified portion of pools of prepayable fixed rate mortgage loans under the "last of layer" method.

	\$ 11,340,860	53.7 %		\$ 9,779,247	46.3 %

The Company has granted loans to officers and directors of the Company and related interests. These loans are made on the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with unrelated persons and do not involve more than the normal risk of collectability. The aggregate dollar amount of these loans, including unfunded commitments to lend, was \$98,271,000 and \$134,860,000 at September 30, 2024 and 2023, respectively. As of September 30, 2024, all of these loans were performing in accordance with contractual terms.

The following table sets forth the amortized cost basis of loans receivable for non-accrual loans and loans 90 days or more past due and still accruing.

On October 1, 2023, the Company adopted ASU 2022-02, *Financial Instruments - Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures*, which eliminated the accounting guidance on troubled debt restructurings ("TDRs") and requires enhanced disclosures for loan modifications to borrowers experiencing financial difficulty. This guidance was applied on a prospective basis. These modified balances are included in their segment cohort based on loan type for the purpose of calculating historical loss rates as described in Note A.

The following table presents the amortized basis of loans that were modified to borrowers experiencing financial difficulty during the period by loan class and modification type. All such modifications during the year were term extensions.

	Twelve Months Ended September 30, 2024		
	Term Extension	% of Total Loan Class Balance	Wtd. Avg. Term Extension
Commercial loans	(in thousands)		(in months)

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

The Company closely monitors the performance of the loans that are modified to borrowers experiencing financial difficulty to understand the effectiveness of modification efforts. The following table presents the performance of such loans that have been modified for the twelve months ended September 30, 2024.

September 30, 2024	Days Delinquent				
	Current	30	60	90	Total
Commercial loans					
Commercial real estate	\$ 23,449	\$ —	\$ —	\$ —	\$ 23,449
Commercial & industrial	58,999	—	992	1,083	61,074
Construction	19,087	—	—	—	19,087
Total commercial loans	101,535	—	992	1,083	103,610
Consumer loans					
Single-family residential	882	—	—	—	882
Total consumer loans	882	—	—	—	882
Total Loans	\$ 102,417	\$ —	\$ 992	\$ 1,083	\$ 104,492

None of the loans modified in the twelve months ended September 30, 2024 defaulted after modification.

We evaluate the credit quality of our commercial loans based on regulatory risk ratings and also consider other factors. It is important to note, just because a loan is risk-rated below a "pass" rating, it does not necessarily indicate there will be future charge-offs on that loan. Loans are downgraded because of either borrower specific or industry-wide financial or operating stresses. Based on this evaluation, the loans are assigned a grade and classified as follows:

- *Pass* – the credit does not meet one of the definitions below.
- *Special mention* – A special mention credit is considered to be currently protected from loss but is potentially weak. No loss of principal or interest is foreseen; however, proper supervision and management attention is required to deter further deterioration in the credit. Assets in this category constitute some undue and unwarranted credit risk but not to the point of justifying a risk rating of substandard. The credit risk may be relatively minor yet constitutes an unwarranted risk in light of the circumstances surrounding a specific asset.
- *Substandard* – A substandard credit is an unacceptable credit. Additionally, repayment in the normal course is in jeopardy due to the existence of one or more well defined weaknesses. In these situations, loss of principal is likely if the weakness is not corrected. A substandard asset is inadequately protected by the current sound worth and paying capacity of the borrower or of the collateral pledged, if any. Assets so classified will have a well-defined weakness or weaknesses that jeopardize the collection or liquidation of the debt. Loss potential, while existing in the aggregate amount of substandard assets, does not have to exist in individual assets risk rated substandard.
- *Doubtful* – A credit classified doubtful has all the weaknesses inherent in one classified substandard with the added characteristic that the weakness makes collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The probability of loss is high, but because of certain important and reasonably specific pending factors that may work to the advantage and strengthening of the asset, its classification as an estimated loss is deferred until its more exact status may be determined. Pending factors include proposed merger, acquisition, or liquidation procedures, capital injection, perfecting liens on additional collateral, and refinancing plans.
- *Loss* – Credits classified loss are considered uncollectible and of such little value that their continuance as a bankable asset is not warranted. This classification does not mean that the asset has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off this asset even though partial recovery may be affected in the future. Losses should

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

be taken in the period in which they are identified as uncollectible. Partial charge-off versus full charge-off may be taken if the collateral offers some identifiable protection.

The following tables present by credit quality indicator, loan class, and year of origination, the amortized cost basis of loans receivable as of September 30, 2024 and September 30, 2023.

	\$ 172,808	\$ (46,470)	\$ 1,369	\$ 49,500	\$ 177,207

¹Provision & transfer amounts within the table do not reflect a provision recapture from unfunded commitments of \$8,000,000.

The Company recorded a provision for credit losses of \$17,500,000 in 2024, compared to a provision of \$41,500,000 for 2023. In 2024, the provision included the initial reserves for acquired non-PCD loans. The increase in the overall ACL in 2024 was a combination of the provision recorded and the reserve for LBC PCD loans booked in purchase accounting. For the year ended September 30, 2024, net charge-offs were \$1,356,000, compared to \$45,101,000 in the prior year. A loan is charged-off when the loss is estimable and it is confirmed that the borrower is not expected to be able to meet its contractual obligations.

Non-accrual loans increased to \$69,541,000 as of September 30, 2024, from \$50,422,000 as of September 30, 2023. Non-performing assets totaled \$77,418,000, or 0.28% of total assets, at September 30, 2024, compared to \$57,924,000, or 0.26% of total assets, as of September 30, 2023.

As of September 30, 2024, the allowance for loan losses of \$203,753,000 is for loans that are evaluated on a pooled basis, which was comprised of \$144,848,000 related to the quantitative component and \$58,905,000 related to management's qualitative overlays (including the forecast component of the reserve).

The Company has an asset quality review function that analyzes its loan portfolio and reports the results of the review to its Board of Directors on a quarterly basis. The single-family residential, HELOC and consumer portfolios are evaluated based on their performance as a pool of loans, since no single loan is individually significant or judged by its risk rating, size or potential risk of loss. The construction, land, multi-family, commercial real estate and commercial and industrial loans are risk rated on a loan by loan basis to determine the relative risk inherent in specific borrowers or loans. Based on that risk rating, the loans are assigned a grade and classified as described in [Note D "Loans Receivable."](#) It is important to note, just because a loan is risk-rated below a "pass" rating, it does not necessarily indicate there will be future charge-offs on that loan. Loans are downgraded because of either borrower specific or industry-wide financial or operating stresses.

The following tables provide the amortized cost of loans receivable based on risk rating categories (as previously defined).

NOTE F - FAIR VALUE MEASUREMENTS

FASB ASC 820, *Fair Value Measurement* ("ASC 820") defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active exchange markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The Company has established and documented the process for determining the fair values of its assets and liabilities, where applicable. Fair value is based on quoted market prices, when available, for identical or similar assets or liabilities. In the absence of quoted market prices, fair value is determined using valuation models or third-party appraisals. The following is a description of the valuation methodologies used to measure and report the fair value of financial assets and liabilities on a recurring or nonrecurring basis.

Measured on a Recurring Basis

Available-for-sale investment securities and derivative contracts

Securities available for sale are recorded at fair value on a recurring basis. The fair value of debt securities are priced using model pricing based on the securities' relationship to other benchmark quoted prices as provided by an independent third party, and under GAAP are considered a Level 2 input method. Securities that are traded on active exchanges, including the Company's equity securities, are measured using the closing price in an active market and are considered a Level 1 input method.

Certain loans acquired in the Merger which were designated as held for sale were recorded at fair value to be remeasured on a recurring basis until sold. The fair value of these loans was based on observable market data including dealer quotes and bids from third parties. These were considered a Level 2 input method.

The Company offers interest rate swaps to its variable rate borrowers who want to manage their interest rate risk. At the same time, the Company enters into the opposite trade with a counterparty to offset its interest rate risk. The Company has also entered various forms of fair value hedges and cash flow hedges using interest rate swaps. The fair value of these interest rate swaps are estimated by a third party pricing service using a discounted cash flow technique. These are considered a Level 2 input method.

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

There were no transfers between, into and/or out of Level 1, 2 or 3 during the year ended September 30, 2024 or September 30, 2023.

Measured on a Nonrecurring Basis

Certain assets and liabilities are measured at fair value on a nonrecurring basis after initial recognition such as collateral dependent loans and real estate owned ("REO"). REO consists principally of properties acquired through foreclosure. From time to time, and on a nonrecurring basis, adjustments using fair value measurements are recorded to reflect increases or decreases based on the discounted cash flows, the current appraisal or estimated value of the collateral or REO property.

When management determines that the fair value of the collateral or the REO requires additional adjustments, either as a result of an updated appraised value or when there is no observable market price, the Company classifies the collateral dependent loan or real estate owned as Level 3. Level 3 assets recorded at fair value on a nonrecurring basis includes loans for which an allowance was established or a partial charge-off was recorded based on the fair value of collateral, as well as real estate owned where the fair value of the property was less than the cost basis.

The following tables present the aggregated balance of assets that were measured at fair value on a nonrecurring basis for the periods presented, and the total gains (losses) resulting from those fair value adjustments during the respective periods. The estimated fair value measurements are shown gross of estimated selling costs.

	September 30, 2024				Twelve Months Ended September 30, 2024
	Level 1	Level 2	Level 3	Total	Total Gains (Losses)

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

Fair Values of Financial Instruments

U. S. GAAP requires disclosure of fair value information about financial instruments, whether or not recognized on the statement of financial condition, for which it is practicable to estimate those values. Certain financial instruments and all non-financial instruments are excluded from the disclosure requirements. Accordingly, the aggregate fair value estimates presented do not reflect the underlying fair value of the Company. Although management is not aware of any factors that would materially affect the estimated fair value amounts presented below, such amounts have not been comprehensively revalued for purposes of these financial statements since the dates shown, and therefore, estimates of fair value subsequent to those dates may differ significantly from the amounts presented below.

Other liabilities - client swap program hedges	2	47,388	47,388	79,668	79,668
Other liabilities - mortgage loan fair value hedges	2	667	667	—	—

The following methods and assumptions were used to estimate the fair value of financial instruments:

Cash and cash equivalents – The carrying amount of these items is a reasonable estimate of their fair value.

Available-for-sale securities and held-to-maturity securities – Securities at fair value are primarily priced using model pricing based on the securities' relationship to other benchmark quoted prices as provided by an independent third party and are considered a Level 2 input method. Equity securities which are exchange traded are considered a Level 1 input method.

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

Loans receivable – Fair values are estimated first by stratifying the portfolios of loans with similar financial characteristics. Loans are segregated by type such as multi-family real estate, residential mortgage, construction, commercial, consumer and land loans. Each loan category is further segmented into fixed- and adjustable-rate interest terms. For residential mortgages and multi-family loans, the bank determined that its best exit price was by securitization. MBS benchmark prices are used as a base price, with further loan level pricing adjustments made based on individual loan characteristics such as FICO score, LTV, Property Type and occupancy. For all other loan categories an estimate of fair value is then calculated based on discounted cash flows using a discount rate offered and observed in the market on similar products, plus an adjustment for liquidity to reflect the non-homogeneous nature of the loans, as well as, an annual loss rate based on historical losses to arrive at an estimated exit price fair value. Fair value for impaired loans is also based on recent appraisals or estimated cash flows discounted using rates commensurate with risk associated with the estimated cash flows. Assumptions regarding credit risk, cash flows and discount rates are judgmentally determined using available market information and specific borrower information.

FHLB stock – The fair value is based upon the par value of the stock which equates to its carrying value.

Time deposits – The fair value of fixed-maturity time deposits is estimated by discounting the estimated future cash flows using the rates currently offered for deposits with similar remaining maturities.

Borrowings – The fair value of FHLB advances and FRB borrowings is estimated by discounting the estimated future cash flows using rates currently available to the Company for debt with similar remaining maturities.

Junior subordinated deferrable interest debentures - The fair value of junior subordinated debentures is estimated using an income approach valuation technique. The significant unobservable input utilized in the estimation of fair value of these instruments is the credit risk adjusted spread. The credit risk adjusted spread represents the nonperformance risk of the liability, contemplating the inherent risk of the obligation. The ending carrying (fair) value of the junior subordinated debentures measured at fair value represents the estimated amount that would be paid to transfer these liabilities in an orderly transaction amongst market participants. Due to credit concerns in the capital markets and inactivity in the trust preferred markets that have limited the observability of market spreads, the Company has classified this as a Level 3 fair value measurement.

Interest rate swaps – The Company offers interest rate swaps to its variable rate borrowers who want to manage their interest rate risk. At the same time, the Bank enters into the opposite trade with a counterparty to offset its interest rate risk. The Company also uses interest rate swaps for various fair value hedges and cash flow hedges. The fair value of interest rate swaps are estimated by a third-party pricing service using a discounted cash flow technique.

NOTE G - DERIVATIVES AND HEDGING ACTIVITIES

The following tables present the fair value, notional amount and balance sheet classification of derivative assets and liabilities at September 30, 2024 and September 30, 2023.

The Company enters into interest rate swaps to hedge interest rate risk. These arrangements include hedges of individual fixed rate commercial loans and also hedges of a specified portion of pools of prepayable fixed rate mortgage loans under the "last of layer" method. These relationships qualify as fair value hedges under FASB ASC 815, *Derivatives and Hedging* ("ASC 815"), which provides for offsetting of the recognition of gains and losses of the respective interest rate swap and the hedged items. Gains and losses on interest rate swaps designated in these hedge relationships, along with the offsetting gains and losses on the hedged items attributable to the hedged risk, are recognized in current earnings within the same income statement line item.

Upon electing to apply ASC 815 fair value hedge accounting, the carrying value of the hedged items are adjusted to reflect the cumulative impact of changes in fair value attributable to the hedged risk. The hedge basis adjustment remains with each hedged item until the hedged item is de-recognized from the balance sheet. The following tables presents the impact of fair value hedge accounting on the carrying value of the hedged items at September 30, 2024 and September 30, 2023.

(In thousands)	September 30, 2024	
Balance sheet line item in which hedged item is recorded	Carrying value of hedged items	Cumulative gain (loss) fair value hedge adjustment included in carrying amount of hedged items
Loans receivable (1) (2)	\$ 7,287,540	\$ 20,005
	<u>\$ 7,287,540</u>	<u>\$ 20,005</u>

(1) Includes the amortized cost basis of the closed mortgage loan portfolios used to designate the hedging relationships in which the hedged items are the last layer expected to be remaining at the end of the hedging relationships. At September 30, 2024, the amortized cost basis of the closed loan portfolios used in the hedging relationships was \$7,252,017,000, the cumulative basis adjustment associated with the hedging relationships was \$21,476,000, and the amount of the designated hedged items was \$2,570,000,000. During the year, hedge accounting was discontinued on a \$300,000,000 last of layer hedge. A basis adjustment of \$1,232,211 associated with the terminated portion of the hedge was deferred and is being accreted over the remaining life of the associated pool of loans.

(2) Includes the amortized cost basis of commercial loans designated in fair value hedging relationships. At September 30, 2024, the amortized cost basis of the hedged commercial loans was \$35,523,000 and the cumulative basis adjustment associated with the hedging relationships was \$(1,471,000).

(In thousands)	September 30, 2023	
Balance sheet line item in which hedged item is recorded	Carrying value of hedged items	Cumulative gain (loss) fair value hedge adjustment included in carrying amount of hedged items
Loans receivable (1) (2)	\$ 1,816,870	\$ (48,865)
	<u>\$ 1,816,870</u>	<u>\$ (48,865)</u>

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

(1) Includes the amortized cost basis of the closed mortgage loan portfolios used to designate the hedging relationships in which the hedged items are the last layer expected to be remaining at the end of the hedging relationships. At September 30, 2023, the amortized cost basis of the closed loan portfolios used in the hedging relationships was \$1,780,503,000, the cumulative basis adjustment associated with the hedging relationships was \$(45,622,000), and the amount of the designated hedged items was \$670,000,000.

(2) Includes the amortized cost basis of commercial loans designated in fair value hedging relationships. At September 30, 2023, the amortized cost basis of the hedged commercial loans was \$36,367,000 and the cumulative basis adjustment associated with the hedging relationships was \$(3,243,000).

The Company has entered into interest rate swaps to convert certain short-term borrowings to fixed rate payments. The primary purpose of these hedges is to mitigate the risk of changes in future cash flows resulting from increasing interest rates. For qualifying cash flow hedges under ASC 815, gains and losses on the interest rate swaps are recorded in accumulated other comprehensive income ("AOCI") and then reclassified into earnings in the same period the hedged cash flows affect earnings and within the same income statement line item as the hedged cash flows. As of September 30, 2024, the maturities for hedges of adjustable rate borrowings ranged from less than one year to five years, with the weighted average being 5.1 years.

The following table presents the impact of derivative instruments (cash flow hedges on borrowings) on AOCI for the periods presented.

(In thousands)	Twelve Months Ended September 30,	
Amount of gain/(loss) recognized in AOCI on derivatives in cash flow hedging relationships	2024	2023
Interest rate contracts:		
Pay fixed/receive floating swaps on cash flow hedges of borrowings	\$ (67,102)	\$ 4,428
Total pre-tax gain/(loss) recognized in AOCI	<u>\$ (67,102)</u>	<u>\$ 4,428</u>

The Company periodically enters into certain interest rate swap agreements in order to provide commercial loan customers the ability to convert from variable to fixed interest rate payments, while the Company retains a variable rate loan. Under these agreements, the Company enters into a variable rate loan agreement and a swap agreement with the client. The swap agreement effectively converts the client's variable rate loan into a fixed rate. The Company enters into a corresponding swap agreement with a third party in order to offset its exposure on the variable and fixed components of the client's swap agreement. The interest rate swaps are derivatives under ASC 815, with changes in fair value recorded in earnings. The net impact to the statement of operations for the year ended September 30, 2024 was an increase in other income of \$241,000. The net impact for the year ended September 30, 2023 was a decrease in other income of \$870,000. As of September 30, 2024, none of the outstanding notional balance is associated with related party loans.

The following table presents the impact of derivative instruments (client swap program) that are not designated in accounting hedges under ASC 815 for the periods presented.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

NOTE H – REVENUE FROM CONTRACTS WITH CUSTOMERS

Net interest income on financial assets and liabilities is excluded from the scope of ASU No. 2014-09, *Revenue from Contracts with Customers* ("ASC 606") thus a significant majority of our revenues are not subject to the referenced guidance.

Revenue streams that are within the scope of the guidance are presented within noninterest income and are, in general, recognized as revenue at the same time the Company's obligation to the customer is satisfied. Most of the Company's customer contracts that are within the scope of the guidance are cancelable by either party without penalty and are short-term in nature. These sources of revenue include depositor and other consumer and business banking fees, commission income, as well as debit and credit card interchange fees. For fiscal years ended 2024 and 2023, in scope revenue streams represented approximately 3.2% and 3.9% of our total revenues, respectively. As this standard is immaterial to our consolidated financial statements, the Company has omitted certain disclosures in ASC 606, including the disaggregation of revenue table. Sources of noninterest income within the scope of the guidance include the following:

Deposit related and other service charges (recognized in Deposit Fee Income): The Company's deposit accounts are governed by standardized contracts customary in the industry. Revenues are earned at a point in time or over time (monthly) from account maintenance fees and charges for specific transactions such as wire transfers, stop payment orders, overdrafts, debit card replacements, check orders and cashiers' checks. The Company's performance obligation related to each of these fees is generally satisfied, and the related revenue recognized, at the time the service is provided (point in time or monthly). The Company is principal in each of these contracts.

Debit and credit card interchange fees (recognized in Deposit Fee Income): The Company receives interchange fees from the debit card and credit card payment networks based on transactions involving debit or credit cards issued by the Company, generally measured as a percentage of the underlying transaction. Interchange fees from debit and credit card transactions are recognized as the transaction processing services are provided by the network. The Company acts as an agent in the card payment network arrangement so the interchange fees are recorded net of any expenses paid to the principal (the card payment networks in this case).

Insurance agency commissions (recognized in Other Income): WAFD Insurance Group, Inc. is a wholly-owned subsidiary of the Bank that operates as an insurance agency, selling and marketing property and casualty insurance policies for a small number of high-quality insurance carriers. WAFD Insurance Group, Inc. earns revenue in the form of commissions paid by the insurance carriers for policies that have been sold. In addition to the origination commission, WAFD Insurance Group, Inc. may also receive contingent incentive fees based on the volume of business generated for the insurance carrier and based on policy renewal rates.

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

As of September 30, 2024, there are no advances that are callable by the FHLB. Taking into account cash flow hedges, the weighted average effective maturity of FHLB advances at September 30, 2024 is 2.34 years.

Financial information pertaining to the weighted-average cost and the amount of FHLB advances were as follows.

	2024	2023	2022
	(\$ in thousands)		
Weighted average interest rate, including cash flow hedges, at end of year	3.32 %	3.83 %	2.02 %
Weighted daily average interest rate, including cash flow hedges, during the year	3.78 %	3.42 %	1.66 %
Daily average of FHLB advances during the year	\$2,952,872	\$2,916,849	\$1,731,110
Maximum amount of FHLB advances at any month end	\$4,338,731	\$3,425,000	\$2,125,000
Interest expense during the year (including swap interest income and expense)	\$ 111,574	\$ 99,631	\$ 28,729

The Bank has a credit line with the FHLB - DM equal to 45% of total assets depending on specific collateral eligibility. The Bank has entered into borrowing agreements with the FHLB - DM to borrow funds under a short-term floating rate cash management advance program and fixed-rate term loan agreements. All borrowings are secured by stock of the FHLB - DM, deposits with the FHLB - DM, and a blanket pledge of qualifying loans receivable. The Bank also has a credit line with the FHLB - SF in support of LBC borrowings from the FHLB - SF, but the Bank is unable to take down new advances against this line. The FHLB - SF credit line is secured by a line-item pledge of single-family residential mortgages that are specifically identified.

The Bank participates in the FRB of San Francisco Borrower-in-Custody program which collateralizes primary credit borrowings. The Company also elected to utilize the Federal Reserve's Bank Term Funding Program ("BTFP") to leverage its highly favorable terms to fortify the Bank's liquidity position. These borrowings are repayable at any time without penalty and were the lowest cost funding source available at the time. The Federal Reserve ceased making new BTFP loans on March 11, 2024. During fiscal 2024, the Company obtained in the Merger an additional balances of \$325,000,000 from the FRB's BTFP in addition to the \$750,000,000 borrowed the previous year. This program offered up to 1 year fixed-rate term borrowings that are prepayable without penalty. These borrowings are not callable by the FRB and have contractual maturity dates within 1 year.

NOTE M - JUNIOR SUBORDINATED DEFERRABLE INTEREST DEBENTURES

The Company acquired in the Merger two wholly-owned trust companies (the "Trusts") formed by LBC which issued guaranteed preferred beneficial interests (the "Trust Securities") in the LBC's junior subordinated deferrable interest debentures (the "Notes"). The Company is not considered the primary beneficiary of the Trusts and therefore, the Trusts are not consolidated in the Company's financial statements, but rather the junior subordinated debentures are shown as a liability. The Company's investment in the common securities of the Trusts, totaling \$1.9 million, is included in other assets in the consolidated statements of financial condition. The sole asset of the Trusts are the Notes that they hold.

The Trusts have invested the proceeds of such Trust Securities in the Notes. Each of the Notes has an interest rate equal to the corresponding Trust Securities distribution rate. The Company has the right to defer payment of interest on the Notes at any time or from time to time for a period not exceeding five years provided that no extension period may extend beyond the stated maturity of the relevant Notes. During any such extension period, distributions on the Trust Securities will also be deferred, and the Company's ability to pay dividends on its common stock will be restricted.

The Company has assumed LBC's contractual arrangements which, taken collectively, fully and unconditionally guarantee payment of: (i) accrued and unpaid distributions required to be paid on the Trust Securities; (ii) the redemption price with respect to any Trust Securities called for redemption by the Trusts; and (iii) payments due upon a voluntary or involuntary dissolution, winding up or liquidation of the Trusts. The Trust Securities are mandatorily redeemable upon maturity of the Notes, or upon earlier redemption as provided in the indenture. The Company has the right to redeem the Notes purchased by the Trusts, in whole or in part, on or after the redemption date. As specified in the indenture, if the Notes are redeemed prior to maturity, the redemption price will be the principal amount and any accrued but unpaid interest.

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

The following table is a summary of the outstanding Trust Securities and Notes at September 30, 2024.

Issuer	Issued Amount	Carrying Amount ¹	Rate	Date Issued	Maturity Date	Rate Index (Quarterly Reset)
(\$ in thousands)						
Luther Burbank Statutory Trust I	\$ 41,238	\$ 33,681	6.59 %	3/30/2006	6/15/2036	3 month CME Term SOFR + Tenor Spread Adjustment (0.26%) + 1.38%
Luther Burbank Statutory Trust II	\$ 20,619	\$ 17,037	6.83 %	3/30/2007	6/15/2037	3 month CME Term SOFR + Tenor Spread Adjustment (0.26%) + 1.62%

¹Includes fair value adjustments made as a result of purchase accounting

NOTE N - COMMITMENTS AND CONTINGENCIES

Lease Commitments - The Company's lease commitments consist primarily of real estate property for branches and office space under various non-cancellable operating leases that expire between 2024 and 2070. The majority of the leases contain renewal options and provisions for increases in rental rates based on a predetermined schedule or an agreed upon index. If, at lease inception, the Company considers the exercising of a renewal option to be reasonably certain, the Company will include the extended term in the calculation of the right-of-use asset and lease liability.

Operating lease liabilities and right-of-use assets are recognized on the lease commencement date based on the present value of the future minimum lease payments over the lease term. The future lease payments are discounted at a rate that represents the Company's collateralized borrowing rate for financing instruments of a similar term and are included in Accrued expenses and other liabilities. The related right-of-use asset is included in Other assets.

The table below presents the Company's operating lease right-of-use asset and the related lease liability.

(In thousands)	September 30, 2024	September 30, 2023
Operating lease asset	\$ 37,486	\$ 21,126
Operating lease liability	\$ 40,788	\$ 23,422

As of September 30, 2024, the Company's operating leases have a weighted average remaining lease term of 9.5 years and a weighted average discount rate of 3.74%. Cash paid for amounts included in the measurement of the above operating lease liability was \$9,627,000 and \$6,418,000 for the twelve months ended September 30, 2024 and 2023, respectively. Right-of-use assets obtained in exchange for new operating lease liabilities during the twelve months ended September 30, 2024 and 2023 were \$12,890,000 and \$2,349,000. Right-of-use assets obtained in the Merger were valued at \$11,478,000.

The following table presents the components of net lease costs, a component of Occupancy expense. The Company elected not to separate lease and non-lease components and instead account for them as a single lease component. Variable lease costs include subsequent increases in index-based rents and variable payments such as common area maintenance.

(In thousands)	Twelve Months Ended September 30, 2024	Twelve Months Ended September 30, 2023
Operating lease cost	\$ 8,521	\$ 6,424
Variable lease cost	2,504	1,262
Sublease income	(405)	(369)
Net lease cost	\$ 10,620	\$ 7,317

The following table shows future minimum payments for operating leases as of September 30, 2024 for the respective periods.

WAFD, INC. AND SUBSIDIARIES

Present value of minimum lease payments	\$	40,788

Rental expense, including amounts paid under month-to-month cancelable leases, amounted to \$11,025,000 and \$7,686,000 in 2024, and 2023, respectively.

Financial Instruments with Off-Balance Sheet Risk - Off-balance-sheet credit exposures for the Company unfunded loan commitments and letters of credit from the FHLB - DM and the FHLB - SF. As of September 30, 2024, the Bank was obligated on FHLB letters of credit totaling \$902,606,000 and unfunded loan commitments of \$2,928,697,000. As of September 30, 2023 FHLB letter of credit obligations were \$0 and unfunded loan commitments were \$3,625,333,000. The reserve for unfunded commitments was \$21,500,000 as of September 30, 2024, which is a decrease from \$24,500,000 at September 30, 2023. See [Note A "Summary of Significant Accounting Policies"](#) for details regarding the reserve methodology.

Legal Proceedings - The Company and its subsidiaries are from time to time defendants in and are threatened with various legal proceedings arising from regular business activities. Management, after consulting with legal counsel, is of the opinion that the ultimate liability, if any, resulting from these pending or threatened actions and proceedings will not have a material effect on the financial statements of the Company.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

NOTE O - INCOME TAXES

Under generally accepted accounting principles, the Company uses the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates applicable to taxable income in the years in which those temporary differences are expected to reverse.

The table below provides a summary of the Company's tax assets and liabilities, including deferred tax assets and deferred tax liabilities by major source. Deferred tax balances represent temporary differences between the financial statement and corresponding tax treatment of income, gains, losses, deductions or credits. With the completion of the Merger, the deferred tax amounts now include a number of deferred tax items carried over from LBC, as well as new deferred tax items created as a consequence of the purchase accounting process and post-merger asset sales. In particular, deferred tax assets now include significant new items for loan purchase discount and loss carryover.

	September 30, 2024	September 30, 2023
	(In thousands)	
Deferred tax assets		
Allowance for credit losses	\$ 53,227	\$ 46,191
REO reserves	480	300
Non-accrual loan interest	3,124	1,797
Accrued bonus and deferred compensation	7,815	2,901
Stock based compensation	4,696	3,089
Lease liability	9,626	5,367
Loan purchase discount	48,064	—
Loss carryover	68,483	—
Other	1,739	2,804
Total deferred tax assets	197,254	62,449
Deferred tax liabilities		
FHLB stock dividends	6,171	9,741
Net unrealized gain on available-for-sale securities and cash flow hedges	13,758	13,933
Loan origination fees and costs	11,777	11,471
Premises and equipment	16,390	18,155
Lease right-of-use assets	9,304	4,841
Equity investments	3,700	4,244
Acquired intangibles	12,824	4,798
Other	184	483
Total deferred tax liabilities	74,108	67,666
Net deferred tax asset (liability)	123,146	(5,217)
Current tax asset (liability)	(3,898)	13,696
Net tax asset (liability)	\$ 119,248	\$ 8,479

At the end of the fiscal year, the Company has about \$290 million of ordinary tax loss to be carried to future years. The loss carryover amount is based in large part from the tax loss realized from the portfolio loan sale following the Luther Burbank merger. Because of the annual loss limitation rules under Section 382 of the Internal Revenue Code, it will take about 17 years for the Company to utilize all that loss carryover against its future taxable income. However, there is no applicable time limit in this case, and therefore Company does not anticipate any expiration of the loss carryover amount.

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

In its deferred tax assets at the end of the fiscal year, the Company also has about \$1.2 million of remaining Oregon tax credits that the Company previously purchased as part of its community investments to support Oregon farmworkers housing. That remaining Oregon tax credit will be fully utilized under an installment schedule over the next two years.

The table below presents a reconciliation of the statutory federal income tax rate to the Company's effective income tax rate.

Year ended September 30,	2024	2023	2022
Statutory income tax rate	21.0 %	21.0 %	21.0 %
State income tax	2.3	1.7	1.9
Tax-exempt interest income	(2.1)	(1.2)	(0.9)
Interest expense disallowance	1.2	0.5	0.1
Low-income housing investments	(1.1)	(1.3)	(0.9)
Other differences	0.6	0.1	—
Effective income tax rate	<u>21.9 %</u>	<u>20.8 %</u>	<u>21.2 %</u>

The following table summarizes the Company's income tax expense (benefit) for the respective periods.

Deferred	(6,639)	4,558	6,253
	<u>\$ 56,015</u>	<u>\$ 67,650</u>	<u>\$ 63,707</u>

The Company does not have a liability for uncertain tax positions as of September 30, 2024 or September 30, 2023.

The Company's federal income tax returns are open and subject to potential examination by the IRS for fiscal years 2021 and later. State income tax returns are generally subject to examination for a period of three to five years after filing. The state impact of any federal changes remains subject to examination by various states for a period of up to two years after formal notification to the states.

NOTE P - EMPLOYEE BENEFIT PLANS

401(k) Plan - The Company maintains a 401(k) Plan (the "Plan") for the benefit of its employees. Company contributions are made annually as approved by the Board of Directors. Such amounts are not in excess of amounts permitted by the Employee Retirement Income Security Act of 1974.

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

Plan participants may make voluntary after-tax contributions of their considered earnings as defined by the Plan. In addition, participants may make pre-tax contributions up to the statutory limits through the 401(k) provisions of the Plan. The annual addition from contributions to an individual participant's account in this Plan cannot exceed the lesser of 100% of base salary or \$69,000.

New employees become eligible to participate in the Plan and make employee contributions on the first day of the calendar month following the completion of 30 days of employment. Such eligible employees do not become eligible for profit sharing or matching contributions until the first day of the quarter (January 1, April 1, July 1 or October 1) following completion of 1 year of service. A "year of service" is defined as a 12-month period in which the eligible employee works at least 1,000 hours of service and the first eligibility service period starts on the first day of employment.

The Plan provides for a guaranteed safe harbor matching contribution equal to 100% of the first 4% of compensation that employees contribute to their account and this amount is immediately vested. The safe harbor match is not subject to the six-year vesting schedule of the profit sharing contribution. This provides plan participants more investment flexibility. Additionally, the Company anticipates that all eligible employees, regardless of personal plan participation, will continue to receive an annual discretionary profit-sharing contribution from the Company.

Company contributions to the Plan amounted to \$8,185,000, \$8,648,000 and \$10,559,000 for the years ended 2024, 2023 and 2022, respectively.

Employee Stock Purchase Plan - Upon approval by common shareholders, the Company implemented an Employee Stock Purchase Plan ("ESPP") in 2023 in which substantially all employees of the Company are eligible to participate. The ESPP provides participants the opportunity to purchase common stock of the Company at 95% of the closing stock price on the last day of the purchase period. Purchase periods are three-month periods that are set as January 1 through March 31, April 1 through June 30, July 1 through September 30, and October 1 through December 31 of each year. A total of 500,000 shares were made available for issuance. Participants of the ESPP purchased 35,782 shares for \$956,550 during 2024. At September 30, 2024 there were 457,191 shares remaining for purchase under the ESPP.

Supplemental Executive Retirement Plan - Also approved by our shareholders, the Company implemented a Supplemental Executive Retirement Plan ("SERP") during 2023. This non-qualified deferred compensation plan provides retirement benefits to certain highly compensated executives. The SERP credits, if vested, will be distributed in the form of WaFd, Inc. common stock, in ten (10) substantially equal annual installments, following retirement of the executive officer. \$11,700,000 in common stock units, and related dividend equivalents, were authorized with each unit having a value equal to one share of WaFd, Inc. common stock. These units will vest based on the age of each participant as follows:

Attained Age	Vested Percentage
Before 62	—%
62	80%
63	90%
64	100%

During fiscal 2024, 12,710 units were credited to participant accounts as a result of dividends paid. As a result, there were a total of 388,968 share units with a weighted average grant date fair value of \$31.56 held within SERP accounts at September 30, 2024. SERP related expense recognized during the year was \$1,013,000. There were no shares paid during 2024 and there were no participants vested.

NOTE Q - STOCK AWARD PLANS

The Company's stock-based compensation plan provides for grants of stock options and restricted stock. On January 22, 2020, the shareholders approved the 2020 Incentive Plan. Upon approval of the 2020 Incentive Plan, the 2011 Incentive Plan terminated with respect to future awards, and the remaining shares that were not awarded under the 2011 Incentive Plan as of that date were

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

canceled. A total of 3,200,000 shares were made available for grant under the 2020 Incentive Plan and 941,420 shares remain available for issuance as of September 30, 2024.

When applicable, stock options are granted with an exercise price equal to the market price of the Company's stock at the date of grant; those option awards generally vest based on three to five years of continuous service and have 10-year contractual terms. The Company's policy is to issue new shares upon option exercises. The fair value of stock options granted is estimated on the date of grant using the Black-Scholes option-pricing model. Additionally, there may be other factors that would otherwise have a significant effect on the value of employee stock options granted but are not considered by the model. Expected volatility is based on the historical volatility of the Company's stock. The risk-free interest rate is based on the U.S. Treasury yield curve that is in effect at the time of grant with a remaining term equal to the options' expected life. The expected term represents the period of time that options granted are expected to be outstanding.

Stock Option Awards:

There were no stock options granted under the incentive plans during 2024, compared to 779,740 options granted in 2023 and 352,043 options granted in 2022 under the previous plan.

A summary of stock option activity and changes during the year are as follows.

Options	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value (In thousands)
Outstanding at September 30, 2022	1,137,608	\$ 30.06	8	\$ 5,330

As of September 30, 2024, there was \$2,071,520 of unrecognized compensation cost related to stock options.

Restricted Stock Awards:

The Company grants shares of restricted stock pursuant to the incentive plans. The restricted stock grants are subject to a service condition and vest over a period of one to seven years.

Certain grants of restricted stock to executive officers are also subject to additional market and performance conditions based upon meeting certain total shareholder return targets pre-established by the Board. The Company had a total of 568,987 shares of restricted stock outstanding as of September 30, 2024, with a total grant date fair value of \$13,815,004.

The following table summarizes information about unvested restricted stock activity.

Year ended September 30,	2024		2023		2022	
Non-vested Restricted Stock	Outstanding	Weighted Average Fair Value	Outstanding	Weighted Average Fair Value	Outstanding	Weighted Average Fair Value
Outstanding at beginning of period	495,782	\$ 24.40	489,777	\$ 21.64	522,991	\$ 19.96
Granted	366,616	28.84	247,966	26.48	224,593	25.34
Vested	(250,001)	30.87	(119,956)	29.87	(246,119)	21.34

Outstanding at end of period	568,987	\$ 24.28	495,782	\$ 24.40	489,777	\$ 21.64

Compensation expense related to restricted stock awards was \$5,695,000, \$4,512,000, and \$4,367,000 for the years ended 2024, 2023 and 2022, respectively.

NOTE R - SHAREHOLDERS' EQUITY

The Company and the Bank are subject to various regulatory capital requirements. Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios (set forth in the following table) of Common Equity Tier 1, Tier 1 and Total capital to risk weighted assets (as defined in the regulations) and Tier 1 capital to average assets (as defined in the regulations). Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary action by regulators that, if undertaken, could have a direct material effect on the Company's financial statements. The Company and the Bank are also subject to certain restrictions on the amount of dividends that they may declare without prior regulatory approval.

On February 8, 2021, in connection with an underwritten public offering, the Company issued 300,000 shares of 4.875% Noncumulative Perpetual Series A Preferred Stock. Net proceeds, after underwriting discounts and expenses, were \$293,325,000. The public offering consisted of the issuance and sale of 12,000,000 depositary shares, each representing a 1/40th interest in a share of the Series A Preferred Stock, at a public offering price of \$25.00 per depositary share. Holders of the depositary shares

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

are entitled to all proportional rights and preferences of the Series A Preferred Stock (including, dividend, voting, redemption and liquidation rights). The depositary shares are traded on the NASDAQ Global Select Market under the symbol "WAFDP." The Series A Preferred Stock is redeemable at the option of the Company, subject to all applicable regulatory approvals, on or after April 15, 2026.

As of September 30, 2024, and 2023, the Company and the Bank met all capital adequacy requirements to which they are subject, and the Bank's regulators categorized it as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum Common Equity Tier 1, Tier 1 risk-based, Total risk-based and Tier 1 leverage ratios as set forth in the following table. The Bank's actual capital amounts and ratios as of these dates are also presented. There are no conditions or events since that management believes have changed the Bank's categorization.

	Actual		Capital Adequacy Guidelines	Categorized as Well Capitalized Under Prompt Corrective Action Provisions
	Capital	Ratio	Ratio	Ratio
(\$ in thousands)

At periodic intervals, the Federal Reserve, the WDFI and the FDIC examine the Company's and the Bank's financial statements as part of their oversight. Based on their examinations, these regulators can direct that the Company's or Bank's financial statements be adjusted in accordance with their findings.

WAFD, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 2024, 2023, AND 2022

The Company and the Bank are subject to regulatory restrictions on paying dividends.

The Company has an ongoing common share repurchase program and 1,058,178 shares were repurchased during 2024 at a weighted average price of \$25.29. In 2023, 1,165,161 shares were repurchased at a weighted average price of \$26.14. As of September 30, 2024, management had authorization from the Board of Directors to repurchase up to 11,501,005 additional shares.

The following table sets forth information regarding earnings per common share calculations.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of September 30, 2024, the Company carried out an evaluation, under the supervision and participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-15(e) of the Exchange Act. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective, as of the end of the period covered in this report, to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported within time periods specified in SEC rules and forms and were effective to ensure that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting practices in the United States of America.

The Company's management assessed the effectiveness of the Company's internal control over financial reporting as of September 30, 2024. In making the assessment, the Company's management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in the 2013 version of its Internal Control-Integrated Framework. Based on its assessment, the Company's management believes that as of September 30, 2024, the Company's internal control over financial reporting was effective based on this criteria.

The Company's independent auditors, Deloitte & Touche LLP, an independent registered public accounting firm, have issued an audit report on the Company's internal control over financial reporting, which appears in this annual report on Form 10-K.

There have been no changes in the Company's internal control over financial reporting during the Company's most recent fiscal quarter ended September 30, 2024 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and Board of Directors of WaFd, Inc.

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of WaFd, Inc. and subsidiaries (the “Company”) as of September 30, 2024, based on criteria established in Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Because management's assessment and our audit were conducted to meet the reporting requirements of Section 112 of the Federal Deposit Insurance Corporation Improvement Act (FDICIA), management's assessment and our audit of the Company's internal control over financial reporting included controls over the preparation of the schedules equivalent to the basic financial statements in accordance with the instructions for the Office of the Comptroller of the Currency Instructions for Call Reports for Balance Sheet on schedule RC, Income Statement on schedule RI, and Changes in Company Equity Capital on schedule RI-A. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of September 30, 2024, based on criteria established in Internal Control — Integrated Framework (2013) issued by COSO.

We have not examined and, accordingly, we do not express an opinion or any other form of assurance on management's statement referring to compliance with laws and regulations.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended September 30, 2024, of the Company and our report dated November 20, 2024, expressed an unqualified opinion on those financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Deloitte + Touche LLP

Seattle, Washington
November 20, 2024

Item 9B. Other Information

Rule 10b5-1 Plan and Non-Rule 10b5-1 Trading Arrangement Adoptions, Terminations, and Modifications

During the three months ended September 30, 2024, none of the Company's directors or "officers" (as defined in Rule 16a-1(f) under the Exchange Act) adopted or terminated a "Rule 10b5-1 trading arrangement" or "non-Rule 10b5-1 trading arrangement," as each term is defined in Item 408 of SEC Regulation S-K.

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this item will be set forth in the Company's definitive proxy statement for its Annual Meeting of Shareholders to be held on February 11, 2025 (the "2024 Proxy Statement") under the following captions, and is incorporated herein by reference.

- Proposal 1: Election of Directors
- Executive Officers
- Corporate Governance
- Delinquent Section 16 Reports

Code of Ethics

The Company has adopted a code of ethics that applies to all senior financial officers, including its Chief Executive Officer and Chief Financial Officer. The code of ethics is publicly available on the Company's website under "Investor Relations - Corporate Governance" at www.wafdbank.com. If the Company makes any substantive amendments to the code of ethics or grants any waiver from a provision of the code, it will disclose the nature of such amendment or waiver on its website or in a report on Form 8-K.

Insider Trading Policy

The Company has adopted insider trading policies and procedures governing the purchase, sale, and/or other dispositions of the Company's securities by directors, officers and employees, or the Company itself, that are reasonably designed to promote compliance with insider trading laws, rules and regulations, and any listing standards applicable to the Company. A copy of the Company's Trading Policy has been filed as Exhibit 19.1 to this Annual Report on Form 10-K.

Item 11. Executive Compensation

The information required by this item will be set forth in the 2024 Proxy Statement under the captions "Executive Compensation" and "Corporate Governance – Compensation Committee Interlocks And Insider Participation" and is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters

The information required by this item will be set forth in the 2024 Proxy Statement under the caption "Security Ownership of Certain Beneficial Owners and Management" and "Equity Compensation Plan Information" and is incorporated herein by reference.

Additional information about stock options and other equity compensation plans is included in Note Q to the Consolidated Financial Statements in "Item 8. Financial Statements and Supplementary Data" of this report.

Item 13. Certain Relationships and Related Transactions and Director Independence

The information required by this item will be set forth in the 2024 Proxy Statement under the caption "Corporate Governance - Related Party Transactions" and is incorporated herein by reference.

Item 14. Principal Accountant Fees and Services

The information required by this item will be set forth in the 2024 Proxy Statement under the caption "Principal Accountant Fees and Services" and is incorporated herein by reference.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) Documents filed as part of this Report:

(1) The Consolidated Financial Statements and related documents set forth in "Item 8. Financial Statements and Supplementary Data" are filed as part of this report.

(2) All other schedules to the Consolidated Financial Statements required by Regulation S-X are omitted because they are not applicable, not material or because the information is included in the Consolidated Financial Statements and related notes in "Item 8. Financial Statements and Supplementary Data" of this report.

(3) The following exhibits are required by Item 601 of Regulation S-K:

CERTIFICATION**

I, Brent J. Beardall, certify that:

1. I have reviewed this annual report on Form 10-K of WaFd, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
